Architectural Control Committee (ACC) Request Form

Many exterior construction and installation modifications on WOII homes require a permit from the city of Jeffersonville as well as advance approval by the ACC. The Architectural Control Committee (ACC) is a Board-led team responsible for managing requests for exterior modifications to all WOII homes. Visit wo2clubhouse.com/acc for more information about the review process as well as the types of projects that require advance approval. In addition, review carefully Article 2 of the enclosed Covenants and Restrictions (also found at wo2clubhouse.com/covenants-bylaws) for more information on our architectural guidelines, and click here to email any questions to the ACC Director.

Note: Approval of a homeowner's ACC request is not guaranteed. Starting or completing a project that is out of compliance with the guidelines and without prior approval will likely lead to costly removal of the project at the homeowner's expense.

Signing and submitting this request form indicates that you have read and understood the ACC guidance.

Date: _____ Lot# (if known): _____
