

# LUMPKIN COUNTY 4H & GMMG 2024 PLANT SALE

February 12<sup>th</sup> – March 29<sup>th</sup>

<https://gammg.org/shop>

## \*\*\*FERNS\*\*\*

### Japanese Painted Fern 'Athyrium Niponicum 'Pictum'

**1-Gallon, \$11.00**

Plant size: 12 - 18 inches tall, 18 - 24 inches Wide.

Part sun-full shade, deciduous

Evokes the shady tranquility of its native Oriental gardens. One of the most popular cultivated ferns, due to the beautiful combination of green and purple shades on its fronds that appear to be "painted" with silver. Easy to grow in damp, humusy soil, not too fertile. Deer tends to avoid it.

### Japanese Holly Fern 'Cyrtomium Falcatum 'Rochfordianum'

**1- Gallon, \$11.00**

Height size: 18 to 24 in. tall, Wide 24 to 36 in.

Plant: Partial shade to partial sun

Popular for its hardiness and handsome foliage, this fern makes an excellent groundcover or border edging in shaded locations. The stiff, glossy, dark green fronds of holly-like leaflets with coarsely fringed margins add excellent texture to container plantings. Evergreen in mild winter regions.

## Autumn Fern 'Dryopteris Erythrosora'

**1-Gallon, \$11.00**

Height size: 18 to 24 in. tall, 24 to 36 in. wide.

Plant Partial shade to partial sun.

*Dryopteris Erythrosora* is known as the "Autumn Fern"; this beauty is at its best in the spring, "autumn" describing its colors as foliage color changes with season. New growth emerges metallic coppery green, turns green in summer and bronzy in fall. Scarlet spores adorn the undersides of the fronds.

Grows best in partial to full shade and moist, slightly acidic soil.

## \*\*\*FRUITS\*\*\*

## Apple Tree 'Arkansas Black'

**5-Gallon, \$30.00**

Height: 4-5 feet wide and 15-20 feet

Plant: Full sun, Needs full sun and well-drained soil.

Blooms in: Spring

The Arkansas Black Apple Tree flavor is described as wine and honey, with hints of almonds and a mild vanilla finish, making them amazing dessert apples! A mid-spring blooming tree and late-maturing apple, each rounded, medium-sized apple is such a deep red with a waxy skin. Appearing almost black, especially when stored, the firm skin shines purple red in the sunlight and on the tree into the fall, making it a favorite of wildlife. The crisp, whitish-yellow flesh is superb. With a sweet-tart flavor and a firm, yet juicy. It develops its best flavor after it has been stored chilled for a couple of months where it will darken and ripen where it sweetens.

## Apple Tree 'Jona Gold'

### 5-Gallon \$30.00

Height and Width: Grows 4-5 feet wide and 15-20 feet

Plant: Full sun, Needs full sun and well-drained soil.

Blooms in: Spring

Jonagold was bred in the 1940s as a cross between two classics, the Golden Delicious and Jonathan, and Jonagold has the best from both! It is a large golden-yellow Apple with large splashes of red on its thin skin. Excellent for fresh eating or sauces, salads, pies, cider, preserves and canning, is described as both sweet and sharp, and aromatically flavored! It does not store well but you can harvest over a long period of time from the tree. Pollinators adore these blooms, and the spring display is breath-taking!

## Apple Tree 'Robinson Crabapple'

### 5-Gallon, \$30.00

Height and Width: Grows 4-5 feet wide and 15-20 feet tall

Plant: Full sun, Needs full sun and well-drained soil.

Blooms in: Spring lovely white flowers

Self-pollinating, profusion of lovely white flowers followed by cherry like fruit Widely grown as an ornamental tree, has made its way into wildlife plantings for a good reason. This tree produces a 1"-1 1/2" sweet edible crabapple that holds tight to the tree that drops free as colder weather sets in, typically October & November for me in the Northeast. Attractive to deer? Yes! This tree produces consistent annual crops of crabapples. Disease resistant

## Thornless Blackberry "Ouachita" Deciduous Fruit Bush

### 1-Gallon, \$9.00

Height: 4 - 8 feet tall and 2 to 3 feet wide  
Plant: Full Sun or Mostly Sun

Blooms in: July - September, self-pollinating floricanes. Color: Black, Blue

These large, juicy-sweet, blue-black berries grow abundantly for five of your summer's sweetest weeks. Enjoy the firm, nutritious berries as a snack or instant dessert; and they're superb in a pie. The thornless blackberry plants are upright, orderly, and easy to maintain. Growing 4-8, the plants form a sturdy hedge with the canes supporting pounds of fruit without a trellis. Plant blackberries 100 feet away from red raspberries. The fruit will ripen from red to black, but do not pick them as soon as they turn black, wait 3-4 days and pick when the color has a dull appearance.

## Thornless Blackberry "Triple Crown" Deciduous Fruit Bush

### 1-Gallon, \$9.00

Height: 5 to 8 feet tall and 4 to 8 feet wide  
Plant: Full sun to Mostly Sun

Blooms in: Summer thru Fall, self-pollinating  
Color: Black, Red floricanes

Triple Crown Blackberry is a superb thornless Blackberry variety that produces up to 30 pounds of fruit once fully mature! Extend your harvest the easy way with this highly productive, self-pollinating, pest and disease-resistant variety! The bee-friendly white spring blooms and lush foliage create quite the spectacle in the spring and summer, followed by the juicy gleaming jewels in late summer! Bird-friendly hedges and property division, Blackberries are great backdrops to veggie and herb gardens and look great as flowering/fruited anchors to garden beds and borders! Great for preserves, pies, fresh eating and desserts, these big juicy berries! Delicious fruits contain a long list of desirable nutrients such as vitamins, minerals, antioxidants, and dietary fibers.

## Blueberry "Powder Blue" Deciduous Fruit Bush

### 1-Gallon, \$9.00

Height: 6 - 10 feet tall and 6-10 feet wide

Plant Full Sun or Mostly Sun, light shade.

Blooms in spring- early summer, berries are light blue.

The Powder Blue Blueberry (*Vaccinium ashei* 'Powder Blue') is a deciduous shrub that produces delicious, healthy fruit! Plant several for an eye-catching flowering ornamental edible hedge along your home's foundation, or even just a couple of varieties to partake in its amazing healthy, antioxidant-rich fruit!

Powder Blue produces delicate white flowers in late spring-early summer, and this is especially helpful, not just for its beauty but because a late bloom helps protect your Blueberry from late freezes. Ripening mid to late season, the berries are large and light blue! Beneficial Pollinators and birds are attracted to the berries.

## Blueberry - Tifblue Deciduous Fruit Bush

### 1-Gallon, \$9.00

Height: 6-8 feet tall and 6-8 feet wide

Plant Full Sun or Mostly Sun, light shade

Blooms in Early Spring

A 1955 University of Georgia release, Tifblue is one of the oldest blueberry cultivars still being planted, and has long been considered one of the best, most widely adapted varieties on the U.S. Market. It has a tall, upright growth habit, good freeze resistance, and is one of the most ornamental rabbiteye varieties due to its brilliant orange-red fall leaf color. Tifblue ripens in mid-late season, and produces abundant yields of light blue, medium-large size fruit, with excellent flavor. Tifblue berries also store and ship very well-which is yet another reason it has been a top selection for both home and commercial growers.

Make sure to plant two different cultivars/ varieties for each season. Beneficial Pollinators and birds are attracted to the berries.

## Blueberry "Titan" Deciduous Fruit Bush

### 1-Gallon, \$9.00

Height: 6-8 feet tall and 6-8 feet wide

Plant Full Sun or Mostly Sun, light shade

Blooms in mid-late season, berries are light blue.

The largest fruit ever seen at the University of Georgia Rabbiteye breeding program! Firm, light blue berries are much better flavored than older varieties. Shelf life after harvest is outstanding. Ripens mid-late season, resistant to stem canker. The "latest and greatest" from University of Georgia! Titan is not self-fertile so it should be planted with another rabbiteye. Pollinate with Powderblue or Ochlockonee. Bareroot. Zones 7–9. It is also known for its very firm, uniformly round berries. Beneficial Pollinators and birds are attracted to the berries.

## Elderberry 'Wyldeewood'

### 3-Gallon, \$21.00

Height: 5-6 feet tall and 5-6 feet wide Plant Full Sun

Blooms Small, sweet, dark purple fruit.

'Wyldeewood' is a new American Elderberry plant with high yields and superior fruit production from its immense flower heads that often reach up to 12" across. 'Wyldeewood' needs to be cross-pollinated and we recommend 'Ranch.' That is why we are also offering the American Elderberry 'Ranch,' an excellent elderberry with a short stature and it only grows 5-6' tall so the berries are easily harvested. It's also one of the most forgiving if you have non-fertile soil and it handles a zone 3 winter easily. Elderberry is well known as an ingredient in wines and jams but now the medicinal world has reported the use of elderberry helps mitigate colds and flu viruses because of its antiviral properties. It is also a great source of vitamin C and has been used for antibacterial properties as well.

## Fig 'Brown Turkey'

### **1-Gallon, \$9.00**

Height: 15 – 30 feet tall and 15-30 feet wide, prune to control size

Plant Full Sun Harvest July - October

Enjoy luscious, juicy figs right out of your own backyard. This hardy variety can be grown in the landscape or containers. It produces large, brown-skinned, pink-fleshed fruits with a sweet, rich flavor. Produces a small crop in early summer and a second, larger crop in late summer. Grows well in small spaces, self-fertile plants. Plant in full sun. Zones 7-9.

## Peach Tree 'Loring Peach'

### **5-Gallon, \$30.00**

Height: 15-25 feet tall and 15-20 feet wide.

Plant: Full Sun

Blooms in Early Spring, Zones 5-8

Fruit that melts in your mouth! The delicious, sunset-hued fuzzy gems of Loring Peach Tree are as delightful to look at as they are to smell and taste! With a strong, true peach flavor and texture, these juicy delights are perfect for warm climate fruit tree growers! Blooming in spring after the threat of a late frost, you will be delighted by frilly clusters of gorgeous pink blooms! As mid-July approaches, you will see your tiny fruit mature into large, yellow peaches, complete with an enchanting, scarlet blush! Pollinators and early arriving hummingbirds will love the feast.

## Pear Tree 'Kieffer'

### **5-Gallon, \$30.00**

Height 12-15 feet tall Spacing 15-20 feet apart

Blooms: Early spring, fragrant white flowers

Early season ripening date of mid-to-late October - November

The Kieffer Pear Tree fruit-bearing tree. Producing large, golden-yellow skinned fruit, with an occasional crimson blush. The white flesh has a crisp, coarse texture and is deliciously eaten right off the tree. Juicy and sweet, is especially prized for its uses in a variety of culinary dishes, including preserves and sauces. Spring brings fragrant flowers in delicate tiny white blossoms, an elegant exhibition of floral perfection for your landscape. It is an easy to grow fruit tree that will ripen its fruit from October to November. It will give you a large crop of pears that can be stored for a long time, so that you have pears from your own garden right into the winter months. Bees and butterflies will love it!

## Pear Tree 'Orient'

### **5-Gallon, \$30.00**

Height 10-20 feet tall Spacing 10-15 feet apart

Blooms: Early spring, fragrant white flowers Early season ripening date of mid-to-late August.

The Orient Pear Tree is a large, round pear with the flesh and flavor of a European pear combined with the disease resistance of the Chinese sand pear. This heirloom variety has fruits that ripen over several weeks beginning in the middle of August, so none of the harvest will be wasted. The fruit has smooth flesh with a mild, sweet flavor and abundant juice. It is perfect for eating fresh, sliced in salads, or canned. Strong resistance to fire blight disease, Bees and butterflies will love it! A good choice for mild winter areas.

Smooth textured white flesh is sweet, firm, and juicy. Heavy producer. Medium resistance to fire blight. Does better with a pollinator such as Bartlett, Kieffer, or Moonglow.

## Plum Tree 'Au Rosa'

**5-Gallon, \$30.00**

Height 12-15 feet tall Spacing 15-20 feet  
apart Blooms: Early spring, fragrant white  
flowers

The Au Rosa Plum fruit is medium-sized, round in shape, and juicy with dark red skin and yellow flesh that melts like butter in your mouth. Fresh fruit ripens during summer from mid-June to early July. With high disease resistance and little issues with pests. The green leaves will cover the limbs from spring through fall until falling down to the ground in winter. The University of Auburn developed this tree as an improved version of the Santa Rose. In early spring, fragrant white flowers will explode on the tree's branches to invite pollinators such as bees and butterflies into your landscape.

## Thornless Raspberry "Caroline" Deciduous Fruit

**1-Gallon, \$9.00**

Height: 4 - 6 feet tall and 3 to 4 feet wide  
Plant: Full Sun or Mostly Sun  
Blooms in: June- July, self-pollinating floricanes, berries are red

Caroline is the best-tasting red raspberry. The large berries have a very rich, sweet, full-bodied flavor. The berries are excellent for fresh eating, canning, freezing and jellies, desserts. A fall-bearing type, it ripens in late summer and produces berries until frost. Caroline is a highly productive self-pollinating variety that starts bearing fruit 2 years from the date of planting. It's tolerant to root rot and has a high resistance to gray mold. Very adaptable and well-suited for the South

**Note: Do not plant red, gold or purple raspberries within 75 - 100 feet of Black raspberries. Black raspberries may be more susceptible to viral diseases carried by aphids to and from nearby raspberry plants. After planting, be sure to prune the bare-root canes back to about 2 inches above the ground. (This does not apply to potted raspberry plants.) Do not skip this step! It is a crucial factor in encouraging the roots to send up new growth during the growing season. It is in the nature of raspberry plants to send up new growth as suckers or basal shoots from below the ground. This means the canes that you plant may not be where you find signs of life or new growth. Beneficial Pollinators.**

### \*\*\*PERENNIALS\*\*\*

#### Achillea Yarrow 'New Vintage™ Series 'Red' PP25618'

**1-Gallon, \$9.00**

Height: 12"-15" Width: 10"-15" Plant in full sun, drought tolerant.

Compact heavy-flowering perennial, cut back after first bloom to keep compact growth habit.

Blooms summer through fall Fragrant red flower clusters Deer and rabbit resistant, heat and drought tolerant, but intolerant of heavy soil. Needs well drained soil.

#### Achillea Yarrow 'New Vintage™ Series 'Violet' PP25750'

**1-Gallon, \$9.00**

Perennial Height: 12"-14" Width 10"-12", Hardiness: zones 4-8

Plant in full sun in well-drained soil. Blooms in late spring through summer. Attracts pollinators and hummingbirds. Heat and drought tolerant, Avoid heavy wet soil.

#### Allium 'Serendipity' Proven Winner

**1-Gallon, \$15.00**

Height: 20" Width 15" Plant in full sun to part shade.

Blooms in late summer, mid to late summer with bright globe-shaped rosy-purple clusters of flowers atop green onion-scented foliage. Deer and rabbit resistant.

## Aspidistra Elatior 'Cast Iron Plant'

### 1-Gallon, \$13.00

Height: 12-24 inches Plant: Full shade  
Blooms: Evergreen spring to early summer  
Color: coarse dark green lance-like leaves

Cast Iron plant could not be more aptly named. If you are looking for low maintenance greenery that survives in low light and humidity, temperature changes and irregular watering, this plant is for you. It has coarse dark green lance-like leaves and is an appropriate choice for those dark shady locations as a border ground cover or potted plant. Deer resistant, drought tolerant.

## Coreopsis Hybrida 'Uptick Cream'

### 1-Gallon, \$11.00

Height 12-14 Tall and 12"-14" inches wide,  
Plant Full Sun

Blooms: late spring through summer

Large creamy white flowers reveal a buttery yellow aura that peeks around a golden-orange button center. Tidy lush green foliage completes the package. Native to SE United States. This perennial is a repeat bloomer, requires low maintenance, is disease resistant and over-winters well. Bright and cheery selections will attract butterflies and birds to your garden. Coreopsis are great cut flowers that last up to 2 weeks after being harvested.

## Coreopsis x 'Jethro Tull' PP18789 Tickseed

**1-Gallon, \$9.00**

Height: 12"-18" Width: 18"-24" Hardiness: zones 4-9

Plant in full sun to part shade. Produces golden fluted-petaled flowers.

Drought tolerant, deer and rabbit resistant. Attracts butterflies.

## Dicentra Spectabilis Bleeding Heart (old-fashioned)

**1-Gallon, \$11.00**

Height: 30" Tall and width- 30", Partial to full shade Blooms season is from May-June.

Dicentra spectabilis (old fashioned bleeding heart) is a dainty welcome to any wooden border. Its long arching sprays drip with puffy pink heart shaped flowers. Potentially it can re-flourish mid-summer if it has sufficient moisture & shade. Little or no watering if in well-drained soil, Attracts bees, Deer resistant.

## Digitalis Purpurea 'Foxy' Foxglove

**1-Gallon, \$9.00**

Height: 24"-36" Tall and 12"-18 wide" Blooms late spring to mid-summer

The foxglove is plant essential to English cottage gardens as well as woodland borders. It produces spikes of thimble shaped flowers with spotted throats. This variety blooms in a profusion of colors- white, cream, pink, lavender & rose. It is a biennial plant but will self-sow if seed heads are allowed to mature. It is a good filler between spring bulbs & summer perennials. It should be noted that all plant parts are toxic to humans & mammals & could be fatal if ingested. Light preference- light to partial shade (but will tolerate more sun if soil kept moist) Pollinators- bees, butterflies, moths & hummingbirds. Deer resistant.

## Echinacea 'Cheyenne Spirit' - Coneflower

### 1-Gallon, \$9.00

Height: 12-15" tall x15-18"

wide Blooms: Spring to early summer Plant: Full Sun

Color: rosy-red-to-pink cheerful blossoms with bright yellow eyes

Full sun, part shade, tolerant to drought, heat and humidity, deer resistant, deciduous, butterfly attractant This flower is a showstopper with narrow petals in vivid shades of orange, red, rosy-red, yellow, purple and cream surrounding a large brown cone center. It blooms on sturdy upright branches from midsummer to early fall. This perennial requires little water, low maintenance and is a perfect plant for perennial borders, pots, and cottage gardens.

## Echinacea 'Pow Wow White' Coneflower

### 1-Gallon, \$9.00

Height: 24" tall x 36" wide

Plant: Full Sun Blooms:

Blooms: Spring to early summer

Echinacea 'PowWow-White' is a free-flowering, early- and long-blooming, showy perennial offering early summer to late summer interest, with sporadic bloom until frost. Its flowering is abundant, rapid, and uniform, producing luminous, 4-inch pure white flowers with extra wide, overlapping, downward-arching rays surrounding a golden yellow cone. Borne on short, sturdy, exceptionally wide, well-branched stems, Echinacea 'Pow Wow White's flowers are firmly held upright, without staking, making excellent, long-lasting cut flowers. In the garden, they attract butterflies and bees; and the dried end-of-season seed heads provide food for songbirds and are attractive in winter as well, especially when dusted in freshly fallen snow.

## Echinacea 'Pow Wow Wild Berry' Coneflower

**1-Gallon, \$9.00**

Height: 24" tall x 36" wide,

Plant: Full Sun

Blooms: Bright Pink blooms spring to early summer

Echinacea PowWow® Wild Berry produces multiple blooms that last no matter what kind of soil it grows in: acidic, clay, loamy, sandy, and even dry soil. In fact, wild berry coneflowers have a strong drought tolerance. The bright flower heads of this coneflower species will bring butterflies and other pollinators to the garden, whether it's planted in woodland gardens, borders, or planters. In the fall, be sure to leave the seed heads of the pow wow coneflower alone, as they'll bring birds flocking for a much-needed feast. With so much to love about this perennial, it's no wonder that the PowWow Wild Berry Coneflower won the All-America Selection Award in 2010.

## Gaura Belleza™ Series 'Dark Pink' PPAF Butterfly Gaura

**1-Gallon, \$11.00**

Height: 30 inches tall x 18inches wide

Plant: Full Sun

Blooms: Spring to early summer

Guara Belleza 'Dark pink' is a native North American perennial. Its bright pink blossoms on wiry stems with dark burgundy foliage provide interesting color contrasts for the garden. Its deep tap root makes the plant drought tolerant. Commonly called Wandflower, the long stems frequently bob under the weight of wind or bees. Its petite blooms are available from early summer to mid-autumn. They are a welcome addition to gardens & bouquets. Prefers moist well drained average to poor Boil Attracts bees, butterflies & hummingbirds, Deer & rabbit resistant.

## Heuchera Dolce® 'Wildberry' PPAF Coral Bells PW®

### 1-Gallon, \$15.00

Height 10-15 Inches tall spreads and 18 inches width.

Plant in Shade to Partial Shade

Blooms: Early to mid-summer and Fall

If you are looking for a rich pop of purple in your garden, this plant is for you! Large clipped glossy leaves in royal purple are accented by charcoal veins. Dark stems support rosy, pink calyxes & white flowers. But this plant is grown mainly for its mounded foliage. It works well as a border plant, container plant or in mass plantings as a focal plant. It needs good drainage in average soil. Attracts bees & butterflies, Deer & rabbit resistant.

## Heuchera x Villosa 'Caramel' PP16560 Coral Bells

### 1-Gallon, \$15.00

Height 10-15 Inches tall spreads and 18 inches width.

Plant in Shade to Partial Shade

Blooms: Early to mid-summer and Fall

Foliage of this perennial provides a panoply of color, starting off gold in spring & progressing to peach, amber & caramel. Pink flowers open in the spring & soar on tall stems above the foliage. Excellent plant to partner with the Wild berry Heuchera for color contrast. In the landscape, the plant can be planted in borders, as accent plants or used in containers. Attracts bees, butterflies & hummingbirds, Deer & rabbit resistant. Moist well drained soil.

## Liatris Spicata 'Kobold' Gayfeather

### 1-Gallon, \$9.00

Height 24"-30" Inches tall and 24"-30" Inches width. Plant in Full sun

Blooms: Mid-Summer to Early Fall

Liatris are excellent compact plants for perennial borders and cutting gardens. No staking is needed. Flowers form on tall spikes that rise from a basal tuft of narrow, grass-like foliage. Foliage remains attractive throughout the growing season. Fuzzy, thistle-like blossoms open on spikes from top to bottom. Excellent pollinator attracts Butterflies, Hummingbirds and is Bee Friendly. Cut back flowering spikes by one half after flowering to promote rebloom.

Seedheads can be left on to provide fall interest and to supply winter bird food.

## Nepeta 'Chartreuse' on the Loose' PW

### 1-Gallon, \$15.00

Height 8.0-10.0 Inches tall spreads and 20-24 inches width.

Plant in Full sun

Blooms: Early to mid-summer and Fall

'Chartreuse on the Loose' is a perennial with season long interest perfect for lining the front of the border. The foliage allows for a full three seasons of interest with bright chartreuse yellow leaves. Clusters of lavender blue flowers are produced just above the foliage and appear all summer long. Unlike most catmint, it will continue to produce flowers without being cut back. When the stems are broken, they release an aroma into the air that tends to attract cats, thus its common name, Catmint. Attracts Butterflies, Hummingbirds and is Bee Friendly. Deer Resistant and Rabbit Resistant.

## Phlox Subulata 'Scarlet Flame' Creeping Phlox, Thrift

### 1-Gallon, \$9.00

Height 1 to 3 inches tall spreads and 18-24 inches width. Plant in Full sun.

Blooms: Early to mid-summer

This amazing plant forms a mat of tough, attractive fragrant greenery that is perfect for rock gardens, areas around walks or steps, and between steppingstones. It's famous for cascading down over retaining walls and rocks. The flowers arrive in late spring into early summer, and cover the plant totally, almost obscuring the foliage. For something so attractive, creeping thyme is as durable and tough as most lawn grasses. Many gardeners who grow it even use it in areas where it gets light foot traffic! And it goes right on being beautiful and green, with wonderful flowers every year.

Creeping Thyme must have a fast-draining location, since this plant, like lavender, is a dry land species, making it extremely drought-tolerant. Bee Friendly, Attracts Butterflies, Deer Resistant, Groundcover, Easy to Grow, Low Maintenance, Small Spaces, Rock Gardens, Erosion Control

## Rosmarinus Prostratus 'Trailing Rosemary'

### 1-Gallon, \$9.00

Height: 12 to 18 inches tall and 18 to 36 inches wide Plant: Full Sun

Blooms: spring to early summer, blue-violet flowers

This tough little garden gem is one of the most ornamental plants around, yet there is no beating its usefulness when sheer coverage (and plenty of color!) is needed. This is the perfect plant for garden walls, pots, banks, or a dry, sunny patch of ground in your garden. A superb groundcover for hot, dry locations, its habit is low and mounding, only 12 to 18 inches high but spreading vigorously 18 to 36 inches a year. In summer, deep blue-violet flowers arise in great masses. The rich color stays true even in the hottest days, refusing to bleach or fade. Very deer and pest resistant, Irene™ is a long-lived joy in any well-drained garden soil. The best performance is in full sun. Plant Irene where you crave gorgeous color and thick coverage. The rich violet blue flowers bloom in summer and stay vibrant through heat and drought.

## Salvia 'Black & Blue' Blue Anise Sage

### 1-Gallon, \$9.00

Height: 12 to 18 inches tall and 18 to 36 inches wide Plant: Full Sun

Blooms: spring to early summer, blue and black flowers

The garden's most handsome plant is tall, dark green stems, bright sage green leaves, abundant 1 1/2" florets of the richest blue with truly black sepals just below the petals. Not only are they gorgeous, but they bloom relentlessly from late spring to early autumn. The tall, graceful plants, 4 ft. x 3 ft. work beautifully in large pots, but stunningly as borders or hedges.

## Stachys Byzantine 'Helene von Stein' Big Lamb's Ear

### 1-Gallon, \$9.00

Height 8-10 inch spread and 18-24 inches width. Plant in Full sun to Mostly Sun

Blooms: Mid-summer

The luxuriously fuzzy and furry Helen von Stein Lambs Ear fulfills all the senses with a touchable plant you can't resist petting! Known for its plushly fuzzy, silvery-green foliage, Lambs Ears are named after the equally downy Lambs and their velvety ears. You can't help but reach out for a touch! Helen von Stein is a little larger than your average Lambs Ear, in both leaf size and shape. These add so much texture to any spot in the garden regardless of the size of your space! Occasionally developing spikes of small, purplish-pink flowers in mid-summer has a wonderful effect on any garden. Lambs Ear is not known for its bloom, in fact, it rarely flowers. Instead, it's grown for that incredible foliage!

## Stachys m. 'Hummelo' Betony

**1-Gallon, \$11.00**

Height: 18-24" tall and 18-24" wide

Plant: Full Sun

Blooms: spring to early summer

Award-winning Hummelo Betony brings a vigorous burst of spiky violet blooms to your late spring garden while providing a strong mounding groundcover during the rest of the growing season. Masses of two-lipped flowers cluster on the top of strong stems and are a favorite for pollinators in a sunny garden. Deer resistant.

## Veronica Peduncularis 'Georgia Blue' Georgia Blue Speedwell

**1-Gallon, \$9.00**

Height 6-8" and 12" or more width

Plant in Full sun to Mostly Sun

Blooms: February through April

'Georgia Blue' Veronica is a low growing flowering perennial groundcover plant featuring a spreading mound of attractive, small, dark green and glossy evergreen leaves that become smothered in late winter to mid spring, February through April in our north-central Georgia gardens, by an abundance of pretty, cobalt-blue flowers with cute little white eyes. Attractive even when not in flower, Georgia Blue Veronica is an easy-to-grow and long-lived evergreen groundcover or filler for underplanting perennials, shrubs and spring bulbs in garden beds or pots. You might be happy to know it is attractive to butterflies, but deer turn their nose up to it.

**\*\*\*SHRUBS\*\*\***

**Lantana Camara 'Miss Huff'**

**1-Gallon, \$9.00**

Height: 5 to 6 feet tall and 5 to 6 feet wide

Plant: Full Sun

Blooms: spring to early summer, tricolor flower clusters of yellow, pink and orange

Miss Huff is the largest growing Lantana we offer. She grows to about 5 to 6 feet in height with a spread at least twice that much. The tricolor flower clusters of yellow, pink and orange begin appearing in late spring and continue through the first heavy frost in late fall or early winter. The flowers are irresistible to butterflies and hummingbirds love them too. Miss Huff Lantana was originally discovered back in the 1980s by our friends at Goodness Grows Nursery near Athens, Georgia. At the time of its discovery, the plant had been growing and returning year after year for over 10 years in Miss Huff's backyard. The cold, deer or insects or disease have ever touched it!

**Lantana 'Chapel Hill Yellow' PP19548**

**1-Gallon, \$9.00**

Height 20 - 24 inches tall and 20 - 24 inches width. Plant in Full sun.

Blooms: Spring - Fall

Lantana 'Chapel Hill Yellow' features bright yellow flowers which form a lovely mounding habit.

Lantana leaves can be toxic to pets. Excellent pollinator attracts Butterflies, Hummingbirds and is Bee Friendly. Resists Deer. Drought Tolerant, Heat Tolerant, Fragrant

### Azalea Encore 'Autumn Royalty'

**3-Gallon, \$29.00**

Height of 4-5 ft with a spread up to 3-4 feet

They can take 4-6 hours direct sun or filtered sunlight. Autumn royalty is an evergreen shrub. It's the perfect shrub for color in small spaces. Its repeat blooming pattern gives flowers spring, summer & fall. The unique purple provides a large pop of color seldom seen in gardens. Once established, they are quite drought tolerant.

### Azalea Encore 'Autumn Twist'

**3-Gallon, \$29.00**

Height 4-5 feet height and 4 feet wide

Plant in full sun to part shade, with well drained, acidic soil. Blooms in Spring, Summer, and Fall. Can grow in partial shade to full sun. Autumn Twist is another hybrid multi-season, blooming azalea the blooms changing from white to pink, pinkish-purple, and purple. This is a faster growing azalea, it is an ornamental flowering broad-leaved evergreen shrub the is delightful. The blooms begin in spring and continue on through summer and even into fall for an exceptionally long season of re-blooming color. Fertilize in late winter or early spring. Zones 6A-10B. Best in acidic, well-drained soil.

### Azalea Evergreen 'George Taber'

**3-Gallon, \$21.00**

Height 6-8 feet and 5-6 feet wide

Plant in Full to Part-Sun or dappled shade in moist, well-drained soil. Blooms in the Spring It has clusters of showy, profuse blooms. The throat showcases a deeper magenta tone, with a rosy-pink and white splotch blooms but may see a few blooms sporadically through the Fall. This azalea is an Old Southern Classic. It is lightly perfume attracts Hummingbird & Butterflies. Mulch and do not let dry out. Zones 7B-10B.

## Buddleia 'Miss Molly'

### 3-Gallon, \$29.00

Height: 4—5 feet tall with a spread of 4 to 5 feet.

Blooms in: All summer long without dread heading

Color: Intense Raspberry Fragrant Blooms

These bottlebrush blooms begin in midsummer and continue all the way to frost in the sunny garden, attracting every butterfly, bee, and hummingbird for miles around. Miss Molly is very free flowering, so cut all the blooms you like for the vase. Miss Molly grows quickly and needs little care to continue beautifully flowering year after year. Cut it down to about one-third its original height in late winter or early spring to improve branching, flower production and let

it go. There is no easier plant for the sunny garden periods of dry summer weather. Deer Resistant, Attracts Bees and Butterflies, Fragrant. Plant in Full Sun, well-drained soil.

## Buddleia 'Pugster Blue'

### 3-Gallon, \$29.00

Height: 8—10 feet tall with a spread of 5 to 6 feet.

Plant: in partial shade in moist, well-drained soil.

Blooms in: April - May Single, Trumpet-shape fragrant

Color: Brilliantly blue tones

These flowers are big, fragrant, and brilliantly blue. This is a whole new look for a butterfly bush. Don't be thrown off by its small frame, this perennial is sturdy and holds up its large blooms with strength all season long from the early summer all the way through the fall. Each bloom provides a full cluster of blue purple hued flowers with a distinct sweet honey fragrance no wonder the butterflies, bees, and hummingbirds love it. While pollinators adore it deer will leave it alone. The big fragrant flowers are stunning against the green foliage. Add this butterfly bush to your beds or border to fill your garden with life. They also work great in a container to brighten up your porch or deck. Buddleia Pugster Blue® will bloom all season long with no need for dead heading. Its strong and thick stems will ensure better winter survival than the typical butterfly bush.

## Camellia 'Professor Sargent' Deciduous

### **3-Gallon, \$29.00**

Height: 5 to 6 feet apart for solid hedge

Plant: Partial shade with some shelter from the hot afternoon sun

Blooms in late winter/early spring over a long period

Color: large dark red double flowers

An all-time favorite and top seller for obvious reasons...just look at it. Professor Sargent Camellia produces an abundance of stunningly gorgeous, fully double, peony-like brilliant red flowers that begin opening in late winter continuing through mid-spring. Even when not in bloom, the large, lustrous, evergreen, dark green leaves provide outstanding texture in the landscape. Excellent for cutting and use in indoor flower arrangements or just floating one in a bowl of water.

## Camellia Japonica 'Greensboro Red'

### **3-Gallon, \$29.00**

Height: 8 to 12 feet with a spread of 6 to 8 feet

Plant: partial shade with some shelter from the hot afternoon sun

Blooms in late winter/early spring over a long period

Color: large dark red double flowers

This upright evergreen shrub provides lovely red semi-double blooms in late winter to early spring, when little else is blooming. It prefers moist acidic well drained soil & planting in partial sun or partial shade. Uses in landscaping include accent or group settings, woodland or wildlife gardens, screening or foundation planting or in individual planters. Deer resistant.

## Camellia Sasanqua Bob's Supreme 'pink & white'

### 1-Gallon, \$13.00

Height: 3—4 feet tall with a spread of 4 to 5 feet.

Plant: Full sun to partial shade.

Blooms in: April - May Color: Pink & White flowers

One of if not the rarest landscape Camellias we offer, the Bob's Supreme Camellia was discovered in Athens, Georgia by the Robert (Bob) Wright, who left us in July of 2021 at 96 years of age. In mid to late fall this vigorous beauty features an exceptionally prolific bloom of 3-inch flowers with white petals that have a unique and striking lavender-pink border around the edge of each petal. The flowers begin to open as double but continue to open into a semi-double form. Very deep blue-green leaves provide the perfect backdrop to showcase the flowers. A truly spectacular Camellia for collectors and all gardeners alike!

## Fothergilla 'Mount Airy'

### 1-Gallon, \$7.00

Height: 3—5 feet tall with a spread of 3 to 5 feet.

Plant: in full sun to partial shade.

Blooms in: Mid-Spring Color: White bottlebrush type flowers

Mount Airy Fothergilla is a beautiful and very easy to grow North American native flowering shrub that produces loads of honey-scented pure-white, bottlebrush-like flower spikes at the ends of almost every branch in spring. After flowering, handsome, leathery, blue-green leaves emerge on the upright shrub that persist through summer becoming brilliant shades of gold, orange, purple and red in fall. Excellent near garden ponds or other bodies of water in sun or part shade. Mount Airy Fothergilla is very easy to grow and virtually maintenance free when planted right and in the right spot. It prefers a moist but well-drained acidic soil of average to high fertility and sun or part shade. Deer, rabbit, and disease resistant, winter interest.

## Hydrangea Macrophylla 'Ada Lynn'

### 1-Gallon, \$7.00

Height: 3-6 ft tall and 6-10 ft wide

Plant: Full sun to partial shade

Blooms in: Summer through Fall, Large - up to 12" inches long

Color: Chartreuse, fading to Cream and then to Pink!

Their summer performances, this shrub will take center stage in your landscape or garden with a commanding presence the Ada Lynn Hydrangea is a stunning shrub that grows up to 6 feet tall and wide. It thrives in zones 5-9 and produces beautiful pink, red, and white flowers. Grown with care, this hydrangea is sure to add a pop of color to any garden. This is one of the most widely recognized species of hydrangeas.

## Hydrangea paniculata 'Silver Dollar'

### 3-Gallon, \$23.00

Height: 4 - 5 feet tall and 4 - 5 feet wide

Plant: Full sun to partial shade

Blooms: Summer through Fall, Color: Chartreuse, fading to Cream

This small but mighty beauty blooms with full-sized flowers in a more compact form than you'd expect from a Panicle Hydrangea. The big green leaves fill out in the spring and early summer. Then in mid-summer through fall Silver Dollar covers itself in dense trusses of lacy, creamy-white blooms held upright on strong stems large- up to 6" inches long flowers. The whole effect is romantic and nostalgic! Butterflies and bees will add to the beauty all summer long.

## Hydrangea Oakleaf “Snow Queen”

### **3-Gallon, \$23.00**

Height: 4-6 feet tall, 6-8 feet wide flowering deciduous shrub

Blooms in early through mid-summer

Color: white then turn pale pink and deepen to rose

These white flowers hold themselves with all the grace and proper posture of a queen. As these blossoms age, they'll turn a gentle light shade of pink. Once planted in your landscape, you'll be delighted to see its dense, rounded dome-shaped growing habit. The show isn't over once the blooming is done and the warmest seasons of the year are winding down. Before retiring, the foliage throws one last party by turning gorgeous shades of purple, maroon, and bronze! Adding a Snow Queen to your garden will bring beneficial pollinators like butterflies to your yard in droves. Sit back, relax, and watch their fluttering extravagance. This shrub will make enough panicles for you to pick a couple for a lovely bouquet while leaving enough for the butterflies to enjoy. Brighten up your living room with a cluster or two of these showy flowers! Plant in full sun to partial shade, prefers moist soil. Dark green in summer turning mahogany-red in autumn (good for drying).

## Hex Crenata (Japanese Holly) – Soft Touch

### **1-Gallon, \$7.00**

Height 2-3 feet and 2-3 feet width

Plant in Full sun with well drained acidic soil

Japanese Holly is a Soft Touch Hollies are a perfect winter interest plant to add to your landscape this planting season. With a multitude of uses and a compact small shape, these evergreen shrubs are great for transforming a space to look sophisticated and clean. Soft touch has soft to touch leaves. Leaves are glossy green with a silver mid vein.

## Lagerstroemia Indica 'Crape Myrtle' Natchez White

### 5-Gallon, \$27.00

Height: 20 - 25 Spread: 20 - 25 feet Inches

Plant: In full sun to partial shade afternoon shade

Blooms All Summer, Colors: white blooms

You will love the long bloom period from summer to frost! With its crisp, good clean looks and pristine, fluffy white blooms, Natchez is a wonderful choice for you and your pollinators. Long panicles of pure white flowers cover the plant from top to bottom throughout the growing season. Natchez blooms all summer long! You might see them referred to as "Natchez Crepe Myrtle" because the texture of the robust flower heads looks like crinkled crepe paper! You can even leave the lower branches on to encourage a solid, shrubby screen. This is a very appealing large shrub or small tree that can also be grouped to create a pretty privacy screen. Four Seasons of Interest, Vibrant Orange Red Fall Color, Attractive Dark Cinnamon Brown Bark.

## Magnolia Soulangeans 'Betty'

### 1-Gallon, \$11.00

Height 10-15 feet and 10-15 feet wide

Plant in Sun to Partial Shade (sheltered from strong winds) Blooms in Spring, mid-April to early May

This magnolia is a hybrid. It has a rounded, shrubby habit. It is a slow growing, deciduous shrub, or small tree. It has reddish purple flowers with white interiors and is Fragrant. Plant in well drained, neutral to acidic soil.

Plant at least 50 feet from structures because of roots.

## Thuja Plicata Green Giant Evergreen

### 3-Gallon, \$23.00

Height: 30 - 40 feet tall with a spread of 15-18 feet.

Plant: In full sun to partial shade afternoon shade

Color: Lacy dark green foliage.

This hybrid was a happy discovery in Denmark—it is a powerhouse performer, growing vigorously to towering heights. There is no need to prune Green Giant, you can simply let it grow its full 30-40' for a windbreak. It does respond well to pruning, however, if you'd prefer something a little more uniform for hedging. The biggest benefit, other than its brilliant size, is that the lush, abundant foliage puts the 'green' in evergreen—it won't turn yellow or bronze in winter. This variety is not very picky about soil, but it prefers well-drained if you have it.

Occasionally severely damaged by deer.

## Viburnum Macrocephalus “Snowball”

### 3-Gallon, \$23.00

Height: 6 to 10 feet tall and 6 to 10 feet wide

Plant: Full sun to partial shade

Blooms in: Summer thru Fall Color: White

Enjoy impressive flowerheads in early summer with Snowball Viburnum. This shrub grows 6-10 ft. tall with a similar spread and has a rounded, vase-shaped habit, making it ideal for flowering hedges, privacy screens and as a backdrop for perennial flower beds. Native to China, Snowball Viburnum produces 5-8 in. flowerheads that emerge lime green and turn a snowy white. The non-fragrant flowers attract butterflies. Dark green, ovate leaves are deciduous in northern climates and often semi-evergreen in warmer climates. An easy-to-grow shrub, Snowball Viburnum tolerates a range of soils, but performs best in moist, well-drained, acidic loamy soil. Attracts butterflies.

## Viburnum Macrocephalum 'Summer Snowflake'

### 1 Gallon, \$7.00

Height 8-10'foot tall and 6-8 feet wide Plant in Full Sun & Partial Shade Blooms in spring through fall

Summer Snowflake Viburnum is one of a very few ornamental shrubs that blooms all season long in our gardens, producing a flush of beautiful, white, lace cap flower clusters every month from April through October! Attractive bright red berries in late summer are enjoyed by the birds and are followed by wine-red fall foliage. In spring, when in full bloom, visitors to the gardens who see it from a distance mistake it for a dogwood...until upon closer inspection they see the beautiful lace cap flowers. Viburnum is very easy to grow in most any moist, but well drained soil of average fertility and full sun to part shade.

## Viburnum Tinus 'Spring Bouquet'

### 1 Gallon, \$7.00

Height 5 - 6 feet tall and 4 - 8 feet wide Plant in Full Sun & Partial Shade Blooms In late winter and spring

Spring Bouquet Viburnum is an evergreen shrub with pink star-shaped flowers with rich green foliage in the landscape all year. In late winter and spring, clusters of star-shaped pink flowers emerge from pink buds. As the blooms open and age, they fade from pink to white beautiful flowers. This is a small viburnum that is pest and disease resistant. Pollinators adore these blossoms while they last, and you will enjoy these tough shrubs for their versatility and resilience! If you don't prune after flowering, the birds will love the blackish-blue berries that ripen on reddish stems for a unique color combination in the late summer to fall.

## Vitex 'Shoal Creek'

### 1-Gallon, \$7.00

Grows 10-20 feet tall and 10-20 feet Wide.

Plant in Full Sun & Partial Shade

Tolerates high humidity and drought. The Chaste Tree makes a dramatic specimen addition to a garden with its fragrant violet blue flowering spikes that cover this deciduous tree from early to late summer.

The tree grows quickly and thrives in hot, dry sunny locations. It is truly one of the most spectacular trees in the South. Attracts hummingbirds and butterflies.

## Vitex 'Shoal Creek'

### 5-Gallon, \$27.00

Grows 10-20 feet tall and 10-20 feet Wide.

Plant in Full Sun & Partial Shade

Tolerates high humidity and drought. The Chaste Tree makes a dramatic specimen addition to a garden with its fragrant violet blue flowering spikes that cover this deciduous tree from early to late summer. The tree grows quickly and thrives in hot, dry sunny locations. It is truly one of the most spectacular trees in the South. Attracts hummingbirds and butterflies.
