

# RACE 2 REAL

Dear Sir / Madam,

Thank you for your interest in **Race2Real** and for considering a potential location for one of our **pyrolysis units** in 2025. We are excited about the opportunity to collaborate and explore the possibilities this partnership may bring.

As part of our ongoing commitment to **sustainability**, we aim to contribute to cleaner communities by cleaning up plastics and turning them into **affordable fuels**. Our goal is to not only address the pressing need to manage waste but also provide a significant reduction in fuel costs for local areas. In addition to the pyrolysis units, we are also installing **race simulators** in local communities to raise awareness about our mission and increase the feedstock for the pyrolysis process. These simulators will serve as a fun and engaging way for people to learn more about sustainability and contribute to our broader educational initiatives.

Please know that **Race2Real** will assume all **installation costs**, including preparation of the site, workforce management, and operation of the pyrolysis units. We are fully committed to ensuring that this project is carried out with the highest standards and minimal burden on your community.

We look forward to the possibility of working together and will be in touch soon to discuss next steps. If you have any questions or need further information in the meantime, please do not hesitate to contact us.

Thank you again for your interest and support in our mission. Together, we can make a significant impact on both sustainability and the future of energy.

Warm regards,

Grant Johnson  
CEO & Co Founder
