***FOR IMMEDIATE RELEASE*****Digital Defenders Partners With Cybersecurity Parents, LLC to Advance Online Safety Education for Educators and Families**

Digital Defenders, a nonprofit dedicated to educating children about online safety, announced a new partnership with Cybersecurity Parents, LLC to expand access to comprehensive digital safety education for students, families, and educators. This collaboration brings together two mission-driven organizations with a shared goal of strengthening digital safety awareness of both children and families.

The organizations will begin collaborating on co-developed educational materials designed for parents and educators, ensuring consistent messaging across school and home environments. Beyond the initial material, this partnership will explore opportunities to scale additional resources to reach broader audiences.

“As Digital Defenders continues to grow, partnerships like this are essential in amplifying our message and advancing online safety for the next generation.” said Marcus Pierre, founder of Digital Defenders. “By combining our efforts, we're creating a strong, lasting impact in our communities.”
