

LITTLE WOOD CREATIONS

Rustic Shabby Chic Re-purposed Solid Wood Floating Shelf

Thank you for purchasing our real wood rustic floating shelves from [LITTLE WOOD CREATIONS](#). Follow the easy to install instructions below.

Mounting Instructions

Step 1: First, **carefully** pull both sections apart exposing the dowels and mounting screw holes. We recommend locating the studs in the wall to ensure a more secure install. Alignment marks are the top part of the shelf to ensure the two sections join correctly during installation. The screw holes between the dowels are 4 inches apart to aid in aligning the screw holes with your studs as you mount the rear section of the shelf. Be sure to use the longer 2 ½ inch screws for mounting the rear section of the shelf and the shorter 1 ½ inch screws for securing the front section of the shelf to the rear section (explained in the next step).

Turn Over>>>>>>>>>>

Step 2: Again please ensure the notched out alignment marks are on top when assembling. Once the rear section has been mounted securely slide the front section of the shelf over the dowels snugly back against the rear piece.

Step 3: Lastly, fully insert the shorter 1 ½ inch screws into the predrilled angled holes on top of the shelf. **NOTE: Be Sure Not To Over Tighten When Inserting These Top Screws.** Over tightening could risk splitting the shelf. This will ensure that the front portion of the shelf will not slide off the rear piece. This completes your installation process. Enjoy your new Rustic Floating Shelf from LITTLE WOOD CREATIONS.
