

COATING REMOVAL TOOL

THE REVOLUTIONARY DIAMABRUSH™ BY MALISH

A CHEMICAL-FREE WAY TO REMOVE MASTIC, GLUE, ADHESIVE & COATINGS

The Coating Removal Tool is the fastest, most effective tool for the removal of mastic, glues, adhesives, thin-set, and thin-mil epoxies from concrete floors. Its patented design prevents the abrasive products from clogging, resulting in fast, consistent removal throughout the life of the blades.

KEY BENEFITS COATING REMOVAL TOOL

- 10 times faster than manually scraping
- Limited surface contact during use
- Rigid, exposed diamond cutting surface creates a level floor with normal use
- No need for heavy, expensive and hard-to-use grinding equipment that often requires 480 3-phase power
- Designed to fit a wide variety of rotary floor machines
- Features replaceable diamond blades

MACHINERY

Designed to be used on your existing floor maintenance equipment. Handles pressure and weight of heavy down pressure machines like ride-on scrubbers, and heavier duty floor machines and buffers.

UNIQUE DESIGN

Unique design ensures new diamond particles are constantly being exposed resulting in a consistent profile throughout the life of the blades.

COATING REMOVAL TOOL

Designed with replaceable blades, which enable users to order a replacement kit and easily change used or worn blades minimizing downtime. Simply loosen two screws and replace.
