PLANNING & DEVELOPMENT

Over the past several weeks, PNHA has met with three student teams from Oklahoma State University's Spring Engineering Capstone course, along with representatives from OSU Institute of Technology, to advance housing goals and develop conceptual plans for PNHA-owned sites. SEE Renewal, PNHA's project consultant, will facilitate the week's activities, drawing on the November 2025 sessions, follow-up research, and additional secondary data collected since that time.

The upcoming series of meetings is intended to engage residents, strengthen partnerships, and conclude with an in-person Board of Commissioners

These meetings focused on reviewing engineering layouts, confirming infrastructure access, and ensuring the selected site supports both immediate performance and long-term expansion. After careful evaluation, the current design includes over 300 solar panels, positioned to maximize solar

CAPSTONE PROJECTS W/ OSU

The Pawnee Nation Housing Authority is working with the Oklahoma State University Engineering Students on three (3) capstone projects for future Housing Developments.

- ◇ Project 1 - Single-Family Living Addition (14-Acres)
- ◇ Project 2 - Elders Village (Hawthorne Street)
- ◇ Project 3 - Shotgun Style Homes (2nd & Cleveland Street)

We will share more information as projects are completed.

REPP UPDATE CONTINUED

exposure and production efficiency.

A key component of the planning process has been identifying a location that not only meets today's needs but also allows for future growth. The proposed site includes dedicated space for expansion, giving the Nation the flexibility to increase capacity as demand rises. By planning for scalability now, we are protecting the investment and laying the groundwork for additional phases of renewable development.

This project represents a significant step forward for the Pawnee Nation's energy resilience and sovereignty. By generating more of our own renewable power, we reduce reliance on outside utility providers and strengthen long-term infrastructure stability for tribal facilities. The REPP solar initiative continues to build on previous updates shared in our earlier newsletters, reflecting steady progress from concept development to design refinement and site confirmation. As we move closer to final approvals and construction scheduling, we remain committed to transparency and continued communication with our community.

Each milestone achieved strengthens our path toward a more sustainable and self-reliant energy future for the Pawnee Nation.

NEW HOUSING SOFTWARE

The Housing Office will be upgrading its systems in the coming months by integrating Kanso Software to enhance operational efficiency and ensure accurate record keeping. This new system will streamline processes such as filing, rent receipt generation, late notices, and work order management, allowing for more effective and timely service delivery. The majority of correspondence will transition to email communication, including the issuance of digital receipts. We look forward to this upgrade as it will improve internal operations and enable us to better serve the PNHA community.
