

CONCRETE PREP & POLISHING TOOLS

THE REVOLUTIONARY DIAMABRUSH™ BY MALISH

THE MOST VERSATILE AND COST-EFFECTIVE SOLUTION FOR CONCRETE POLISHING AVAILABLE

The Concrete Polishing Tools, part of the Diamabrush™ By Malish Floor Cleaning System, can multi-task as aggressive cleaning tools for your toughest concrete surfaces.

KEY BENEFITS PREP & POLISHING SYSTEM

- Most cost-effective solution for polishing and restoring concrete floors
- Designed to be used with most standard floor machines or auto-scrubbers
- Smoothly integrate into your regular floor cleaning routine
- Polishing tools polish and restore your concrete floor with every use

STEP 1

CONCRETE PREP OR PREP PLUS™ TOOL

- Abrades the surface to prep it for polishing
- Uses either a 25 or 100 diamond grit bonded to metallic backing and assembled to flexible steel spring blades
- Flexible blades designed to ALWAYS remain in contact with the floor regardless of floor imperfections

STEPS 2 - 7

CONCRETE POLISHING TOOLS

- Start with the coarse 50 grit and proceed through a progressively finer grit tool as your application requires
- The number of passes for each grit depends on the level of gloss you wish to obtain

Use the 50 grit Brown

Use the 100 grit Black

Use the 200 grit Blue

Use the 400 grit Green

Use the 1000 grit Red

Use the 2000 grit Tan
