

## How to Install Unsigned Drivers in Windows 10

The easiest way to install unsigned drivers is to use the Windows 10 Advanced Boot menu. To do that:

1. Press the Windows key + **[X]** key combination, then navigate to **Shut down or sign out**.
2. Press **[Shift]** + left click on the **Restart** option.  
**NOTE:** The action above will take you to the Advanced Boot menu.

3. Under **Choose an option**, select **Troubleshoot**.

4. In the **Troubleshoot** section, select **Advanced options**.

# Advanced options

**System Restore**  
Use a restore point recorded on your PC to restore Windows

**Command Prompt**  
Use the Command Prompt for advanced troubleshooting

**System Image Recovery**  
Recover Windows using a specific system image file

**Start-up Settings**  
Change Windows' start-up behaviour

5. Next, select **Start-up Settings**.

**NOTE:** The Start-up Settings option will allow you to boot your Windows system in different modes.

# Start-up Settings

Restart to change Windows options such as:

- Enable low-resolution video mode
- Enable debugging mode
- Enable boot logging
- Enable Safe Mode
- Disable driver signature enforcement
- Disable early-launch anti-malware protection
- Disable automatic restart on system failure

Restart

6. Simply click on the **Restart** button to continue.

# Startup Settings

Press a number to choose from the options below:

Use number keys or functions keys F1-F9.

- 1) Enable debugging
- 2) Enable boot logging
- 3) Enable low-resolution video
- 4) Enable Safe Mode
- 5) Enable Safe Mode with Networking
- 6) Enable Safe Mode with Command Prompt
- 7) Disable driver signature enforcement
- 8) Disable early launch anti-malware protection
- 9) Disable automatic restart after failure

7. Since you will install unsigned drivers, press **[F7]** on your keyboard to select the 7th option “Disable driver signature enforcement.” Your system will boot into Windows.
8. Now proceed with installing the unsigned driver.
9. After installing, restart your computer, and the Driver Signature Enforcement will be automatically enabled from the next reboot.  
**NOTE:** If ever you want to install another unsigned driver, you need to go through the above process again.
