

Our Mission

Jade's Helpful Heart Foundation's (JHHF) mission is to ease the financial and emotional burden of families. We do so by offering assistance for the transition home from the hospital; helping with medical costs; allocating adaptive equipment; and providing a safe space to connect with those who understand and live your reality.

Our Story

Living in the hospital with our daughter for 463 days and coming home with an overwhelming amount of equipment, we saw a need for supporting families going through this challenging transition. We are in the beginning of growing what we feel is a priceless resource. We are grateful for our amazing community, family, and friends who help support this Foundation.

Our Team

Our empathetic and ever-growing team of volunteers is committed to helping families with medically complex children feel confident as they transition home from the hospital. Interested in volunteering or donating resources? Email us: JadesHelpfulHeartFoundation@gmail.com
