

# MALISH SOLUTION TANK

## DESIGNED TO ENHANCE CLEANING PERFORMANCE & REDUCE LABOR TIME

The Malish Solution Tank provides the superior quality and durability you have come to expect from Malish with features designed to help improve cleaning performance, reduce labor time, and limit the utilization of chemicals.

### KEY BENEFITS SOLUTION TANK

- Can quickly and easily be installed to work with a wide variety of machine mounts
- Extra-wide opening makes tank filling easier and helps prevent chemical spills
- Visual gradation marks on the tank make it simple for operators to monitor volume levels and properly mix the solution to avoid wasted dollars
- Flow control valve allows operators to properly manage the amount of solution used during cleaning

#### DURABLE CONSTRUCTION

The large-capacity, 4-gallon tank features durable, damage-resistant, rotational-molded polyethylene, machined brass hardware, and a flow control valve.

#### HARDWARE KIT

Connections to a water source are made using the included 2-foot water feed tube. Tank comes complete with all hardware, mounting brackets and hose.

#### LONGEVITY

To further improve durability and extend longevity, the tank features special seal material used within the main valve which is resistant to d-Limonene, a substance found within many floor cleaning chemicals.
