

## **Sculpted Stories: A Location-Based Choose-Your-Adventure Experience**

### **Overview**

*Sculpted Stories* is an innovative, immersive storytelling experience that transforms sculpture gardens into interactive narrative landscapes. Visitors are invited to explore the grounds not just as observers of art, but as characters in unfolding, location-based adventures. Through mobile-enabled storytelling and branching narratives, each path a visitor takes is shaped by the sculptures themselves—turning passive viewing into active discovery.

### **How It Works**

Using geolocation and a platform called Story City, visitors can unlock audio, text, or video-based story chapters as they move through the garden. Each sculpture becomes a narrative touchpoint, offering choices that lead to multiple storylines. Whether exploring mythological tales, science fiction mysteries, or poetic reflections—each visit can become unique, encouraging return visits and deeper engagement with the art.

### **Benefits for Stakeholders**

- **Sculpture Artists:** Your work becomes more than visual—it becomes a living part of a story. Visitors form emotional connections, deepening their appreciation and increasing the value of your art.
- **Museums & Sculpture Gardens:** Enhance your programming with a flexible, family-friendly experience that blends art, education, and entertainment. Extend the time visitors spend on site and encourage repeat visits.
- **Cultural Venues & Sponsors:** Stand out as a forward-thinking space that supports immersive storytelling and community engagement. Sponsorship opportunities include story credits, branded storylines, and exclusive content.

**Impact** Sculpted Stories bridges technology, art, and narrative to create memorable experiences. With a design rooted in accessibility and creativity, the experience is easy to implement and custom-tailored to each garden's unique collection and audience.

### **Let's Collaborate**

Kendra Dobson is looking to partner with visionary artists, curators, and cultural leaders to pilot and expand this storytelling project to transform static spaces into dynamic worlds of imagination.
