Voter Roll Maintenance

There are currently 2 web-based apps we are using in Nueces County for the Election Integrity Project (EIP) voter roll maintenance/integrity.

TPA (The People's Audit)

ELLY (Formally EagleAI)

In the past we have only used TPA for reporting/tracking of submissions so the Voter Registration office is not inundated with multiple challenge/submission requests for the same voter from multiple apps or people. We still use TPA for tracking our submissions and also use ELLY for generating the submissions.

Introducing ELLY – The Elector List™

A purpose-built platform to strengthen the accuracy, efficiency, and confidence of county voter registration list maintenance.

County election offices carry a critical responsibility: maintaining voter registration lists that are accurate, current, and fully compliant with state and federal requirements. ELLY – The Elector List™ was created to support that mission by giving county officials a secure, intuitive way to review authoritative data sources in one place, streamline list-maintenance workflows, and reduce the time and effort required to investigate records.

ELLY consolidates publicly available, county-sourced, state-sourced, federally-sourced and proprietary data into a single dashboard that helps officials verify records more efficiently. ELLY never alters data or recommends actions. All decision-making authority remains solely with the election office.

What do you really know about the Cameron County Voter Roll?

STATE of AMERICA

VOTER REGISTRATION APPLICATION

(PLEASE PRINT CLEARLY)

1. Check all that apply: ☐ New Registration ☐ Name Change ☐ Address Change ☐ Political Party Affiliation ☐ Non Affiliation Change ☐ Signature Update

2. Are you a U.S. Citizen? Yes ☐ No ☐

(If not DO NOT complete form)

3. First Name - Middle Name - Last Name

Will you be 18 years old by the next election? Yes ☐ No ☐

2. Suffix (JR., SR, ETC).

If you do not possess a State Driver's License, ID Number give the last 4 digits of your Social Security Number.

Month Day Year

Non Driver ID Number

or Social Security Number

Zip

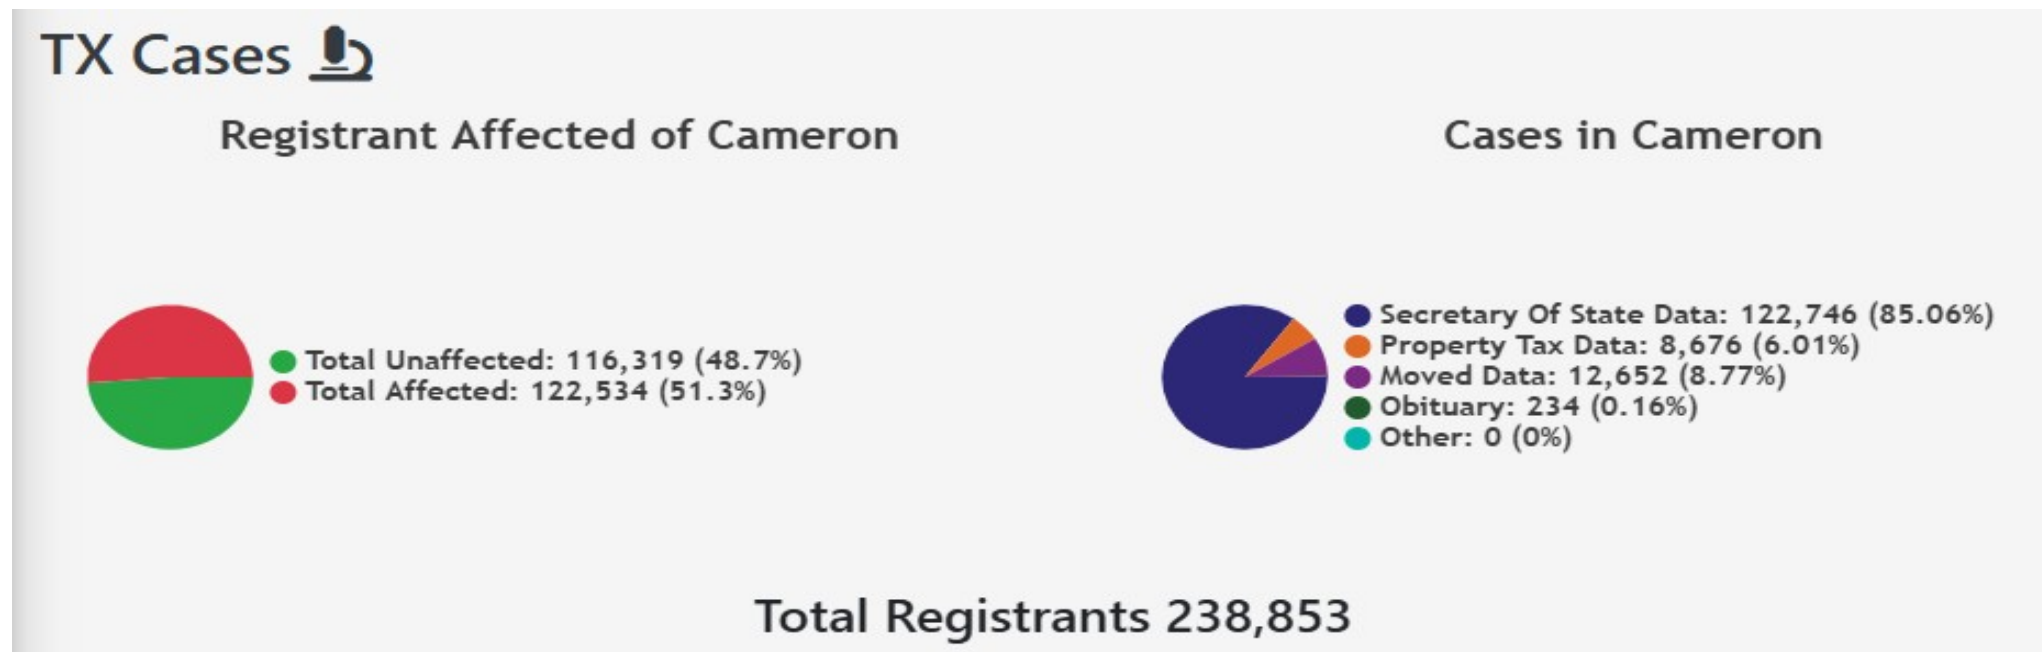

Have you ever wondered:

How accurate is your local Voter Roll?

If a deceased friend or relative is still on the local Voter Roll?

If someone you know has moved out of the county, are they still Active on the Voter Roll?

This is what ELLY has Identified!

Of the total registrations, 51.30% have probable issues (incorrect or invalid entries/addresses, etc.)

- 85.06% of those are SOS data (invalid names, addresses, characters, missing entries, etc.)
- 8.77% are voters who have moved (either within County, out of the County, or out of the State)
- 6.01% have Property Tax information issues (Occupancy, Vacant Lots, Commercial, etc.)
- 0.16% are probable deceased registered voters still on the Voter Roll
- 0.00% have Other issues (Non-Citizen, Felons, Mentally Incompetent)

ERIC vs ELLY cost comparison

AI PROMPT

I have been hired to respond to a request for proposal (RFP) from the state of Georgia to determine the feasibility and cost of doing one-on-one contracts with 24 states for the purpose of exchanging state voter roll list.

There are 100 million records on the voter rolls of the 24 states.

Georgia must set up a process for bilateral transfer of data with each of the 24 states on a bi-monthly basis.

Individuals must establish the details of, negotiate and then manage the state-to-state data exchange contracts on an ongoing basis.

Individuals must be hired to write the software programs to normalize the state data (ETL) and the exchange protocol.

Individuals must be hired to manage the protocol necessary to send the voter rolls to the USPS licensee for comparison to the USPS National Change of Address by using a third-party licensee such as BCC Software. There is also a cost per record of this process.

Individuals must be hired to manage the protocol necessary to send the voter rolls to the U.S. Post Office for comparison to the USPS Coding Accuracy Support System by using a third-party licensee such as BCC Software. There is also a cost per record of this process.

Individuals must be hired as data scientists to analyze the data and produce reports. Georgia Director of Elections has estimated it will take two persons three to four days to process the data from each state each time there is a transfer between each state.

Computer equipment, including the servers and workstations will be required to manage and maintain the data. There must be backup and failover and maximum level of cyber security.

Create a response to this Request for Proposals (RFP) to include a plan, time line for implementation, budget (to include administrative time and full benefits for all employees), and any additional features needed but not considered in the RFP.

Include diagrams, process flow charts, program manager information, spreadsheets, or other formatting and tools to best illustrate the our response to the RFP.

24 Contracts	First Year	Second Year
State-to-State	\$9,594,025	\$7,795,525

BACKGROUND

Bottom-up

Solution: a secure data aggregation platform designed to assist county election officials in maintaining accurate and up-to-date registration lists by consolidating publicly available into a single, user-friendly dashboard. ELLY enhances list maintenance efforts without creating, altering or interpreting data. It empowers officials to work more efficiently, reduces administrative burdens, and supports greater accuracy and transparency in registration rolls.

Top-down

Psephos is built on a foundation of expertise, innovation and a deep respect for data technology. Our team brings a combined 55 years of experience in data modeling, with backgrounds in politics, healthcare and financial services. We deliver a nonpartisan, data-driven solution designed to meet both current and evolving voter list maintenance needs, empowering states with accuracy, security and efficiency.

ELLY – The Electors List

Election administrators must ensure this continually evolving data set is as accurate and up-to-date as possible. The benefits of having accurate registration lists include:

- Ensuring eligible voters are accurately assigned to the correct voting districts and receive the proper ballot.
- Ensuring only eligible voters can cast a ballot in the jurisdiction.
- Reducing costs by helping to accurately budget the number of ballots, voting machines, poll books, polling places, and poll workers.
- Minimizing congestion or wait times at the polls.
- Reducing demands on poll workers to complete unnecessary additional forms at the polls.
- Simplifying post-election procedures by reducing the need for provisional ballots.
- Instilling confidence in voters about the integrity of elections.

ELLY – The Electors List

To support the EAC's (Election Assistance Commission) mission, ELLY imports original data from States (Voter Rolls, Voter History, Corporate Records), Counties (Property Records, Zoning Codes, Property Codes, Land Use Codes, Property Sales, Homestead Tax Exemption status), United States Postal Service NCOA (National Change of Address, permanent moves, 48 month history), the United States Postal Service CASS (Coding Accuracy Support System), and PCOA (Proprietary Change of Address Data, permanent moves, 60 month history).

There are millions of problem records and errors in the Federal, State and County databases. For example, in its CASS database, the USPS may apply a Business Address code to a Residence Address. All errors are in the original source data. Independent verification of each data point is recommended. Not all states or counties share the same data, so some fields will be blank.

ELLY – The Electors List

ELLY Data Sources

1. Voter list data from the Secretary of States
2. Voter history data from the Secretary of States
3. Corporate data from the Secretary of States
4. Property zoning codes, property class codes, land use codes from most US Counties
5. Property tax data, homestead exemption status, sale dates & amounts from most US Counties
6. Property description with number of rooms, bedrooms, and owner occupancy from most US Counties
7. Registration Address format corrections from the USPS Coding Accuracy Support System (CASS)
8. Registration Address Type
9. Registration Address information corrections from the USPS CASS
10. Non-Residential Address data from the USPS CASS
11. Mailing Address format corrections from the USPS CASS

ELLY – The Electors List

ELLY Data Sources Continued

- 12. Mailing Address information corrections from the USPS CASS
- 12. Non-Deliverable As Addressed data from the USPS CASS
- 12. Obituary data from funeral homes, newspapers, proprietary sources, & SSA Master Death List
- 12. Felon data from the states via ORR
- 12. National Change of Address data from the USPS (48 month)
- 12. Proprietary Change of Address (PCOA) multi-source, collaborated data (60 month)
- 12. Proprietary Corporate data from Google® Business
- 12. Proprietary Maps, street and sky view images from Google®
- 12. Proprietary Maps, images and text from Zillow®
- 12. Proprietary Emails and Cell Phone Numbers from multi-source, collaborated data

ELLY – The Electors List

All data imported is public data. ELLY provides access to information included in voter registrations and we feel that this must be held, secured and protected in an auditable format that is offered exclusively in password-protected, closed-access portals to curated individuals and used only as allowed by federal and state regulations and the ELLY End User Agreement. This data is provided as a courtesy. Any use of this data is the responsibility of the user. Commercial use is strictly prohibited.

ELLY – Portal

The Dashboard, Community, Support, and Documentation modules are information links used to access information about ELLY.

The Cases module gives access to reports run on the data selected.

The Voter Rolls module give access to the Voter information assigned or selected.

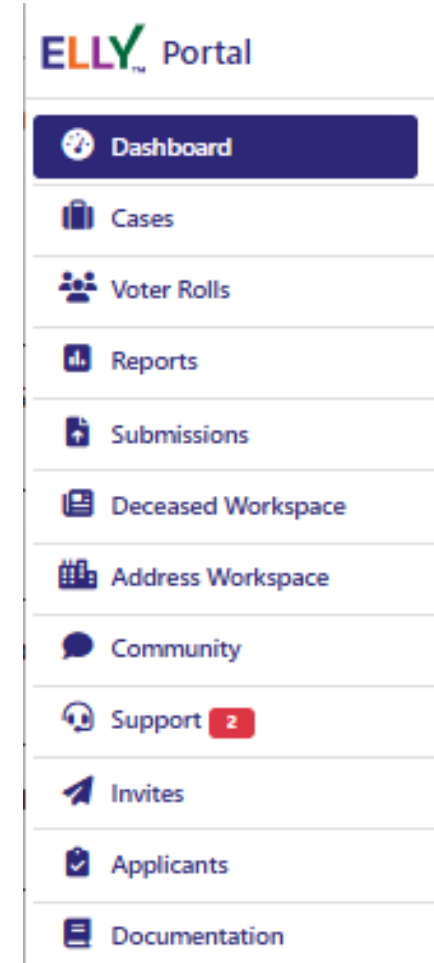

The Reports module gives specific reports that generates specific requested information.

The Submissions module gives access to the submitted information

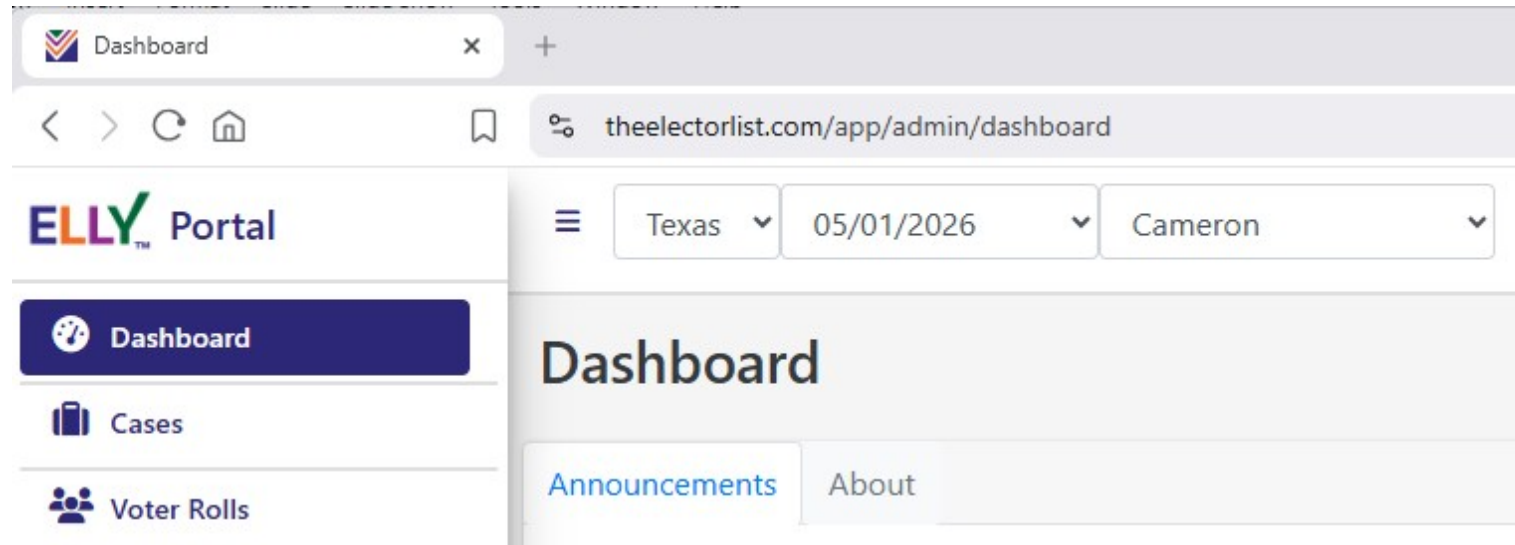

The Deceased (Obituaries) Workspace module gives access to believed deceased voters and information to verify, document and submit your findings.

The Address Workspace module will allow making groups of voters registered at a specific address as valid addresses

The Invites and Applicants modules allows current ELLY users to invite others to join the ELLY team.

ELLY – Access

The Dashboard (always at the top of the page) allows the user to:

- Select what dataset to access (IE: Texas) if the user has permission
- Select the Voter Roll dataset by upload date (IE: 05/01/2026)
- Subsets of the dataset selected (IE: County)
- Deeper subsets can be selected in Advanced Filtering (IE: City, Precinct, etc.)

ELLY – Advanced Filters

The screenshot shows the 'TX Voter Rolls' interface with an 'Advanced Filter' button. The 'Filter Form' is divided into several columns:

- County:** Tarrant (dropdown), All Reg Statuses (dropdown), Reg ID, Precinct, Last Election Voted (dropdown), Reg Date (dropdown).
- Personal:** First Name, Middle Name, Last Name, Name Suffix, Birth Month, Birth Day, Birth Year (dropdown), Calc. Age (dropdown).
- Reg Address:** Reg Address1, Reg Address2, Reg City, Reg State, Reg Zip.
- Move Info:** All Move Sources (dropdown), Best Address, Best City, Best State, Best Zip.
- Mail Address:** Mail Address1, Mail Address2, Mail City, Mail State, Mail Zip.
- Elly Data:** Comments, Has Comment (dropdown menu is open showing options: Has Comment, Yes, No, My Comment), Yes, No, My Comment.

At the bottom, there are 'Cancel' and 'Reset Form' buttons on the left, and 'Clear Filter' and 'Filter' buttons on the right.

The advanced filters will allow for additional search criteria for the Voters information including Hashtag (#) comments search and My Comments search.

ELLY – Community

The screenshot shows the ELLY Community page. At the top, there's a dark blue banner with the text "Join the movement for transparent elections with ELLY!". Below this, a white box contains text about ELLY's mission and a "Donate Now" button. Further down, another white box explains the community forum's purpose and provides instructions on how to use the different tabs. Below the text, there's a navigation bar with four tabs: "All Posts", "Announcements", "Discussions", and "ELLY-Wide Discussions". To the right of the tabs are "Refresh" and "Create Post" buttons. Below the navigation bar is a search bar with the placeholder text "Search here.." and a "Search" button. The first search result is titled "TX: Texas 'Fake' DOB Registrations: 1/1/1900, 12/31/1989, 11/11/1911" and includes a "Discussions" tag, the user "John Wheeler", and a timestamp "replied 06/29/2026 07:41 PM EDT". A comment icon with the number "1" is also visible.

Community

Join the movement for transparent elections with ELLY!

ELLY - The Elector List needs your contributions to help fund the cost of data (Voter Rolls, NCOA, PCOA, Property Tax, Obituaries), and on going development. Valid Vote, Inc. is a Georgia based 501c3. All your donations are used to support ELLY.

ELLY-Obituary Workspace

The screenshot shows a web form titled "ELLY-Obituary Workspace". At the top, there are two input fields for "Obituary URL1" and "Obituary URL2". Below these are four input fields: "Obituary Age" (with a placeholder "Age"), "Obituary Year of Birth" (with a placeholder "Year Of Birth"), "Obituary Date of Birth" (with a placeholder "mm/dd/yyyy Date of Birth"), and "Obituary Date of Death" (with a placeholder "mm/dd/yyyy Date of Death"). A "Comments" section follows with a text area containing the placeholder "Please enter comment". Below the comments is an "Attachments" section. It includes instructions: "You can add attachments here 3 different ways: 1. Drag & Drop files into large Drag & Drop box above. 2. Click in the Drag & Drop box to paste images from your clipboard. Window: Ctrl+V | Mac: Command+V 3. Use the Browse button below to explore your computer and select files to upload." A large dashed box is provided for dragging and dropping files, with the text "Drag & Drop Your Attachments Here Or Click Here to Paste Screenshots Windows: Ctrl+V | Mac: Command+V". Below this box is a "Select files ..." button and a "Browse ..." button. At the bottom of the form are three buttons: "Cancel", "✓ Not Found", and "✓ Alive". A red button labeled "✓ Deceased" is also present but partially obscured. The footer of the form reads "Copyright © 2026 The Elector List. All rights reserved."

After clicking the “Create Submission” button this appears at the bottom of the screen. Add screen captures of the obituary, etc., copy and paste the URL into appropriate spot, fill in other information if not already there and click “Deceased”. Other options are “Not Found” and “Alive”.
