Montreal, Canada

July 20 – 24, 2026

DBMC 2026

The 17th International Conference on the Durability
of Building Materials and Components

National Research
Council Canada

Conseil national de
recherches Canada

We are pleased to invite you to submit an abstract for DBMC2026 – the 17th International Conference on the Durability of Building Materials and Components. This prestigious global event will convene a diverse interdisciplinary community of researchers, environmental scientists, architects, facility managers, and policy makers, all united by a shared commitment to advancing the science and practice of building durability. Join us as we explore cutting-edge innovations, research breakthroughs, and practical strategies that enhance the long-term performance, sustainability, and resilience of the built environment.

DO NOT MISS IT!

Conference co-chairs

- **Hua Ge**, Concordia University
- **Marzieh Riahinezhad**, National Research Council of Canada
- **Michael Lacasse**, National Research Council of Canada
- **Leon Wang**, Concordia University

Conference Scope

- Evaluating the Durability of Building Materials and Components
- Climate Change and Environmental Resilience
- Decarbonization, Reducing Greenhouse Gas Emissions and Other Environmental Impacts
- Rapidly Developing Technologies in Construction
