

EXTERIOR FLOOR & WALL TILES

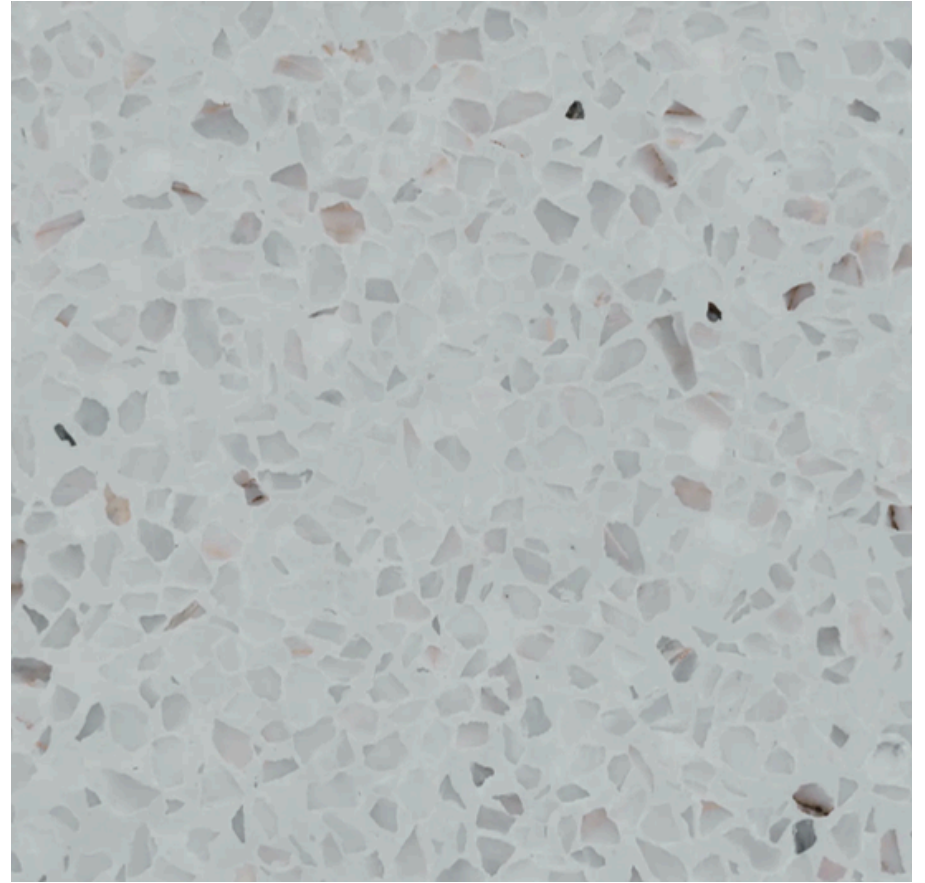

*Upgraded
Options*

Exterior floor tile comes in a variety of styles and finishes. Depending on where it is placed on the outside of the home, it's important to choose a tile designed for that specific use. No matter your preference, you'll find a tile that complements your unique style. When used outdoors, mosaic floor tiles bring an understated elegance and often serve as a striking statement piece. In contrast, matte earth-tone tiles create a calming backdrop, allowing outdoor furnishings or landscaping to take center stage. With the right selection, exterior tile not only enhances durability but also elevates the overall beauty and character of the home.

When choosing exterior tile, balance style, durability, and safety from the start. Exterior tiles are made to endure weather and heavy use, but not every finish is right for every application; polished tiles are typically reserved for interior floors because their glossy surface can be hazardous outdoors. Exterior tiles commonly come in sizes such as 12x12, 16x16, 18x18, and 24x24 inches (and larger-format planks and slabs for patios and terraces). Larger matte tiles often cost more than smaller or polished options, so budget accordingly when planning large areas.

Safety is essential: select tiles with a textured or slip-resistant finish (or ask about anti-slip treatments) to reduce the risk of falls in wet conditions. Proper installation — correct slope for drainage, suitable adhesives, and grout joint size — also plays a big role in long-term performance. For materials, porcelain is a popular outdoor choice due to its low porosity and durability, while natural stone offers unique character but may need periodic sealing.

Maintenance is straightforward but important: sweep away grit, wash with mild soap and water, and avoid harsh acidic cleaners that can damage surfaces or grout. Inspect grout lines and reseal grout or natural stone as recommended by the manufacturer to prevent water infiltration and staining. With the right finish, installation, and upkeep, exterior tile will deliver lasting elegance, safety, and curb appeal

*Please note, the tiles in this brochure are considered to be upgraded tiles, which would require extra payment in order for you to get them. We are excited to assist you with your homebuying needs. We can be reached at: **designcenter@crimresidential.com***
