# Voter Roll Maintenance

We are a non-profit, non-partisan, 501(c)(3) organization that ensures Nueces County and Texas elections are as fair, transparent, and accurate as possible through Legislation, Education, Training, Public Relations, and Voter Roll Maintenance.

[info@eipnc.com](mailto:info@eipnc.com)

# Voter Roll Maintenance

There are currently 2 web-based apps we are using in Nueces County for Election Integrity Project (EIP) voter roll maintenance/integrity.

TPA (The People's Audit)

ELLY (Formally EagleAI)

In the past we have only used TPA for reporting/tracking of submissions so the Voter Registration office is not inundated with multiple challenge requests for the same voter from multiple apps. We still use TPA for tracking our submissions and also use ELLY for generating the submissions.

# Introducing ELLY – The Elector List™

---

*A purpose-built platform to strengthen the accuracy, efficiency, and confidence of county voter registration list maintenance.*

County election offices carry a critical responsibility: maintaining voter registration lists that are accurate, current, and fully compliant with state and federal requirements. ELLY – The Elector List™ was created to support that mission by giving county officials a secure, intuitive way to review authoritative data sources in one place, streamline list-maintenance workflows, and reduce the time and effort required to investigate records.

ELLY is a secure, county-focused data aggregation and presentation platform. It consolidates publicly available, county-sourced, state-sourced, federally-sourced and proprietary data into a single dashboard that helps officials verify records more efficiently. ELLY never alters data or recommends actions. All decision-making authority remains solely with the election office.

# What do you really know about the Bexar County Voter Roll?

STATE of AMERICA

## VOTER REGISTRATION APPLICATION

(PLEASE PRINT CLEARLY)

1. Check all that apply:  New Registration  Name Change  Address Change  Signature Update  Political Party Affiliation  Non Affiliation Change

2. Are you a U.S. Citizen? Yes  No

(If not DO NOT complete form)

3. First Name - Middle Name - Last Name

Will you be 18 years old by the next election? Yes  No

2. Suffix (JR.,SR, ETC).

If you do not possess a State Driver's License ID Number give the last 4 digits of your Social Security Number.

Zip

Have you ever wondered:

If a deceased friend or relative is still on the local Voter Roll?

If someone you know has moved out of the county, are they still Active on the Voter Roll?

How accurate is your local Voter Roll?

# This is what ELLY has Identified!

Of the total registrations, 42.88% have probable issues (incorrect or invalid entries/addresses, etc.)

77.93% of those are SOS data (invalid names, birth dates, addresses, characters, missing entries, etc.)

17.91% are voters who have moved (either within County, out of the County, or out of the State)

4.05% have Property Tax information issues (Occupancy, Vacant Lots, Commercial, etc.)

0.11% are probable deceased registered voters still on the Voter Roll

# Elly Updates

---

- 229,000,000 Latest State Registrations

# ERIC vs ELLY cost comparison

## AI PROMPT

**I have been hired to respond to a request for proposal (RFP) from the state of Georgia to determine the feasibility and cost of doing one-on-one contracts with 24 states for the purpose of exchanging state voter roll list.**

There are 100 million records on the voter rolls of the 24 states.

Georgia must set up a process for bilateral transfer of data with each of the 24 states on a bi-monthly basis.

Individuals must establish the details of, negotiate and then manage the state-to-state data exchange contracts on an ongoing basis.

Individuals must be hired to write the software programs to normalize the state data (ETL) and the exchange protocol.

Individuals must be hired to manage the protocol necessary to send the voter rolls to the USPS licensee for comparison to the USPS National Change of Address by using a third-party licensee such as BCC Software. There is also a cost per record of this process.

Individuals must be hired to manage the protocol necessary to send the voter rolls to the U.S. Post Office for comparison to the USPS Coding Accuracy Support System by using a third-party licensee such as BCC Software. There is also a cost per record of this process.

Individuals must be hired as data scientists to analyze the data and produce reports. Georgia Director of Elections has estimated it will take two persons three to four days to process the data from each state each time there is a transfer between each state.

Computer equipment, including the servers and workstations will be required to manage and maintain the data. There must be backup and failover and maximum level of cyber security.

Create a response to this Request for Proposals (RFP) to include a plan, time line for implementation, budget (to include administrative time and full benefits for all employees), and any additional features needed but not considered in the RFP.

Include diagrams, process flow charts, program manager information, spreadsheets, or other formatting and tools to best illustrate the our response to the RFP.

24 Contracts	First Year	Second Year
State-to-State	\$9,594,025	\$7,795,525

46 States	All Years
State-to-State	Free Subscription

Fielding queries, crosschecking sources, interfacing with multiple data holders, legal challenges and routine list maintenance, pause periods preceding elections and elections themselves

## Personnel

Hiring, training, responsibilities, management, sick, PTO, turnover

## Money

Amount needed, amount budgeted, amount allocated, amount actually available for this item, person, data, program, technology

## Technology

Equipment, software, data programmer, data scientist

# BACKGROUND

---

## Bottom-up

Solution: a secure data aggregation platform designed to assist county election officials in maintaining accurate and up-to-date registration lists by consolidating publicly available into a single, user-friendly dashboard. ELLY enhances list maintenance efforts without creating, altering or interpreting data. It empowers officials to work more efficiently, reduces administrative burdens, and supports greater accuracy and transparency in registration rolls.

## Top-down

Psephos is built on a foundation of expertise, innovation and a deep respect for data technology. Our team brings a combined 55 years of experience in data modeling, with backgrounds in politics, healthcare and financial services. We deliver a nonpartisan, data-driven solution designed to meet both current and evolving voter list maintenance needs, empowering states with accuracy, security and efficiency.

# ELLY – The Electors List

Election administrators must ensure this continually evolving data set is as accurate and up-to-date as possible. The benefits of having accurate registration lists include:

- Ensuring eligible voters are accurately assigned to the correct voting districts and receive the proper ballot.
- Ensuring only eligible voters can cast a ballot in the jurisdiction.
- Reducing costs by helping to accurately budget the number of ballots, voting machines, poll books, polling places, and poll workers.
- Minimizing congestion or wait times at the polls.
- Reducing demands on poll workers to complete unnecessary additional forms at the polls.
- Simplifying post-election procedures by reducing the need for provisional ballots.
- Instilling confidence in voters about the integrity of elections.

# ELLY – The Electors List

To support the EAC's (Election Assistance Commission) mission, ELLY imports original data from States (Voter Rolls, Voter History, Corporate Records), Counties (Property Records, Zoning Codes, Property Codes, Land Use Codes, Property Sales, Homestead Tax Exemption status), United States Postal Service NCOA (National Change of Address, permanent moves, 48 month history), the United States Postal Service CASS (Coding Accuracy Support System), and PCOA (Proprietary Change of Address Data, permanent moves, 60 month history).

There are millions of problem records and errors in the Federal, State and County databases. For example, in its CASS database, the USPS may apply a Business Address code to a Residence Address. All errors are in the original source data. Independent verification of each data point is recommended. Not all states or counties share the same data, so some fields will be blank.

# ELLY – The Electors List

## **ELLY Data Sources**

1. Voter list data from the Secretary of States
2. Voter history data from the Secretary of States
3. Corporate data from the Secretary of States
4. Property zoning codes, property class codes, land use codes from most US Counties
5. Property tax data, homestead exemption status, sale dates & amounts from most US Counties
6. Property description with number of rooms, bedrooms, and owner occupancy from most US Counties
7. Registration Address format corrections from the USPS Coding Accuracy Support System (CASS)
8. Registration Address Type
9. Registration Address information corrections from the USPS CASS
10. Non-Residential Address data from the USPS CASS
11. Mailing Address format corrections from the USPS CASS

# ELLY – The Electors List

## **ELLY Data Sources Continued**

12. Mailing Address information corrections from the USPS CASS
13. Non-Deliverable As Addressed data from the USPS CASS
14. Obituary data from funeral homes, newspapers, proprietary sources, & SSA Master Death List
15. Felon data from the states via ORR
16. National Change of Address data from the USPS (48 month)
17. Proprietary Change of Address (PCOA) multi-source, collaborated data (60 month)
18. Proprietary Corporate data from Google® Business
19. Proprietary Maps, street and sky view images from Google®
20. Proprietary Maps, images and text from Zillow®
21. Proprietary Emails and Cell Phone Numbers from multi-source, collaborated data

# ELLY – The Electors List

**All data imported is public data.** ELLY provides access to information included in voter registrations and we feel that this must be held, secured and protected in an auditable format that is offered exclusively in password-protected, closed-access portals to curated individuals and used only as allowed by federal and state regulations and the ELLY End User Agreement. This data is provided as a courtesy. Any use of this data is the responsibility of the user. Commercial use is strictly prohibited.

# ELLY – Portal

The Dashboard, Community, Support, and Documentation links are information links used to access information about ELLY.

The Cases link gives access to reports run on the data selected.

The Voter Rolls link give access to the Voter information assigned or selected.

The Reports link gives specific reports that generates specific requested information.

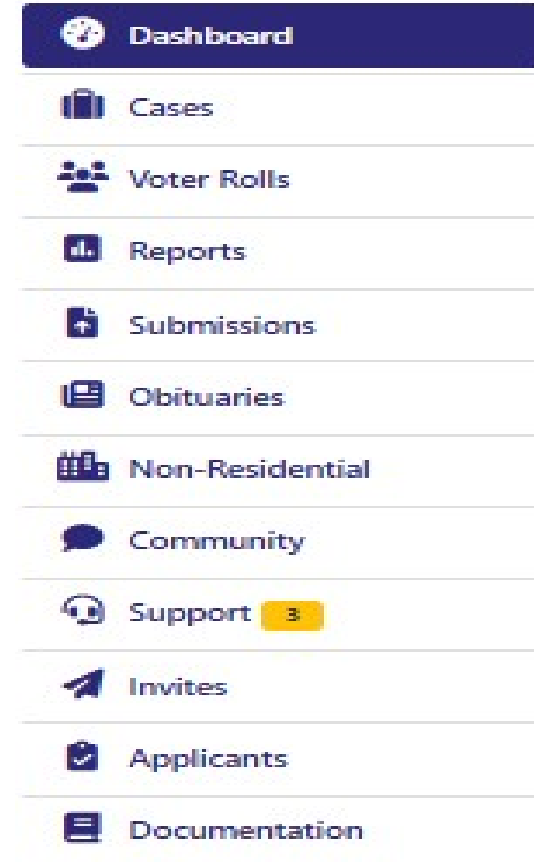

The Submissions link gives access to the submitted information

The Obituaries link gives access to believed deceased voters and information to verify, document and submit your findings.

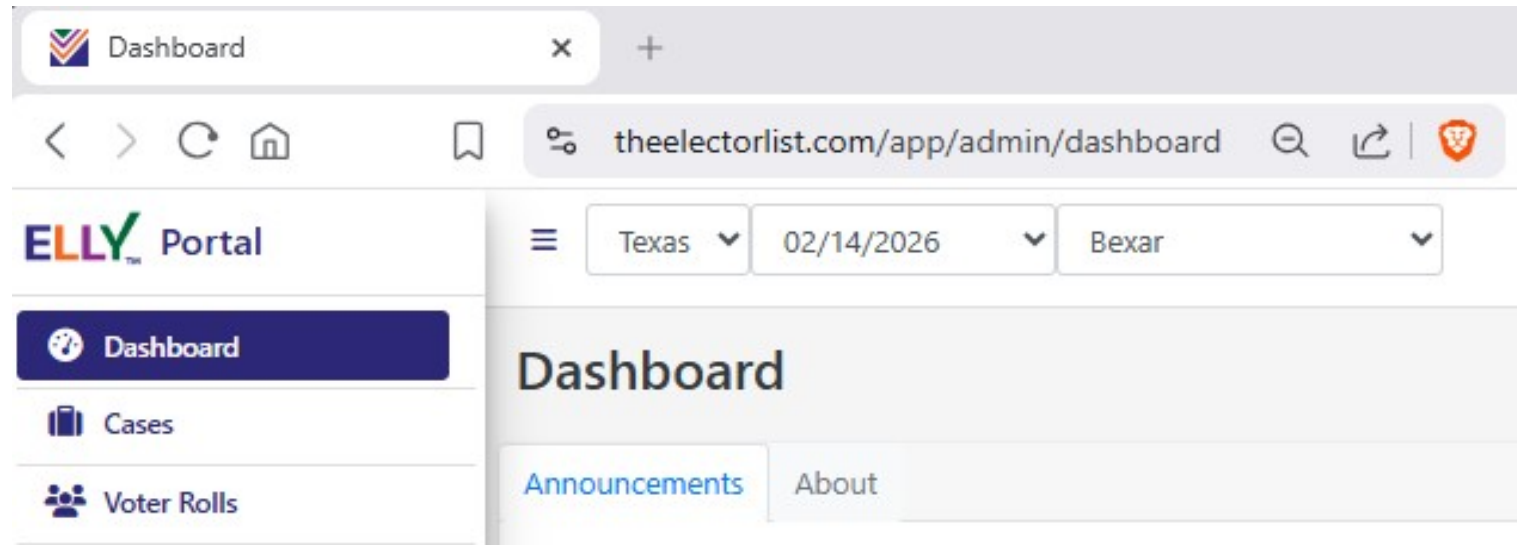

The Non-Residential link is in Beta-Testing right now and it will allow making groups of voters at a specific address as valid addresses

The Invites and Applicants links allows current ELLY users to invite others to join the ELLY team.

## ELLY Portal

# ELLY – Access

The Dashboard (always at the top of the page) allows the user to:

- Select what dataset to access (IE: Texas) if the user has permission
- Select the Voter Roll dataset by upload date (IE: 02/14/2026)
- Subsets of the dataset selected (IE: County)
- Deeper subsets can be selected in Advanced Filtering (IE: City, Precinct, etc.)

# ELLY – Advanced Filters

The screenshot displays the ELLY web application interface for 'TX Voter Rolls'. At the top, there are navigation elements including the ELLY logo, a hamburger menu, and dropdown menus for 'Texas', '08/20/2025', and 'Nueces'. A user profile for 'John Wheeler' is visible in the top right. The main content area is titled 'TX Voter Rolls' and includes an 'Advanced Filter' button. Below this is a 'Filter Form' with five columns of search criteria:

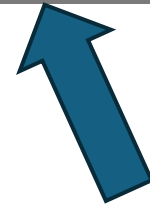

- County:** Includes dropdowns for 'County' (set to Nueces), 'All Reg Statuses', and 'Reg Date'.
- Personal:** Includes text input fields for 'First Name', 'Middle Name', 'Last Name', 'Name Suffix', 'Birth Month', 'Birth Day', 'Birth Year', and 'Calc. Age'.
- Reg Address:** Includes text input fields for 'Reg Address1', 'Reg Address2', 'Reg City', 'Reg State', and 'Reg Zip'.
- Move Info:** Includes a dropdown for 'All Move Sources' and text input fields for 'Best Address', 'Best City', 'Best State', and 'Best Zip'.
- Mail Address:** Includes text input fields for 'Mail Address1', 'Mail Address2', 'Mail City', 'Mail State', and 'Mail Zip'.

At the bottom of the filter form, there are 'Cancel' and 'Filter' buttons on the left, and 'Reset Form' and 'Clear Filter' buttons on the right.

The advanced filters will allow for additional search criteria for the Voters information

# ELLY – Microscope

The screenshot shows the ELLY web application interface. At the top, there are navigation elements including 'Texas', '08/20/2025', and a user profile for 'John Wheeler'. The main content area is titled 'TX Cases' and contains a list of items. The first item is 'Incomplete Data or Error (S7)', which has a modal window open over it. The modal window contains the following text: 'Missing or Incorrect Data on Registration (Birth Information/Name). Most states require Full Legal Name. Full Legal Name is an EAC Best Practice. Registrations with less than Full Legal Name, foreign characters, special characters, non alpha characters and white spaces cause unnecessary problems with matching citizenship, duplicates, moves, obituaries, etc. (Note 10% - 15% of Americans do not have a middle name. This should cause the state's voter registration software to default to "NMN" or "null"). Final decisions are up to the County Election Administrators.' Below the modal, there is a summary row for 'Total Registrants Affected' with a value of '60,061 (23.7%)'. The second item in the list is 'Registration Address (Verified per USPS) (S1)', which has a small microscope icon next to it. A blue arrow points from this icon down to the explanatory text below the screenshot.

A microscope icon represents additional information available

INTEGRITY NETWORK

### SAVE America Act Citizen Pledge

I, the undersigned, stand for election integrity and urge the United States Senate to take immediate and decisive action on the SAVE America Act (S1383).

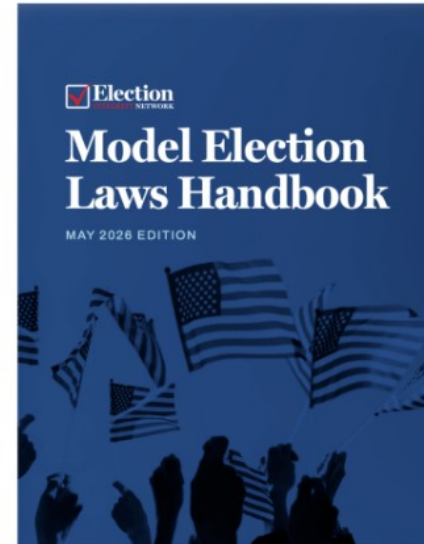

I pledge my support and call on Senators to:

1. Bring the SAVE America Act to the Senate floor immediately for consideration. Sen Thune and other Senators must understand that any motion to invoke cloture or otherwise cut off debate without first HAVING a debate will be seen by me as a deliberate move to kill the SAVE America Act, and I will join other patriotic Americans in condemning such action.
2. A cloture vote without full and open debate is deliberately killing the SAVE America Act and undermining election integrity.
3. A full talking filibuster and forcing Senators to openly debate the bill's merits and explaining their positions on protecting American elections from non-citizen voting and other vulnerabilities is essential.

I call on the Senate to pass the SAVE America Act and to send it promptly to President Trump for his signature into law.

By signing this pledge, I commit to holding my Senators accountable for these actions to safeguard our Republic through secure, citizen-only voting.
