Documenting and Tracking Deceased Registered Voters in TPA

After August 7th, 2024 until after the general presidential election all Texas county elections administrations will not process any challenges to their Voter Rolls except for deceased voters.

Outline

1) Getting Started
2) Systematic Approach
3) Generating a List
4) Researching
5) Documenting in TPA
6) Submitting Prepared Materials
7) Tracking Progress

Getting Started

There are currently 2 web-based apps we are using in Nueces County for EIP voter roll maintenance/integrity.

TPA
ELLY (Formally EagleAI)

Each has their pros and cons but we have concentrated all our reporting efforts in TPA. We will only use TPA for reporting of submissions so the Voter Registration office is not inundated with multiple challenge requests for the same voter from multiple apps.

Getting Started

The People's Audit (TPA) is currently working in 4 states:

Georgia
Florida
North Carolina
Texas

TPA's main focus is on UAA's (Undeliverable as Addressed) mailing addresses mainly for Vote by Mail ballots.

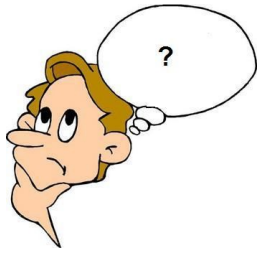
Getting Started

The Elector List (ELLY) has the Voter Rolls for 46 States plus Washington DC.

ELLY’s main focus is on Invalid data, Moved Voters, Property Tax info, and Deceased.

Getting Started

Website signup for access to the ELLY/TPA databases are available but to get quicker granted access it is best to be recommended (Invited in ELLY) by someone who has been in the system for a while. You will need access to your county or the counties you plan on working on. Again this may have to be requested for multiple county access.



Systematic Approach

The approach we chose to address deceased voters was to generate a list of active voters by each specific age (100+, 99, 98, 97… 75) and work each age until complete and then move down to the next age. There are fewer 100+ voters and a higher chance they may have passed away. This low hanging fruit didn't take long to find and process.

Systematic Approach

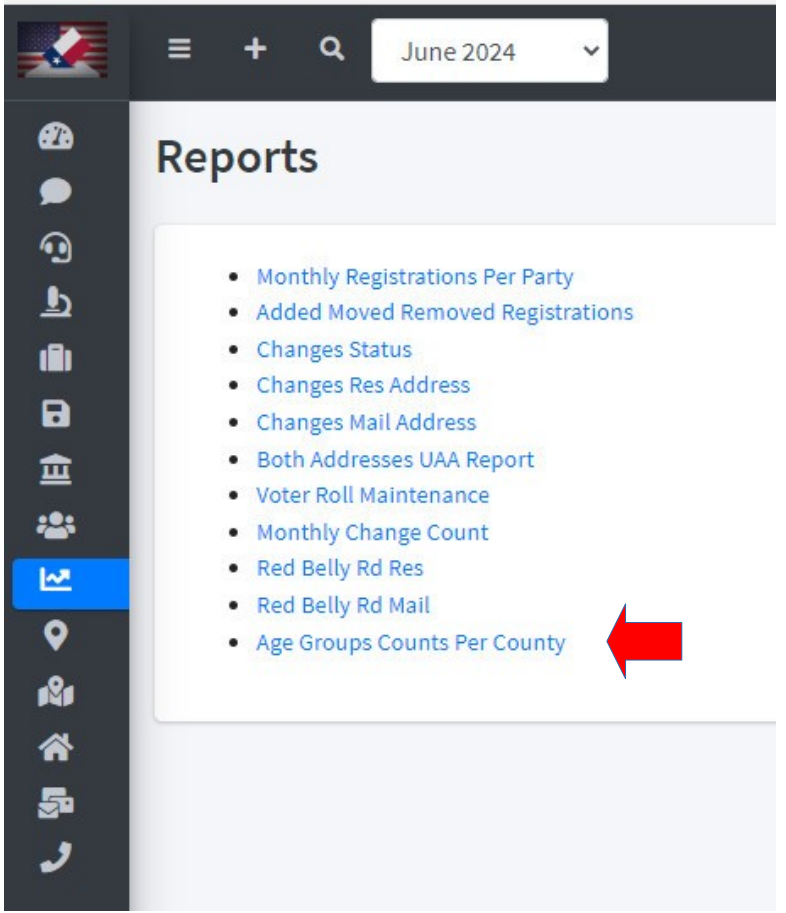
Voter Age	Active Voters	Man/Days
100	64	0.53
99	93	0.78
98	108	0.90
97	155	1.29
96	166	1.38
TPA Range 1	**586**	**4.88**
95	231	1.93
94	282	2.35
93	324	2.70
92	378	3.15
91	440	3.67
TPA Range 2	**1655**	**13.79**
90	582	4.85
89	420	3.50
88	487	4.06
87	517	4.31
86	613	5.11
TPA Range 3	**2619**	**21.83**
85	918	7.65
84	1003	8.36
83	1166	9.72
82	1281	10.68
81	1404	11.70
TPA Range 4	**5772**	**48.10**
80	1497	12.48
79	1020	8.50
78	1294	10.78
77	1441	12.01
76	1370	11.42
TPA Range 5	**6622**	**55.18**
75	1478	12.32
74	2412	20.10
73	2541	21.18
72	2763	23.03
71	3029	25.24
70	3090	25.75
TPA Range 6	**13835**	**115.29**

Total Active Voters Age 70-100	**31089**	**Estimated Total Man/Days to Complete**	**259.08**

This is a breakdown of the number of Nueces County active voters by age that we targeted and a calculation of man/days to complete each age based on 120 voters processed each day. As you can see the 70-80 ages would take a considerable about of time and effort to complete unless there is a large group working on these at the same time.

Generating a List

There is a new report in TPA reports “Age Groups Counts Per County” that can be used to download the voters in specific age ranges into a .csv or Excel file and then sorted by age.

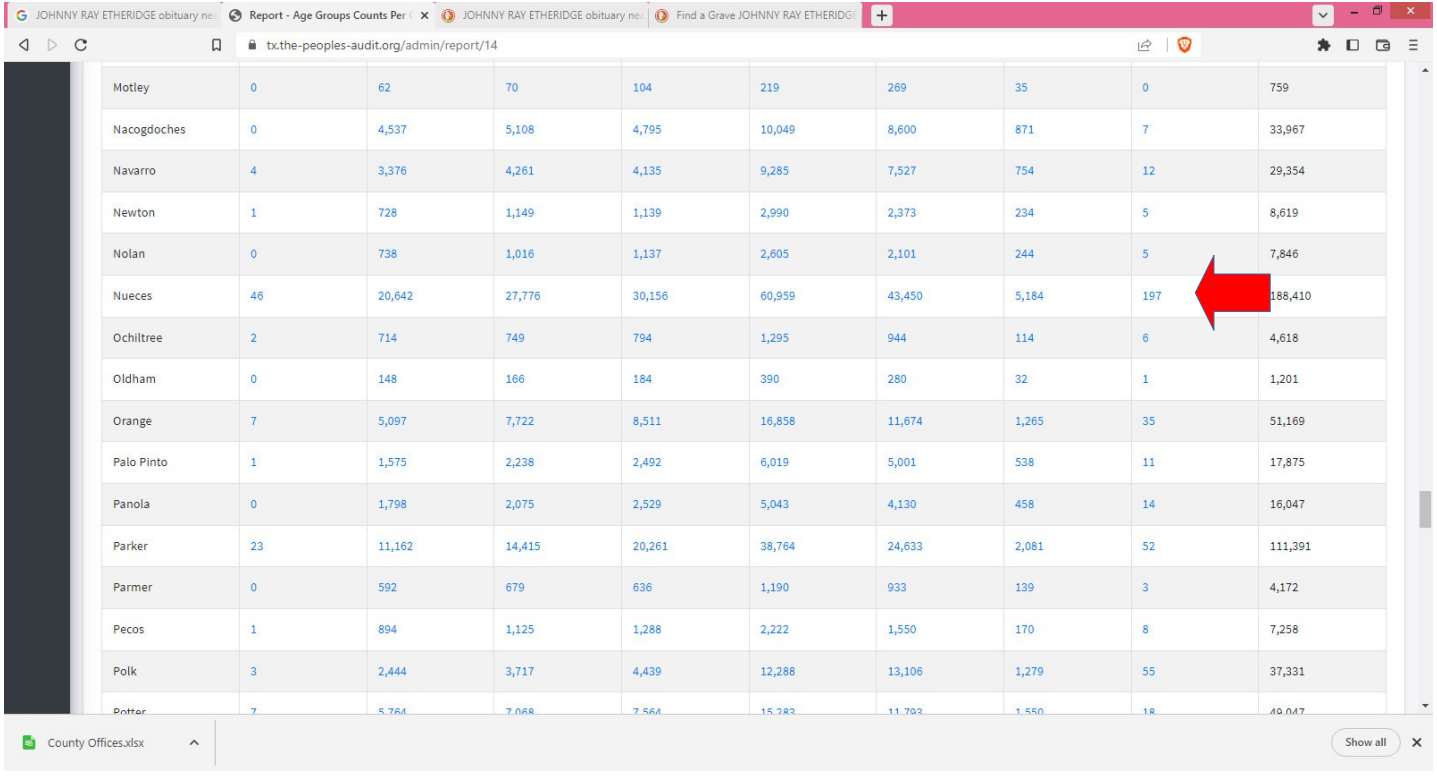


Generating a List

	Under 18 *	18-24	25-34	35-44	45-64	65-84	85-99	Over 100	Total
Anderson	6	2,623	3,467	3,862	8,782	7,665	840	25	27,270
Andrews	2	1,248	1,575	1,826	2,827	1,509	219	9	9,215
Angelina	3	5,325	7,279	7,477	16,065	12,265	1,482	26	49,922
Aransas	0	1,107	1,413	1,812	5,550	6,180	653	13	16,728
Archer	2	595	769	1,078	2,145	1,627	180	1	6,397
Armstrong	0	118	150	190	416	385	47	1	1,307
Atascosa	7	3,111	4,238	4,547	9,703	6,184	576	10	28,376
Austin	5	1,995	2,358	2,831	6,368	5,758	572	10	19,897
Bailey	0	329	477	430	781	708	108	5	2,838
Bandera	1	1,131	1,574	2,002	5,895	6,080	539	11	17,233

Running the report returns each county with columns of voter age groupings

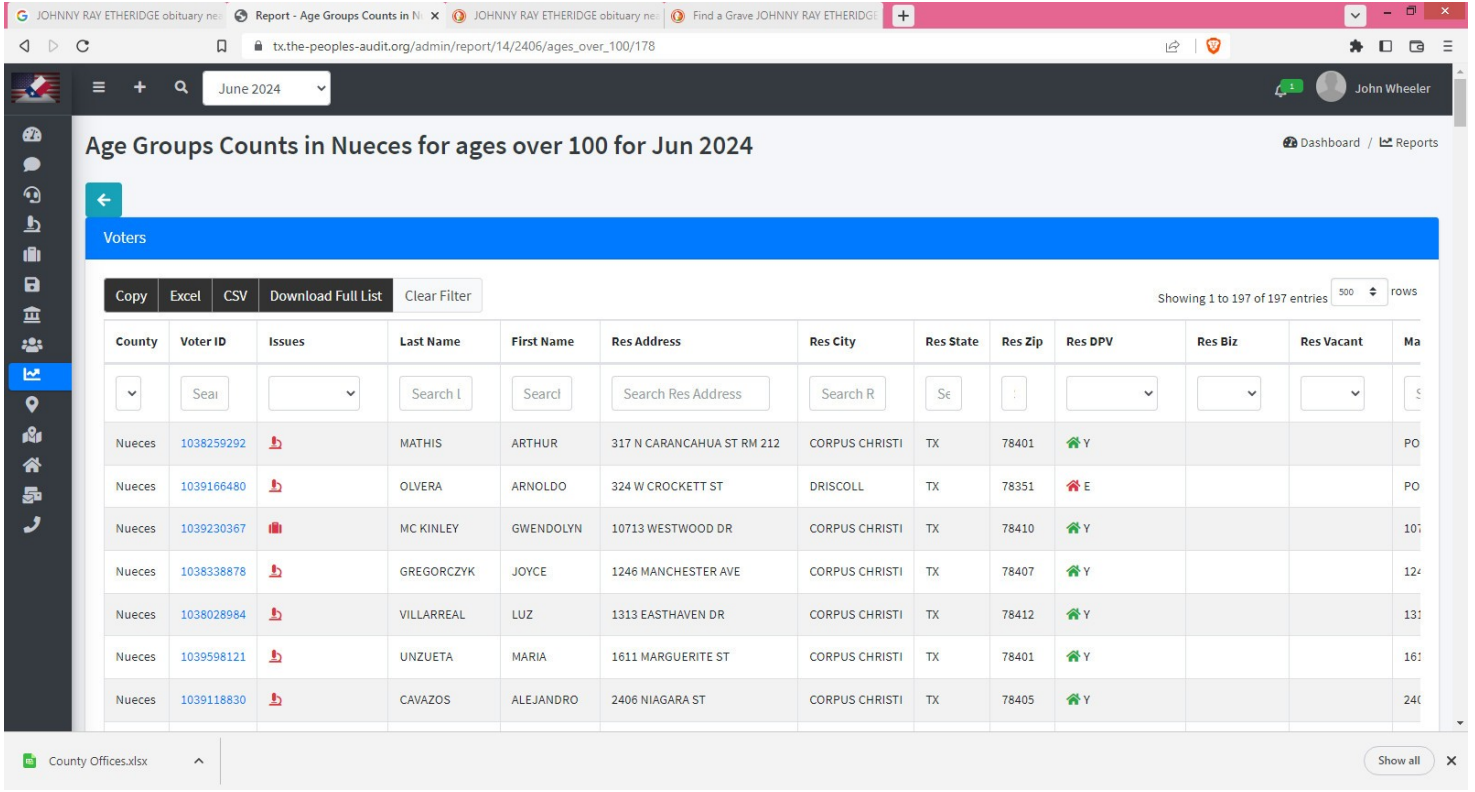
Generating a List



Motley	0	62	70	104	219	269	35	0	759
Nacogdoches	0	4,537	5,108	4,795	10,049	8,600	871	7	33,967
Navarro	4	3,376	4,261	4,135	9,285	7,527	754	12	29,354
Newton	1	728	1,149	1,139	2,990	2,373	234	5	8,619
Nolan	0	738	1,016	1,137	2,605	2,101	244	5	7,846
Nueces	46	20,642	27,776	30,156	60,959	43,450	5,184	197	188,410
Ochiltree	2	714	749	794	1,295	944	114	6	4,618
Oldham	0	148	166	184	390	280	32	1	1,201
Orange	7	5,097	7,722	8,511	16,858	11,674	1,265	35	51,169
Palo Pinto	1	1,575	2,238	2,492	6,019	5,001	538	11	17,875
Panola	0	1,798	2,075	2,529	5,043	4,130	458	14	16,047
Parker	23	11,162	14,415	20,261	38,764	24,633	2,081	52	111,391
Parmer	0	592	679	636	1,190	933	139	3	4,172
Pecos	1	894	1,125	1,288	2,222	1,550	170	8	7,258
Polk	3	2,444	3,717	4,439	12,288	13,106	1,279	55	37,331
Potter	7	5,764	7,068	7,564	15,283	11,793	1,550	18	49,047

Go down the list until you find the county you are interested in and have access to (IE: Nueces Co) and select the age grouping you are interested in.

Generating a List



Selecting the appropriate age group will return a listing of each voter in that range.

Generating a List

Use any of the options to download the file list. COPY will copy the list to the clipboard and can be pasted into an Excel file. .CSV file download is recommended for listed above 500 lines. Occasionally there are duplicate lines generated in the Excel output file in files over 500 lines.

Generating a List

Sort the Excel file by age and add 2 columns directly before the “Issues” column and label them “Checker” and “Date” to allow tracking the progress on the file. Next split the excel file into multiple files by specific age.

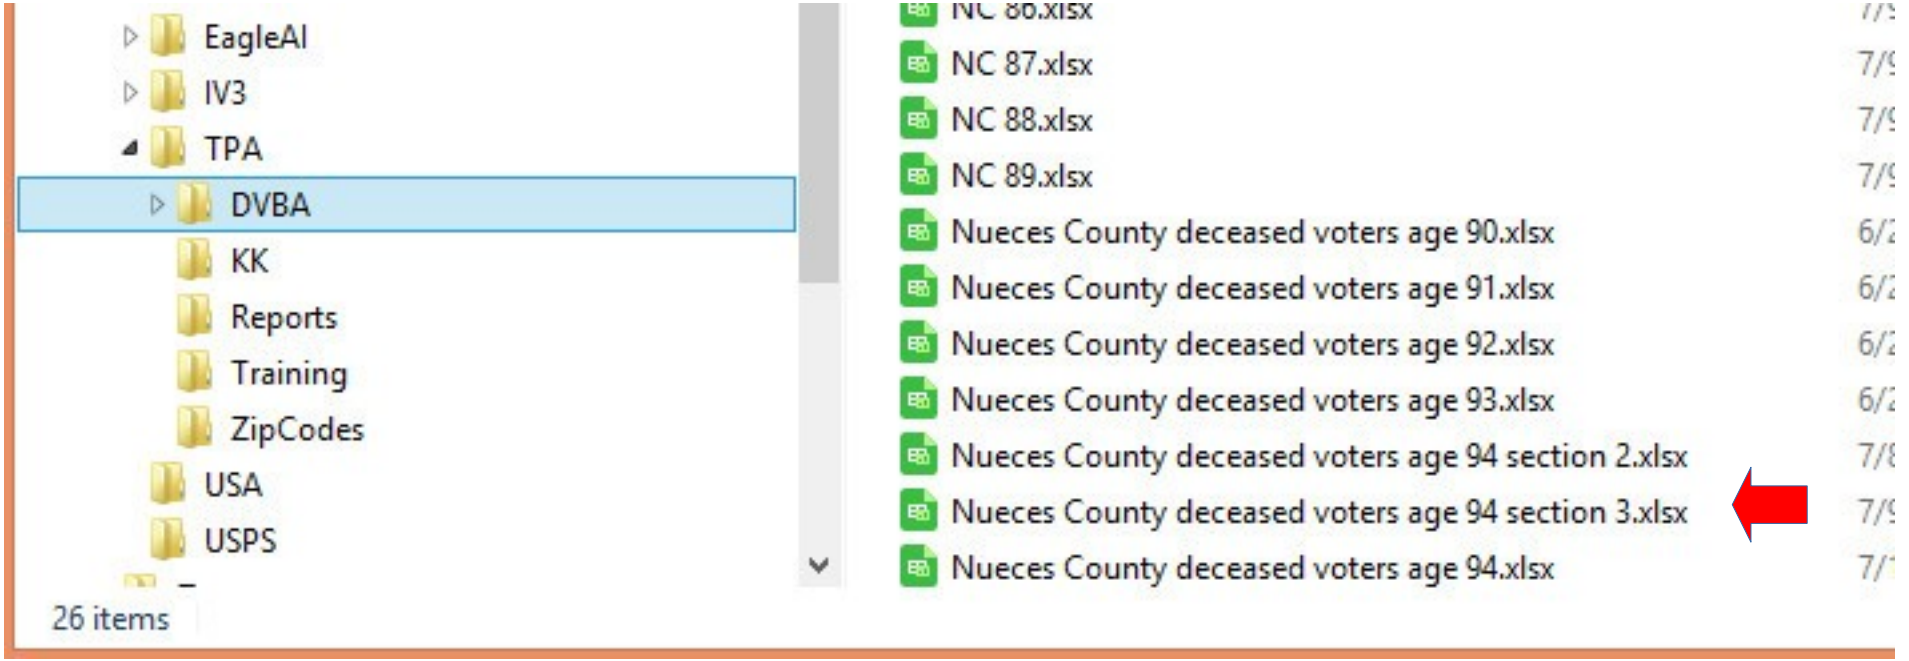
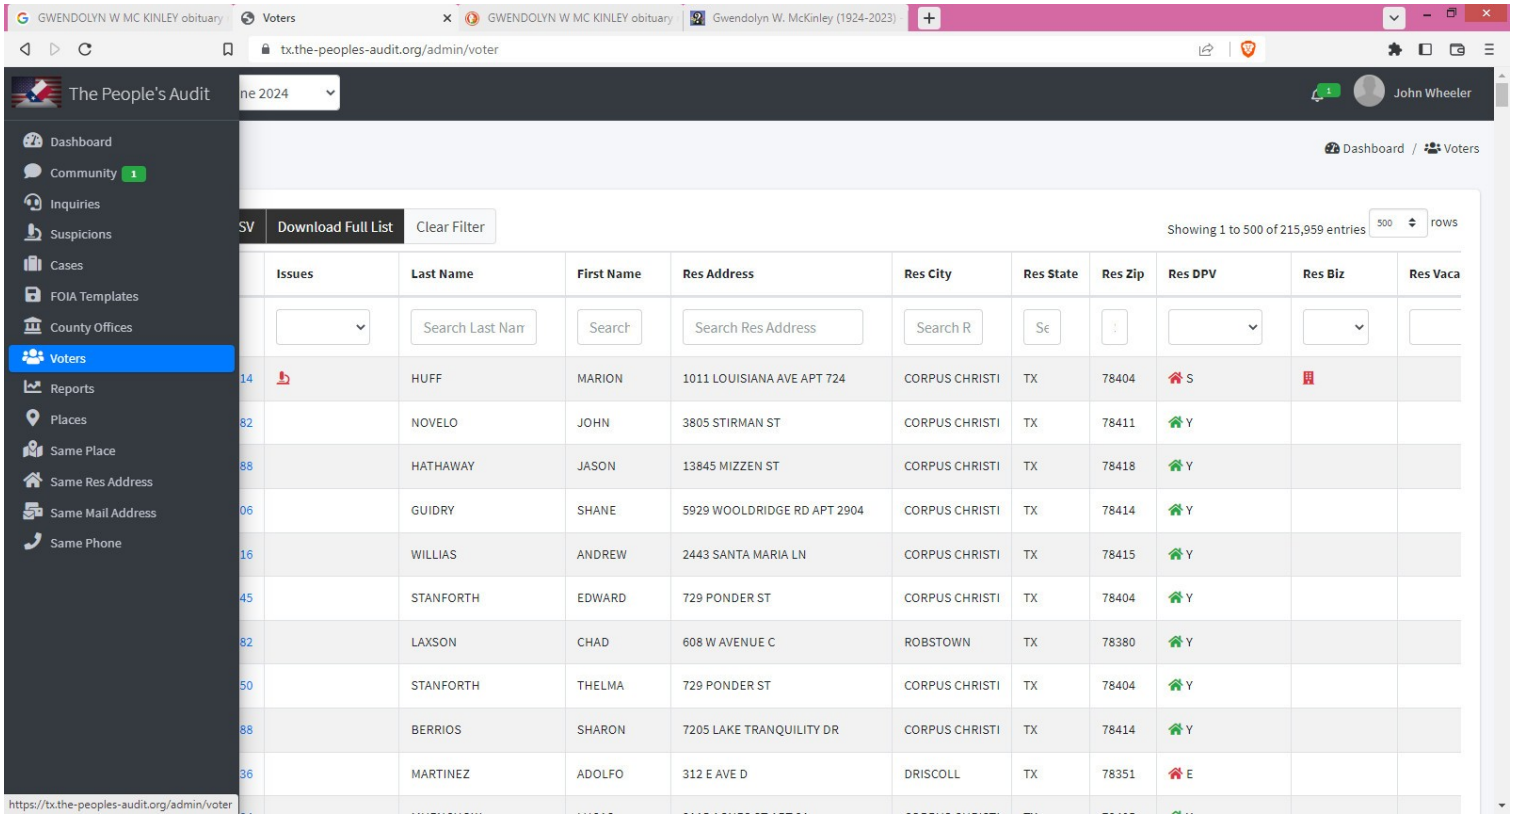
Generating a List

As the age in question gets younger the number of voters at that age will increase. It will quickly come to a point where the file will need to be divided up into sections to be worked on by multiple people. (we currently use 100 voter lines in each file).



Researching



Select the Voters section in TPA

Researching

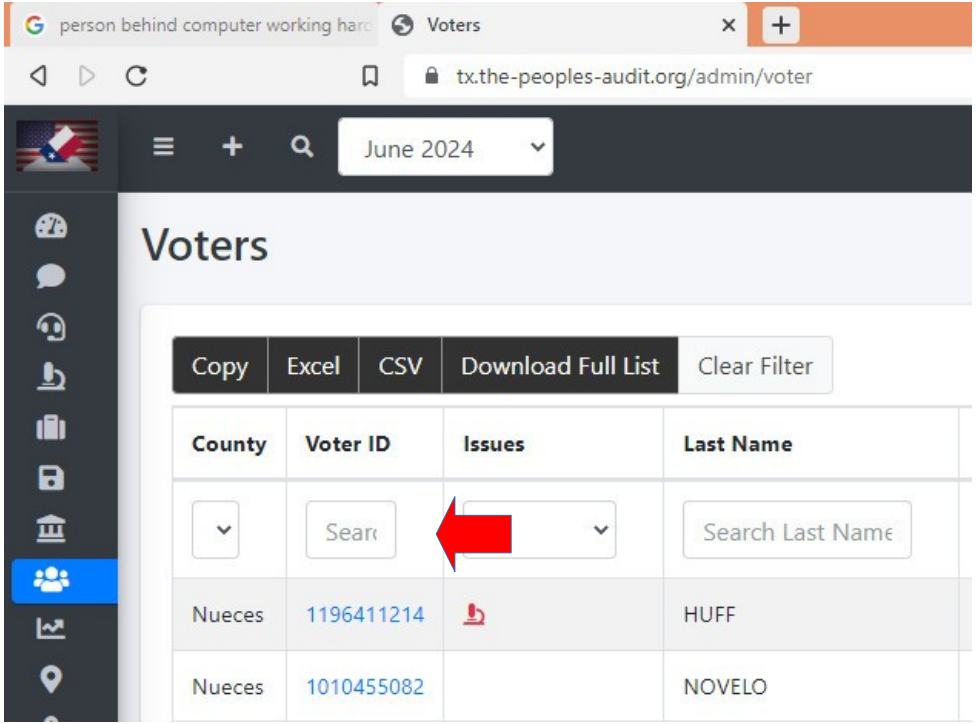
Researching

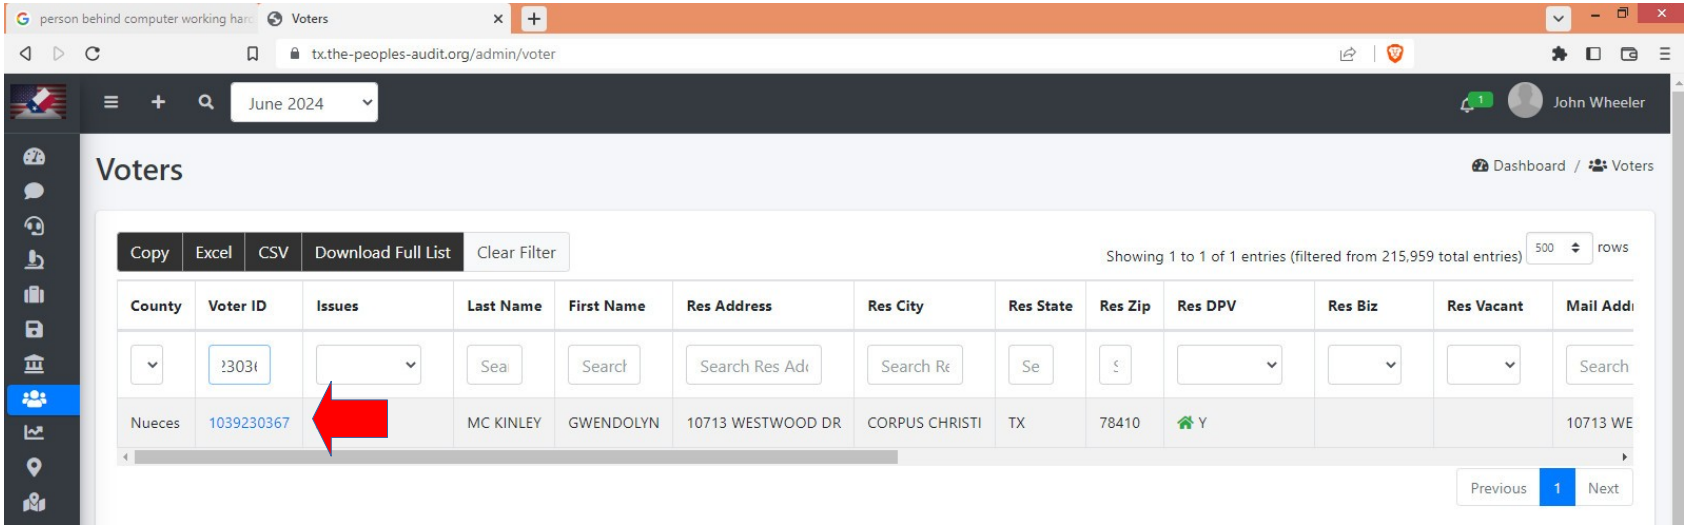
Go back to your TPA Voter page and click in the Voter ID search box and then press “CNTL V” to paste the voter ID number into the box. Using “CNTL C”/”CNTL V” for copy/paste eliminates all typos. You will use this on the voter names as well. Hit Enter to perform the search.

Note: When performing a search or new search ALWAYS click the Clear Filter button first no make sure all fields are cleared before starting.



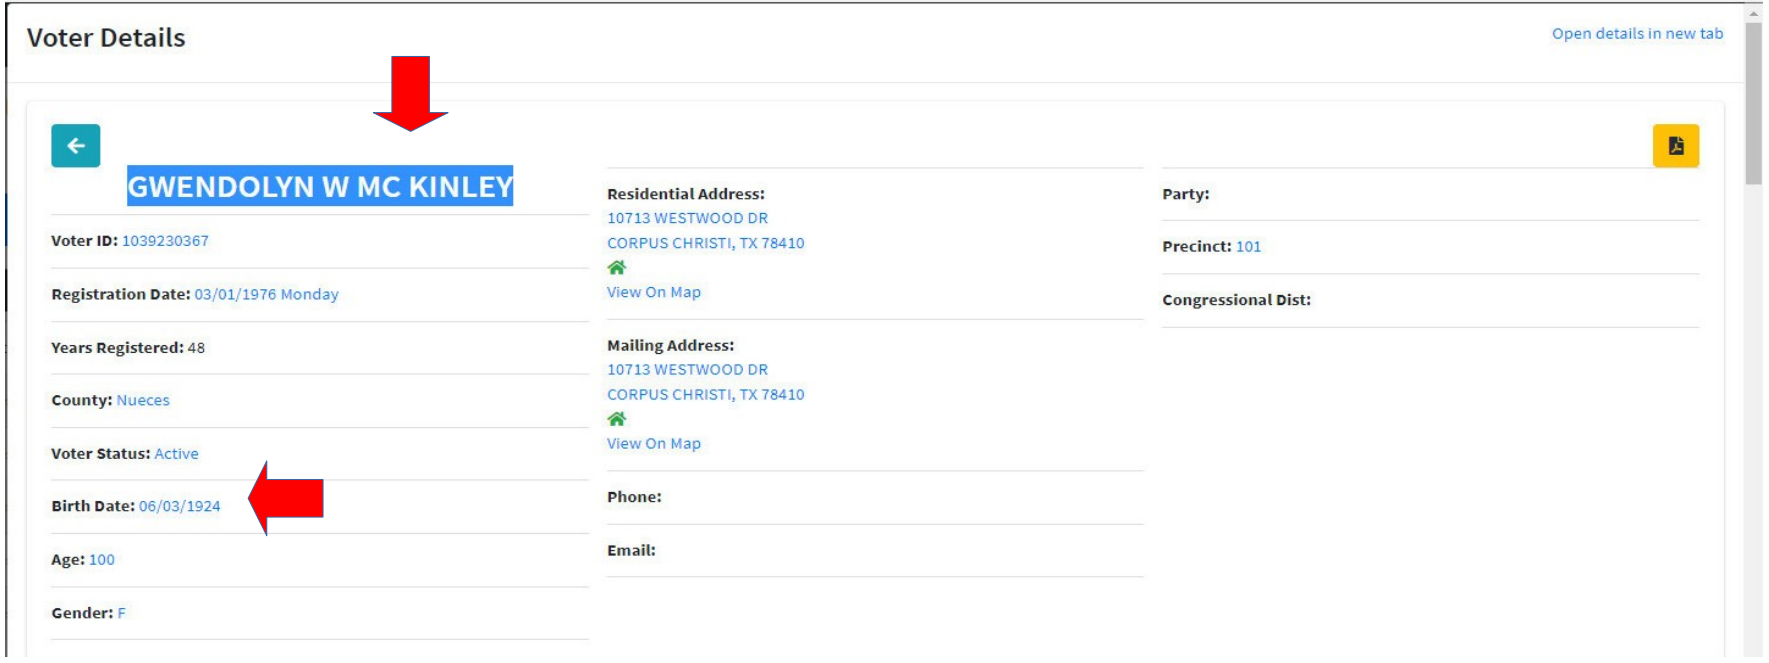
Researching

Once the search has been performed and a voter record is returned click on the voter ID number to enter into the voter file. If no voter is returned in the search that means either of 2 things, the voter ID was entered incorrectly or the voter no longer exists (has been canceled due to death, moved out of state, asked to be removed from the voter roll, etc.). You may see this after an update to the voter rolls comparing to a list made from a previous voter roll update. Just mark in the “issues” column in your excel file as “Voter Not Found” and proceed to the next voter.



Researching

Once the voter file opens note the Date of Birth. This will be checked against the Obituary, Find a Grave, Ancestry (with Subscription), etc. to help assure you find the correct person. Highlight the complete voter name and then use “CNTL C” to copy the voter name to the clipboard. This eliminates typos. Note: Names are not always entered in the Voter Roll correctly as shown below.



Researching

It would be beneficial to scroll down through the voter file and review the different section information available (IE: Registration History, VBM (Vote By Mail) history, and especially Voting History). Also people that are registered at the same address to vote. These names can sometimes be found in the obituary to help prove your case the voter is deceased.

Check the last 2 sections, Cases and Comments, to see if the voter is already assigned to a Case and if any info has already been added to the Comments section about the Voter's status. If someone else has already processed this voter you don't need to duplicate their work.

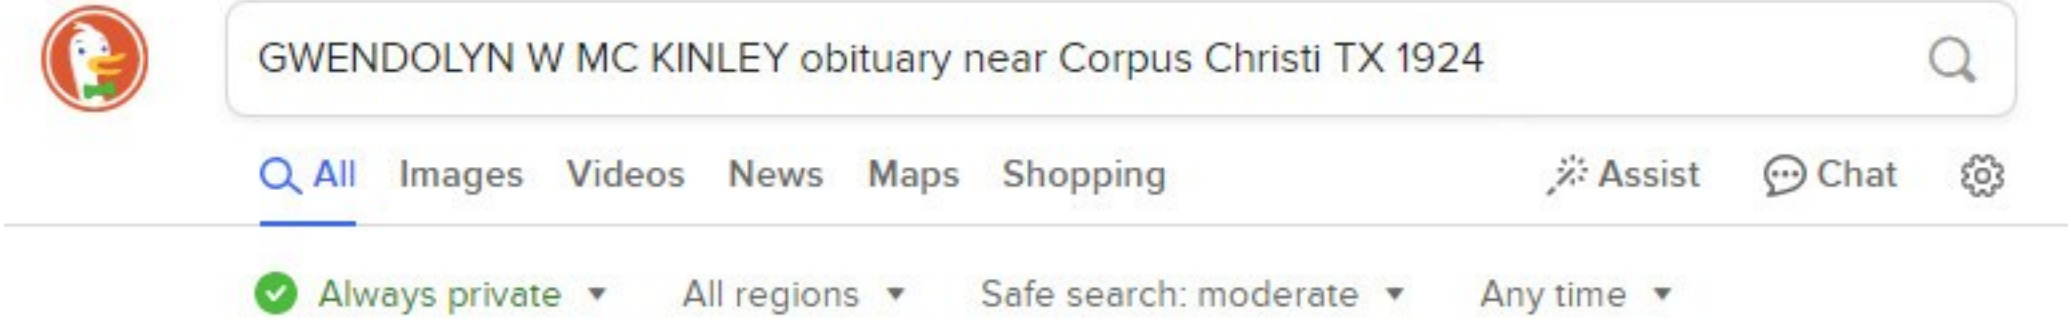
Researching

Now it is time to start performing the searches. We use 3 browser windows, 1 in Google and 2 in Duck Duck Go. Duck Duck Go consistently returns better search results. Google's algorithm for some reason, the more obituaries you search for, the fewer and fewer results are returned even to the point of none being returned at all. Copilot is also being used. (Ancestry is also an excellent source of information but a subscription is needed to access their info).

Other sources are Legacy, Dignity, Echovita, local funeral homes, local news paper online obituaries, etc.

Researching

The first 2 browser windows, Google and Duck Duck Go will search the same criteria. Use “CNTL V” to paste the voter’s name from the clipboard into the search box followed by adding “obituary near Corpus Christi TX” (use the nearest large city to you) and the year of birth (in this case it is 1924 to narrow the returns). Copy this search and paste into the 2nd browser window.

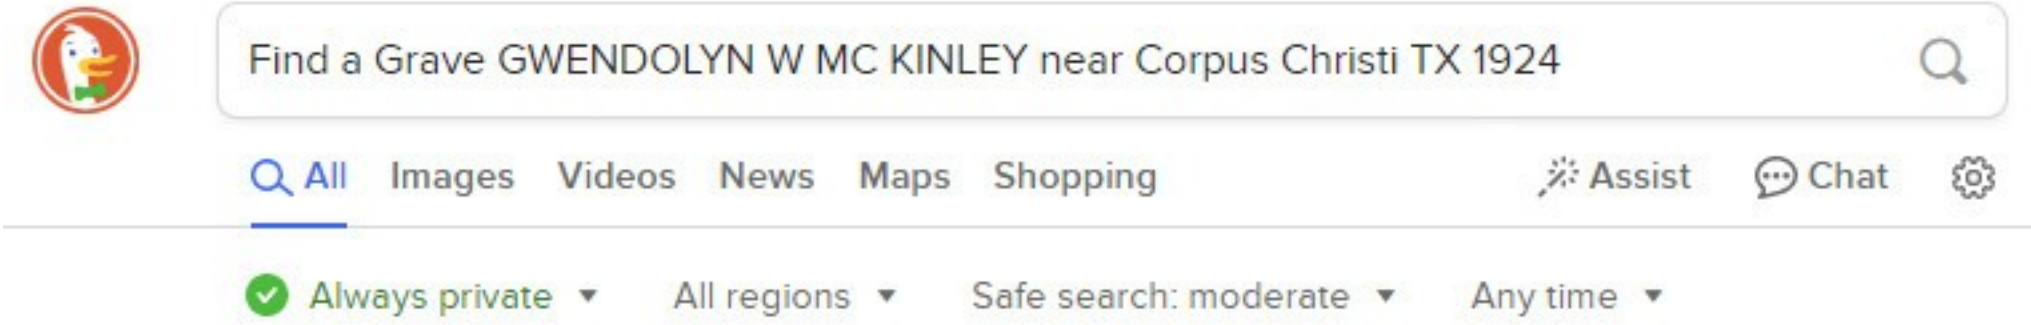


Researching

If you don’t get good results from your initial searches put the voters name in quotes (IE: “JOHN JOE DOE”) and search again. This will try and force the search engine to include the entire name and eliminate most JOHN JOE matches. If still nothing is found use just the Middle Initial (IE: “JOHN J DOE”) and try again. If nothing again, remove the Middle Initial completely and try again.
Watch for names like “MC KINLEY” in the Voter Roll name. They tend to enter many names that way so correct it in your search window to improve your chance of getting better results.

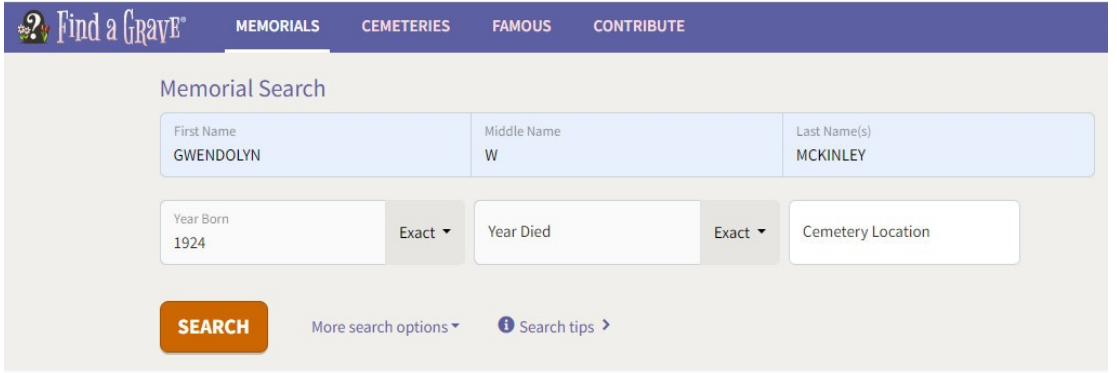
Researching

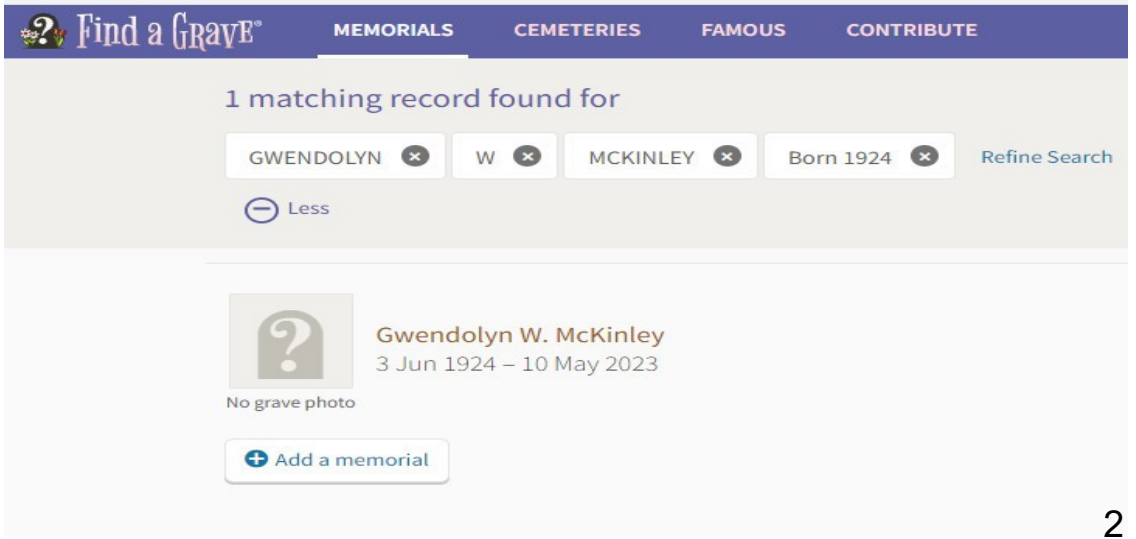
In the 3rd browser window I type “Find a Grave” then I “CNTL V” the voter name into the search box followed by adding “near Corpus Christi TX 1924”.



Researching

If no matching results are returned from the “Find a Grave” search I go directly to the Find a Grave website and drill down: Cemeteries, Region, North America, USA, Texas, Nueces County, Corpus Christi and then select the Memorials tab to enter the search directly.





Researching

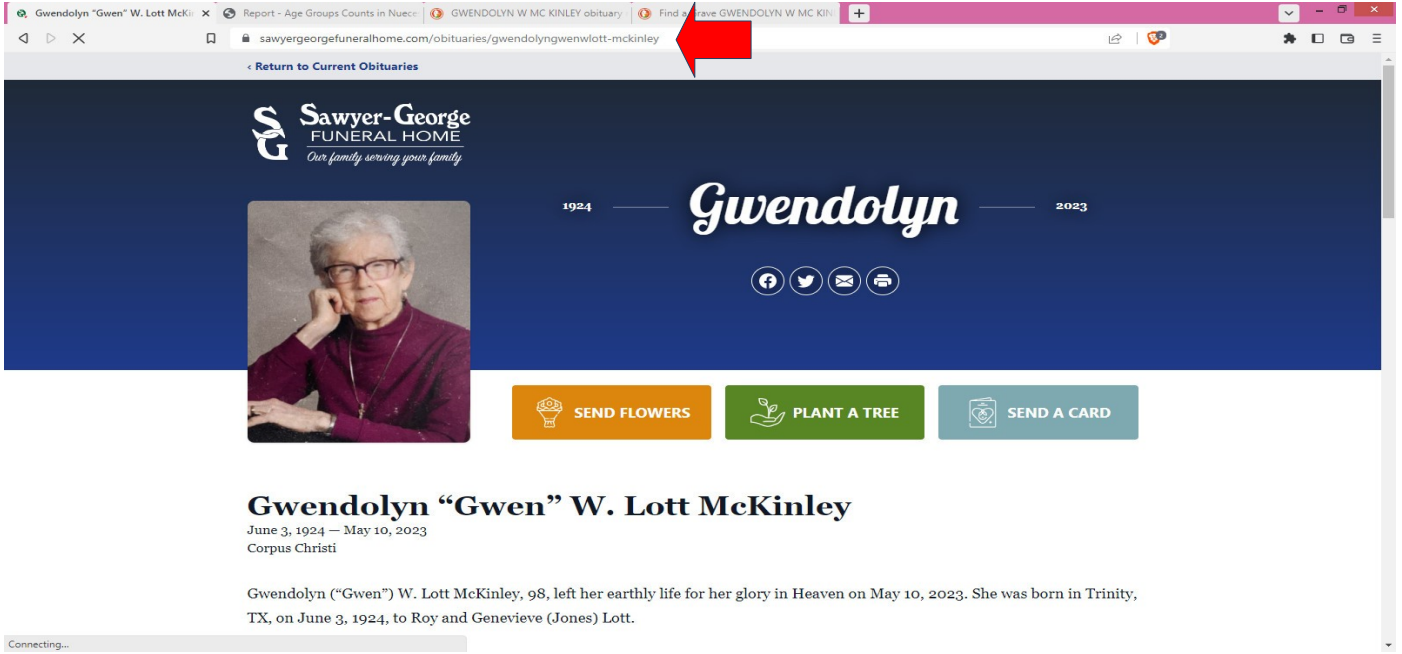
There may be multiple obituaries found for the same person but some contain more info than others. Look for matching name, date of birth, location and family members listed. Names are not always exact (IE: Bobby instead of Robert, etc.) and occasionally the date of birth does not match the Voter Roll DOB exactly but if it is off by a day or week or possibly even a month it could be a typo on the Voter Roll or obituary. (How to document this will be covered later). Look to see if a local location is mentioned also (not in New Jersey) and family members listed in the obituary are possibly listed in the Voter File as living/voting from the same address. Anything to help corroborate this is the voter in question.

Researching

Once it has been determined the obituary / Find a Grave / Ancestry page is the deceased voter a screen capture of the webpage is needed for documentation purposes. There are many ways to do this. I use ALT-PRT SC (print screen) which copies the webpage to the clipboard and then can be pasted into any picture editing program (IE: Paint included with Windows). I save each screen capture using the Voter name – Voter ID# (IE: Gwendolyn W MCKinley – 1039230367.jpg). I save these into a deceased folder (IE: DV100) so I have them for future reference and printing. I do not paste the screen capture directly into the TPA Comments section.

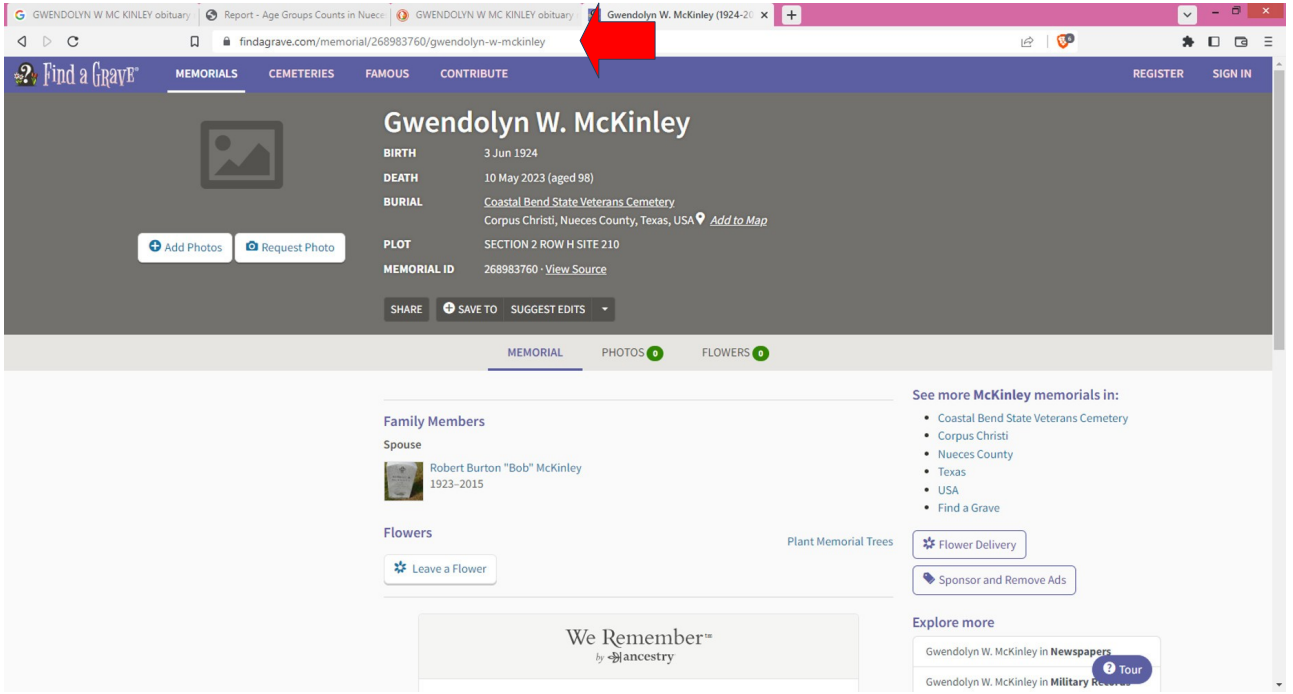
Researching

Make sure the screen capture includes the URL line showing the internet location where the information was found so the election administration worker can quickly verify it's validity.



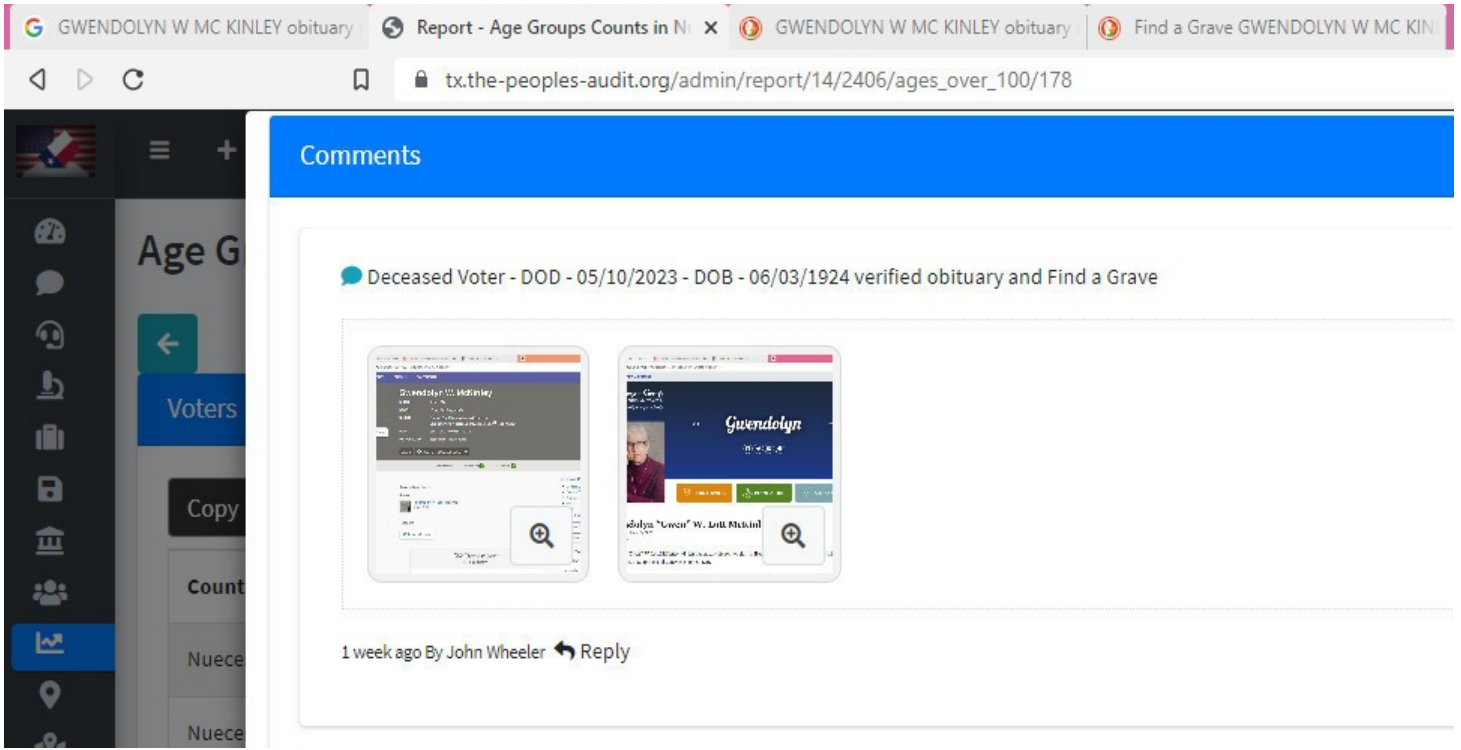
Researching

When saving multiple screen captures for the same voter I used the same naming convention but add (2) after the UVID#. It is good practice to keep the voter name and ID number attached to each screen capture.



Documenting in TPA

Now that the information has been gathered to show the voter is deceased it is time to document this information into the TPA Comments section for that voter.



Documenting in TPA

The format I use contains the basic information needed.

Deceased Voter – DOD – 05/10/2023 – DOB – 06/03/1924 verified obituary (and/or Find a Grave) “Copy-n-Paste URL Address”

If there was any inconsistencies found during the research (IE: DOB off by 1 day) I add “Probable” to the beginning to the line and then document the discrepancy at the end of the line We don’t want the election administration people think we are trying to give them any false or unconfirmed information.

Probable Deceased Voter – DOD – 05/10/2023 – DOB – 06/03/1924 (Voter Roll-Typo?) 06/04/1924 (obituary/Find a Grave) “Copy-n-Paste URL Address” Daughter JAMIE LYNN BAGLIO listed on obituary and as voting from same address.

Documenting in TPA

We use the Drag-n-Drop feature to drag the screen capture **file(s)** and drop them into the Comments section. **DO NOT** hit the ADD button until all the information and screen capture file(s) have been placed in the Comments section.

After the documentation has been added you will go to the CASES section of the voter file right above the Comments section. Here you will assign this voter into a CASE folder or group.

I would recommend your group get together and decide how you want to manage your Deceased Cases ahead of time. We chose age ranges 96-100, 91-95, 86-90, etc. In hindsight these might have been too large of a grouping for our county.

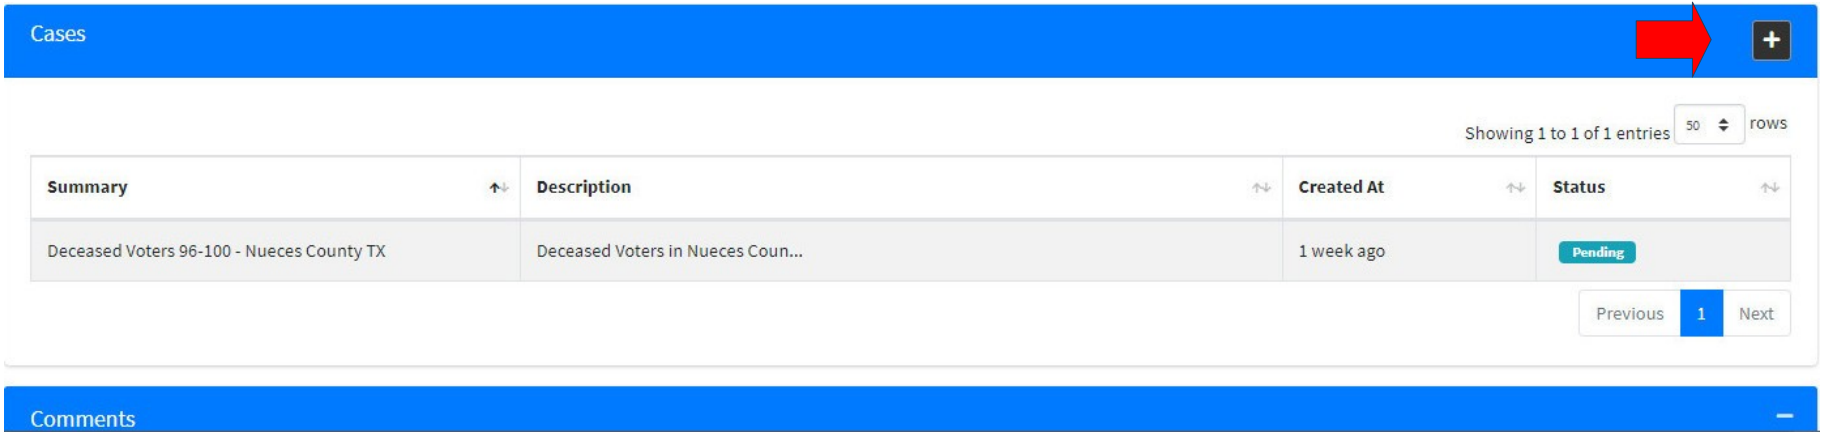
Documenting in TPA

In the Case section click the plus “+” sign in the upper right hand corner to add this voter to a Case folder. A dropdown box will appear and scroll down to you find the Case folder you want to assign the voter to.

YOU ARE DONE WITH THIS VOTER!

Back out of the voter file and go back the Voter screen to begin the next search.



Documenting in TPA

To complete the documentation process go back to the excel file and enter the initials of the checker, the date the voter was last checked and a comment under the Issues column. I use the following:

Deceased Voter – 07/20/2024 - Put in TPA (Date of Death)

Nothing Found (no obituaries, etc)

Voter Not Found - Canceled

VBM Only (Vote By Mail Only)

Dig Deeper or MOVED

A	B	C	D	K	L

Submitting Prepared Materials

I highly recommend contacting and setting up a meeting with your local election administration officials before beginning the documentation process. Each County is different in the way they address issues. We are lucky in Nueces County because the Voter Roll is under the County Tax Assessors Office and he welcomes our help.

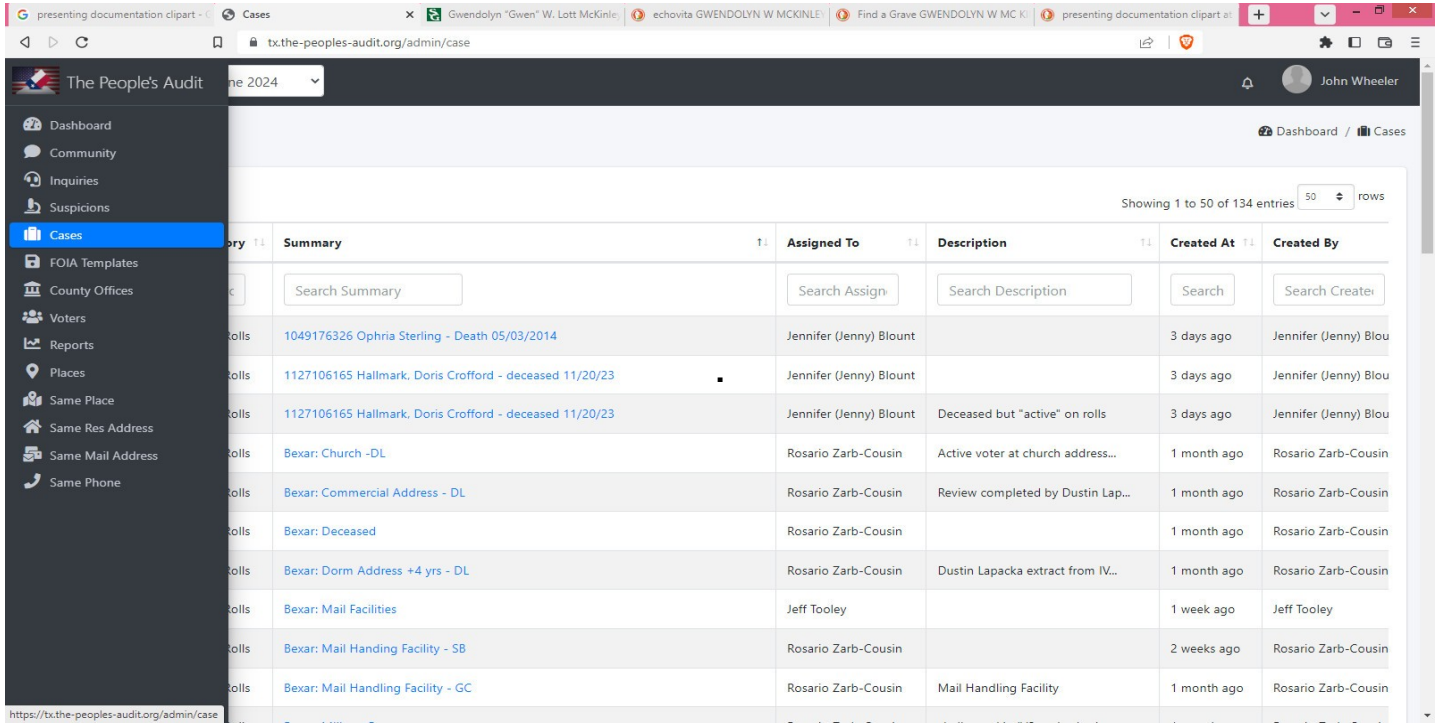
Let the officials know you will be submitting documentation for deceased voters and ask if they have any specific requirements. Tell them about how often you plan on submitting the documentation (say once a month) and find out what format they will accept them (hardcopy, PDF, email, etc.). Take a hardcopy of one of the submissions you plan on sending to them for review.

Submitting Prepared Materials

Maybe limit the first submission to a small group to make sure everything is in order before continuing. I would always include an excel file (hardcopy) of the list of deceased voters that is being submitted so they know that you will be tracking their progress. Don’t overwhelm them with a huge amount all at once or each time. The excel file is created from the CASES folder (or from ELLY). I would wait until that Case folder is complete before preparing the submission.

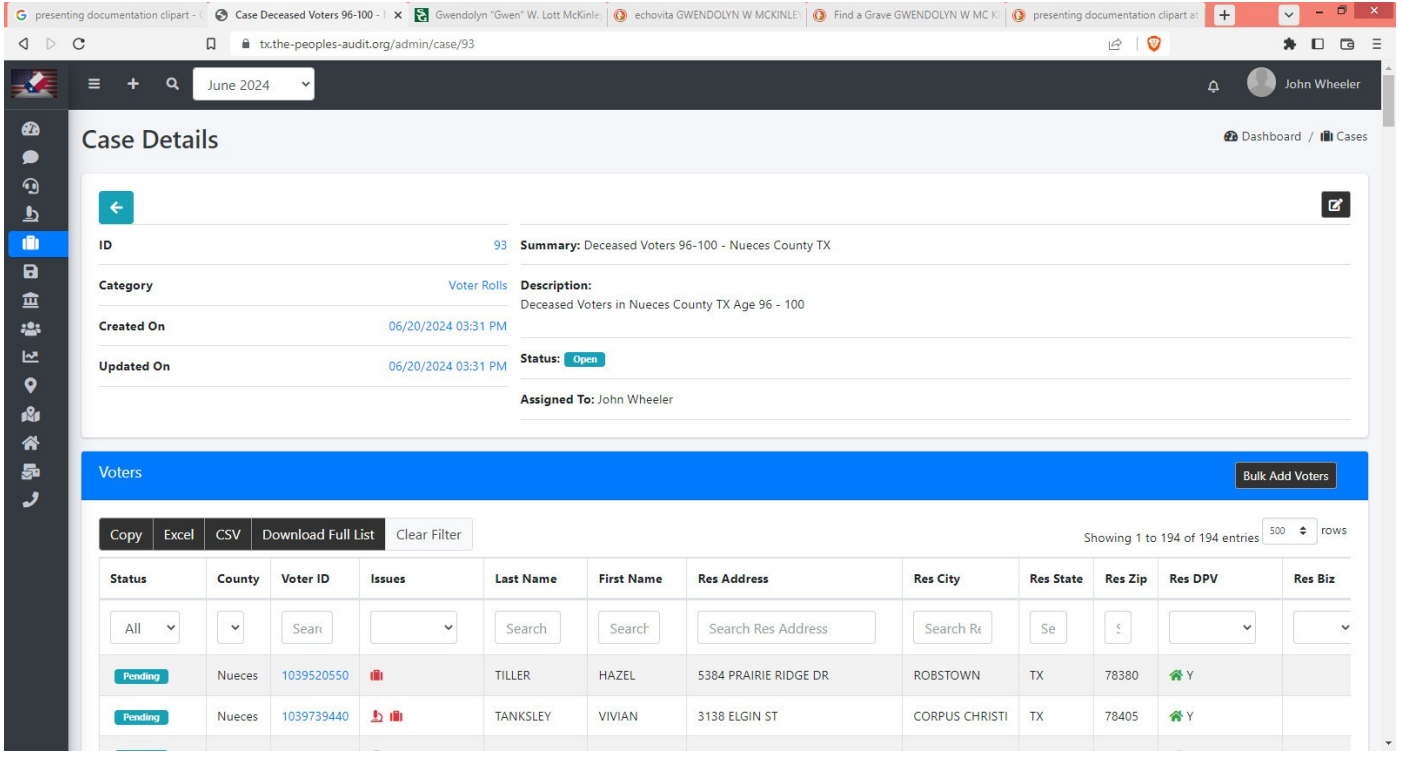
Submitting Prepared Materials

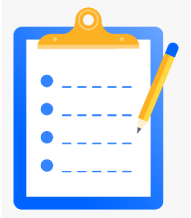
Click on the CASES tab and scroll down to the Case folder you will be working from and open it.



Submitting Prepared Materials

The Case folder will open showing a list of every voter assigned to it. Use whatever option you prefer (Copy, Excel, CSV) to create the excel list of the folder to track your progress.





Tracking Progress

Counties update their Voter Rolls in different manners. Some are connected directly to the SOS database and some are stand alone databases like what we have in Nueces County. The local Voter Registrars office uploads to the SOS around the 15th of each month and they get a download from the SOS around the beginning of the month. Others may see faster changes. Instead of bothering the election administration officials you can check voter status on the Texas SOS website “Am I Registered” and select the option VUID and Date of Birth which you have in your files. If no voter information is returned in the search then the voter has been removed from the Voter Roll. If anything is returned it will say the Voter is still Active or SUSPENSE (Inactive).

Tracking Progress

One thing about TPA is it only shows Active and Inactive voters. It does not show canceled voters so whenever the TPA Voter Roll is updated from the state any voters in Deceased Case folders that have been canceled will be removed from the Case folder. After the last update “June 2024” all but 4 of the Deceased voters in one of our Case folders were removed so we know the local officials are doing their job. If the 4 are still there after the next update we will inquire about them again.

Conclusion

I hope this training material helps. Make your own decisions on what works best for you group. If you have any questions, suggestions or recommendations please let me know.
