Voter Roll Maintenance Committee Report

Chair: John Wheeler

STATE of AMERICA

VOTER REGISTRATION APPLICATION

(PLEASE PRINT CLEARLY)

1. Check all that apply: New Registration Name Change Address Change Political Party Affiliation Non Affiliation Change Signature Update

2. Are you a U.S. Citizen? Yes No
(If not DO NOT complete form)

Will you be 18 years old by the next election? Yes No

2. Suffix (JR.,SR, ETC.)

3. First Name - Middle Name - Last Name

Birth Date: Day Month Year

If you do not possess a State Driver's License Number give the last 4 digits of your Social Security Number

We finished Age Group 76 with 10 deceased voters found. We are currently working on Age Group 75. We have completed 6 of the 15 Age 75 sections with 2 sections assigned. I have 25 Registered Voters with residencies listed at Mail Facilities ready to be submitted. I finally got the mailing list labels printed for the mail out to Moved out of State voters to try to get them to respond to have their names removed from our Voter Roll instead of just being on SUSPENSE. I have printed, labeled, stuffed and mailed out 231 letters with postage. We definitely need donations to help with the cost of postage.

On 02/16/2026 Pam and I had a meeting with Representative Todd Hunter, Representative Denise Villalobos, Senator Adam Hinojosa, Tax Collector Assessor Kevin Kieschnick, and MK Walling's from Senator Hinojosa's office and joined by a Zoom Call was Dr. Rick Richards (developer of ELLY) and his son John Richards (developer of Psephos). The purpose of this meeting was to give our local legislatures an introduction to Psephos and ELLY and what these applications can do for us locally and at the SOS level concerning Voter Roll Maintenance and Administration including cost benefits and get their support to bring this to the attention of the SOS and others in the State legislature.

There were several questions ask about security, access limits, and cost. Dr. Richards stated that they could provide whatever security our SOS requires. Mr. Kieschnick was worried about citizen access to ELLY. ELLY does not access the local Voter Roll in any way, it is completely separate and there is a 2-person verification to anyone requesting access to ELLY and, if Nueces County decided to use ELLY, I believe Mr. Kieschnick could be set up so everyone requesting access to Nueces County data could go through him. Senator Hinojosa asked about the cost of Psephos and Dr. Richards replied that he believed that Texas was already paying 10-13 data analysts to support the Voter Roll data sharing with 9 other states and that Psephos could do the same job, with all 44 states that are in Psephos and ELLY, for less than the cost of 2 data analysts.

Mr. Kieschnick also shared 5 reports and surveys from the TACEO (Texas Association of County Election Officials) showing the issues with the new TEAMS2.0 is much worse that previously expected. These 5 files are posted on the main page of our website eipnc.com.

On 02/18/2026 I requested and received a current copy of the Nueces County Voter Roll. After comparison to the recently deceased from 1225, 39 of the 195 remained and are ready to be submitted.

TEAM Survey Comparison: October vs. February This report provides a comparative analysis of the feedback gathered from the October and February surveys regarding the TEAM system functionality and user experience. **1. Consistent Issues (Persisted from Oct to Feb)** The following areas remain problematic across both reporting periods, indicating systemic issues that have not yet been fully resolved:

● **System Instability ("Whack-a-Mole" Fixes): A recurring sentiment in both surveys is that fixing one bug frequently breaks another unrelated feature.**

● **DPS Application Processing: Both surveys highlight issues with DPS records, including missing addresses, doubled entries, and delays in records appearing in the system.**

● **Reporting Failures: Users consistently report that reports fail to generate, remain "in progress" for days, or produce duplicate/triplicate data.**

● **Mass Mailout (MMO) & Printing: Difficulties with batch printing voter notices and certificates are present in both, specifically regarding the efficiency and accuracy of the output.**

● **Precinct and District Mapping: Errors in commissioner precincts, congressional districts, and street lists remain a major concern for data integrity.** **2. October-Specific Issues (Not prominent in Feb)** **These issues were focal points in October but were mentioned less frequently or replaced by more specific technical complaints in February**

● **Training & Documentation: October feedback emphasized a lack of webinars and manual documentation following the initial TEAMS training.**

● **Basic Navigation Anxiety: Early feedback focused heavily on the "nerve-racking" nature of the new interface and general "user-unfriendliness" of the new steps.**

● **System Performance Speed: While still slow, the specific complaints about the "refresh button" needing to be clicked multiple times to see print options were more prevalent in the initial October feedback.** **3. New Issues (Appearing in the Feb Survey)** **The February survey shows a shift toward more complex, election-specific failures as users attempt to move into active election cycles:**

● **ABBM (Ballot by Mail) & FPCA Failures: Significant new complaints regarding the inability to process ABBMs, system-generated errors on returned carriers, and the system "deleting" active voters when a ballot is mailed.**

- **Precinct Overcrowding: A critical new issue surfaced where the system registered over 50,000 voters into a single precinct in one county.**
 - **Voter History Ordering: New complaints regarding the logic of voter history reports, specifically that they are sorted by First Name instead of Last Name, or Block Number instead of Street Name.**
 - **Communication Gaps with Leadership: February feedback specifically calls out a lack of communication with "SOS leadership" who can actually make decisions, moving beyond just technical support tickets.**
 - **Offline County Conflicts: Specific feedback from "offline" counties regarding error files and PSV list growth that wasn't as detailed in the October summary.**
- 4. Most Referenced Areas (Top Concerns) Based on frequency and intensity of the feedback, these are the primary "pain points" for the user base:**
- 1. Mass Mailout (MMO) Errors: Referenced most frequently in February as a "burden," specifically regarding missing city/zip data and incorrect districts on cards.**
 - 2. General Reliability/Trust: The sentiment that the system is "not reliable enough to run an election" is the most emotionally charged and frequently repeated theme.**
 - 3. Inaccurate Voter Data: The most cited technical fear—specifically that addresses are disappearing, pcts are wrong, and the "backbone" of the election (voter rolls) is no longer clean.**
 - 4. Workload/Backlog: Users repeatedly reference being "weeks behind" or "never being able to catch up" due to the convoluted nature of the new processes.**

Operational and processing impacts

- **Intake backlog: Paper applications pile up; delayed data entry and VUID issuance.**
- **Timeliness: Missed statutory deadlines (e.g., 30-day cutoff before Election Day), late processing of address/name changes, county-to-county transfers, and status updates.**
- **List maintenance paused: No updates from DPS, courts, vital records; deceased, felony, and non-citizen removals stall; NCOA/undeliverable mail workflows freeze.**
- **Precinct errors: Inability to assign/validate precincts; wrong polling place notifications.** • **Registration certificates: Delayed printing/mailing; voters lack current certificates.**
- **Pollbook accuracy: Electronic pollbooks and supplemental lists out of sync; higher error rates.**
- **Duplicate/incomplete records: Manual workarounds increase data-entry mistakes and duplicates.**
- **Mail ballot dependency: Incorrect or late registration status affects ballot-by-mail eligibility and delivery.**
- **Provisional ballot surge: More voters not found in rolls on Election Day; longer adjudication queues post-election.**
- **UOCAVA/MOVE timelines: Risk missing transmission windows for military/overseas voters tied to registration status.**
- **Agency registrations (NVRA): Public assistance/DPS transactions cannot sync; applications stranded.**

Legal and compliance risks

- **HAVA compliance: Statewide database availability and list accuracy requirements at risk; potential impact on federal funding.**
- **NVRA obligations: Failure to timely process agency-submitted registrations and list maintenance.**
- **ADA/language access: Reduced ability to deliver accessible services.**
- **Litigation exposure: Missed deadlines, inconsistent processing, or disenfranchisement can prompt lawsuits or court orders.**
- **Records retention: Managing paper under retention laws becomes more complex.**

Meeting: Monday March 23rd at 6:30pm here at Silverado

Quarterly Board of Directors Meeting Monday April 6th

Meeting: Monday April 6th at 6:30PM here at Silverado

Be watching for CALL to ACTIONS Regarding SAVE AMERICA ACT.

Four Resolutions presented to the Precinct convention on Saturday March the 7th. The four resolutions were written by our Resolutions group and Kevin Kieschnick helped with the Election of the SOS. Copies on the table for your review.

Reminder of the next Prayer meeting in March
