ABOUT THE AUTHOR

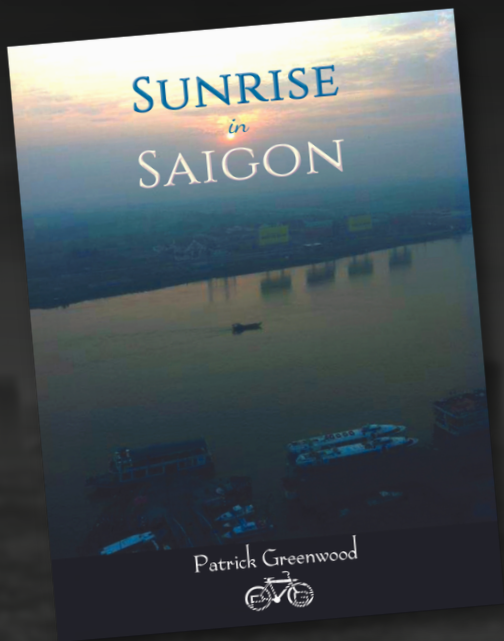

A true believer in listening to one's passion, Patrick Greenwood began writing in early 2020 based on several trips he made while cycling in various countries. In this novel, Sunrise in Saigon, Patrick draws upon several non-fictional events in Vietnam, including the war with the US, the last days of Saigon falling, and the chaos at the US embassy. Having remembered these events as a young man, Patrick grew up wanting to travel to Vietnam someday and visit these places for himself.

SUNRISE IN SAIGON

With echoes of Tom Clancy and Jack Higgins, "Sunrise in Saigon" is Patrick Greenwood's first book in a new series about cybersecurity, passion, and international espionage.

Intrigued by the country of Vietnam since 11, Jack Kendall long remembered the fall of Saigon in 1975 and its painful aftermath. Jack learns from eyewitnesses about the long shadow of the Vietnam war, its atrocities, and its aftermath. He knows a couple who met under the most extreme circumstances, one on the helicopters leaving Vietnam, the other stranded behind. The two swore to find each other again and did, decades later.

That story resonates with Jack as he finished serving honorably in the United States Marine Corps and embarked on a career in cybersecurity technology. Even with this career success, his life is not fulfilled. His health, both

physical and emotional, deteriorates. He turns to cycle and returns to his fascination with Vietnam. His research leads him not only to that country but to a captivating woman. While in Vietnam, he sees the beauty of the people and the land and its poverty, graft, and human trafficking. It is through his relationship with the country and his newfound love that his life is transformed.
