

# VPI SERIES

## Pressure Independent Control Valves and Actuators

**VPI series PICV and actuators makes it simple to achieve 100% control of the water flow in the building, while creating high comfort and energy savings at the same time. An additional benefit is that no balancing is required if further stages are added to the system, or even if the dimensioned capacity is changed. VPI series provides modulating control with full authority regardless of pressure fluctuations in the system.**

### APPLICATION

Designed to use in heating and cooling systems such as Air Handling Units, Fan Coil Units, and other central plant applications.

### EASY SETTING & FIELD ADJUSTABLE

Flow setting is stepless and can easily be set to any design flow in the flow range. Setting can be done before or after installation and flow may be changed on demand without removing the valve from the installation.

### COMPACT DESIGN

Compact one-unit PICV, including modulating control valve, dynamic flow limiter and differential pressure control valve in one body.

### ALL-IN-ONE

It combines an externally adjustable automatic balancing valve, a differential pressure control valve and a full authority modulating control valve in single unit. It combine 3 functions into one valve body:

- Control valve
- Differential pressure controller that protects against pressure fluctuations.
- Presetting scale to set the desired maximum flow.

### SEALED SETTING

Actuator will cover the setting and protect against tampering.

### FLEXIBLE SETTINGS

Higher presetting precision due to step less analogue scale with 41 Maximum flow setting through dial on valve body.

### APPROVALS

Shut-off leakage as per ANSI / FCI 70-2 206 / IEC 60534-4 - Class IV/ 0.01% leakage of full open valve capacity. Tested as per BSRIA standards. UL & CE approved actuators.

### FLEXIBLE

Two-way, modulating to accept digital or analog input signals. The valves accept 0(2)-10V, 3-point floating or ON/OFF input signals.

### HIGHER PRESSURE RANGE

- Differential pressure operating range up to 800 kPaD.
- Close-off pressure range up to 800 kPa.

### STEADY FLOW

Flow balancing in valve body through diaphragm.

### FEATURES AND BENEFITS

Available in DN female threaded (ISO) sizes varying from DN15-50 with or without pressure test ports.

Energy saving due to optimal control, lower flow and pump pressure. Maximized  $\Delta T$  due to faster response and increased system stability.

Simple Maintenance – Internal parts can be accessed without removing the valve housing from the piping lines

Controls chilled or hot water in closed loop systems with up to 50% glycol.

Electrical actuators with selectable control modes, Linear or Equal percentage settings.

# TECHNICAL SPECIFICATIONS

## VALVE SPECIFICATION

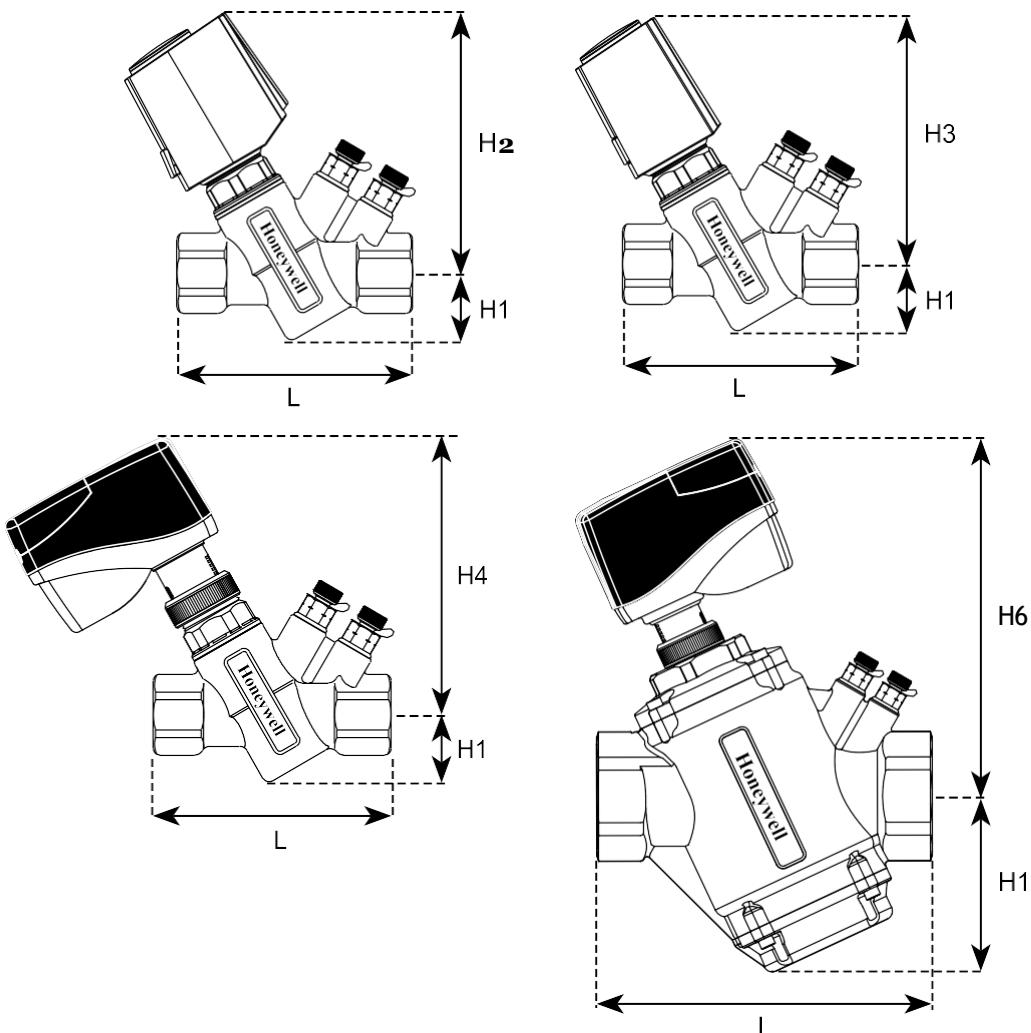

PARAMETER	SPECIFICATIONS
Valve Type:	Pressure Independent Control Valve
Body Style:	Globe / Linear
Size Range:	DN15 - DN50 (1/2" - 2")
PN Pressure Rating:	PN25
Static Pressure:	2500 kPa / 360 psi
Ambient Temperature:	+1°C to +50°C / +34°F to +122°F
Medium Temperature:	-20°C to +120°C / -4°F to +248°F
Maximum Close-Off Pressure:	800 kPa / 116 psi
Maximum Operational $\Delta P$ :	DN15 - DN32: 800 kPaD / 116 psid DN40 - DN50: 600 kPaD / 87 psid
Flow Characteristic:	Linear, can be converted to equal percentage in the actuator
Shut-Off Leakage:	ANSI / FCI 70-2 206 / IEC 60534-4 - Class IV / 0.01% leakage of full open valve capacity
Control Range:	1:1000 / IEC 60534
Rangeability:	100:1
Turn Down Ratio:	100:1
Stroke:	DN15 - DN25: 3.4 mm (0.13") DN32: 5.2 mm (0.2") DN40 - DN50: 6.2 mm (0.24")
Maximum Flow Rate Setting:	DN15LF - DN20LF: 64 to 1110 l/hr DN15HF - DN25HF: 620 to 2650 l hr DN32: 865 to 4630 l/hr DN40 - DN50: 1900 to 13647 l hr

## CONSTRUCTION

COMPONENT	SPECIFICATIONS	
	DN15-DN32	DN40-DN50
Valve Housing:	DZR Brass ASTM CuZn36Pb2As	Ductile iron ASTM A395 Grade 60-40-18
Flow Regulator:	Glass-reinforced PSU/POM/PPS	Glass-reinforced PSU/POM/PPS
Cone:	PPS	Stainless Steel
Diaphragm:	EPDM/Hydrogenated acrylonitrile-butadiene-rubber	Hydrogenated acrylonitrile-butadiene-rubber
O-rings and Seat:	EPDM	EPDM
Head Nut:	Forged brass ASTM CuZn40Pb2	--
Thread Connection:	Fixed female ISO	Fixed female ISO
Housing Taps:	1/4" ISO	1/4" ISO

# MLP71MAA ACTUATORS (FAIL-IN-PLACE)

It is critical to select and use the best possible actuators to achieve optimum indoor climate control with PICVs. Faster and more accurate actuators respond better to the control signal, for better results and higher comfort.

the impressive MLP series actuators, which have been designed for use with the threaded VPI PICV series. They enable a new dimension of benefits to HVAC control, offering designers, system integrators, and building owners.

## TECHNICAL SPECIFICATIONS

**Operation:** Modulating

**Supply Voltage:** 24V AC/DC ±10%,  
50/60 Hz

**Failsafe Function:** No

**Control Signal:** Analog 0(2)-10V DC,  
<0.5mA

**Feedback:** Yes, control signal

**Actuating Force:** High (250N -30N/+70N)

**Stroke:** 5.8 mm / 0.23 in (compensated)

**Operation Time:** 22 sec/mm

### Power Consumption:

24V AC: 2.5VA operating (4.7VA max.)

24V DC: 1.2W operating (2.2W max.)

**Ambient Temperature:** 0°C to +50°C

(+32°F to +122°F)

**Media temperature:** 0°C to +120°C

(+32°F to +248°F)

**Humidity rating:** 0-85% RH, no  
condensation

**Position Indicator:** Yes

### Wire Connection:

Fixed, 5 wires x 0.50 mm<sup>2</sup>, 1.5 meter cable

**CE Conformity:** EN 60730

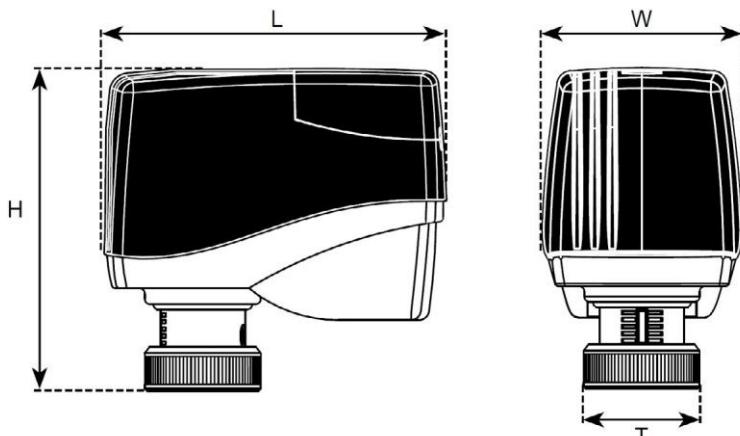

**Protection Rating:** IP54 incl. upside-down, class III, indoor use only

**Weight:** 0.25 kg / 0.55 lb

**Valve Size Compatibility:** DN15 - DN32

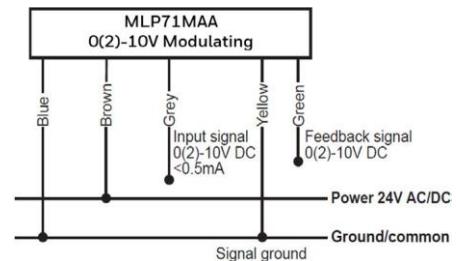

**Override:** Yes, Electrical

## MEASUREMENTS & DIMENSIONS

ACTUATOR	L MM (IN)	W MM (IN)	H MM (IN)	T	WEIGHT KG (LB)
MLP71MAA	86.5 (3.41)	48.5 (1.91)	80 (3.15)	M30x1.5	0.25 (0.55)

## WIRING CONNECTIONS

## ACTUATOR SWITCH FUNCTIONS

SWITCH NUMBER	SWITCH FUNCTION	FACTORY SETTINGS
Switch 1	Auto cycle ON/OFF If the plant specifications permit it, the auto cycle can be activated during commissioning. Auto cycle prevents the valve from jamming when the valve is not moved for a longer period of inactivity, e.g. for heating systems during the summer. When the auto cycle is activated, the actuator will perform 50% stroke cycle if no stroke movement has occurred during a 3-week period.	OFF
Switch 2	Analog 2-10V DC / 0-10V DC Setting control range by the continuous actuating signal 0-10V DC or 2-10V DC.	0-10V DC
Switch 3	Normally open / Normally closed Setting actuating direction with 10V DC control signal to "valve open" or "valve closed" as well as the position feedback.	Normally closed; 0V DC = valve closed
Switch 4	Equal % control / Linear control Setting of actuating control curve to either equal percentage or linear control.	Linear control
Switch 5	No function.	Close
Switch 6	Electrical override Setting override function to ON and the actuator will open valve fully. When set to OFF again, the actuator will re-calibrate and thereafter go into normal operation mode.	Off

### Actuator Switch Function

The valve functions are adjusted with the DIP switches under the connection cover.

**Operation Time:** Approximately 3.5 minutes<sup>6</sup>

**Power Consumption:** 1.2W

**Ambient Temperature:** 0°C to +60°C /  
+32°F to +140°F

**Wire Connection:** Plug-in, 3 wires x 0.22 mm<sup>2</sup>, 1 meter cable

**Protection Rating:** IP54 including upside-down, class III

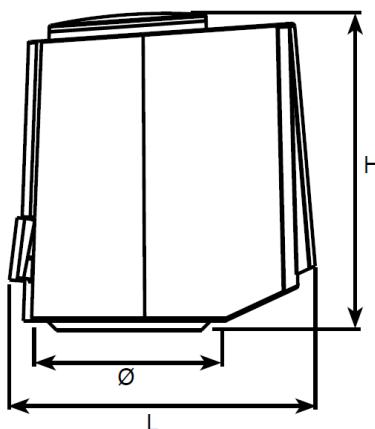

**Weight:** 0.12 kg / 0.27 lb

**Valve Size Compatibility:** DN15-DN32

**Note 5:** To ensure that the valve is in an open position during commissioning of the system, the actuator will be delivered in open position and remain in this position until it is electrically operated first time.

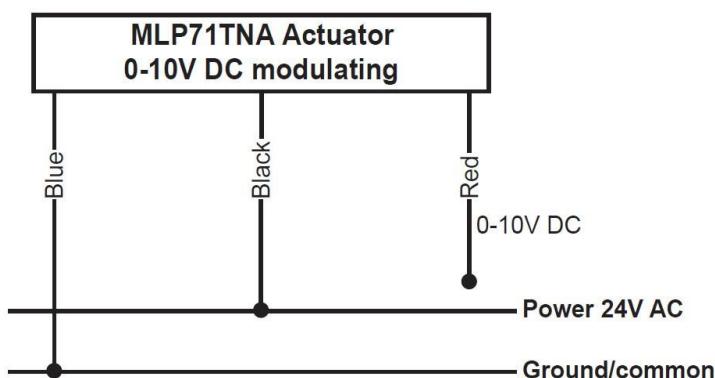

**Note 6:** Closing time is approximately the double dependent on ambient temperature.

## MEASUREMENTS & DIMENSIONS

ACTUATOR	L MM (IN)	Ø MM (IN)	W MM (IN)	H MINIMUM	H MAXIMUM	WEIGHT KG (LB)

## FLOW SETTING DIAL

Honeywell's VPI series Pressure Independent Control Valves offers selection of wide range of flow settings.

These valves are specially equipped with Scale setting dials on top of the valve body. To adjust the preferred flow settings, adjust the below shown dials (as per valve model) with a unique adjustment key.

	DN15/20 (LF) AND DN32	DN15/20/25 (HF)	DN 40/50 (THREADED)
	 For example - A micrometer setting of 3.2 (DN32 valve) on dial, corresponds to a maximum flow rate of: 3350 l/h (17.7 GPM)	 For example - A micrometer setting of 2.3 on dial, corresponds to a maximum flow rate of: 1430 l/h (6.28 GPM)	 For example - A micrometer setting of 3.7 on dial, corresponds to a maximum flow rate of: 11142 l/h (49 GPM)

## FLOW SETTINGS

MODEL NUMBER	MAXIMUM FLOW RATE	WORKING DIFFERENTIAL PRESSURE
DN15/DN20 (LF)	64 l/h - 1110 l/h	30 kPaD - 800 kPaD
DN15/DN20/DN25 (HF)	620 l/h - 2650 l/h	35 kPaD - 800 kPaD
DN32	865 l/h - 4630 l/h	16 kPaD - 800 kPaD
DN40/DN50	1900 l/h - 13647 l/h	16 kPaD - 600 kPaD

# MODEL SELECTION (PART NOMENCLATURE)

## VPI SERIES VALVE BODIES

VALVE TYPE	VALVE SIZE	CONNECTION TYPE	PRESSURE TEST PORTS	MAXIMUM FLOW RATE	PRESSURE CLASS
VPI - Valve Pressure Independent	015 - DN15 / 0.5 inch	T - Threaded DN Size	P - With Pressure Ports	L - Low Max Flow	2 - PN25
	020 - DN20 / 0.75 inch		W - Without Pressure Ports	H - High Max Flow	
	025 - DN25 / 1 inch				
	032 - DN32 / 1.25 inch				
	040 - DN40 / 1.5 inch				
	050 - DN50 / 2 inch				
VPI	015	T	P	H	2

**Example:** VPI015TPH2

- Without Pressure Test Port models are available only for DN15-DN32
- Low Flow (LF) models are available only for DN15 and DN20.

## VPI SERIES ACTUATORS

ACTUATOR TYPE	FAIL-SAFE	CONTROL AND POWER VOLTAGE	ACTUATOR TECHNOLOGY	FEEDBACK	VALVE SIZE
ML - Motor Linear	P - Power Failure 'In place'	41 - On/Off 230Vac	T - Thermoelectric Actuator	A - Analog feedback	A - DN15-DN32 (Threaded)
	E - Electronic Fail-Safe	71 - Modulating (0)2-10Vdc	M - Electric Actuator	N - No feedback	B - DN40-DN50 (Threaded)
		75 - Floating / Modulating (universal)			
ML	P	71	M	N	A

**Example:** MLP71MNA

**Note:** For MLP41MNA-NU actuators, use the same model selection with extra -NU at the end for non UL listed actuators.

## APPLICATION AND SCHEMATIC EXAMPLE

# VPI SERIES

## Pressure Independent Control Valves and Actuators

**VPI series makes it simple to achieve 100% control of the water flow in the building, while creating high comfort and energy savings at the same time. An additional benefit is that no balancing is required if further stages are added to the system, or if the dimensioned capacity is changed.**

### APPLICATION

VPI series provides modulating control with full authority regardless of pressure fluctuations in the system. Flanged pressure independent control valves (PICVs) are used in heating and cooling systems such as Air Handling Units, and other central plant applications.

### ALL-IN-ONE

It combines an externally adjustable automatic balancing valve, a differential pressure control valve and a full authority modulating control valve in one single unit. Automatic balancing eliminates overflows, regardless of fluctuating pressure conditions in the system. Flow balancing in valve body through diaphragm.

### SEALED SETTINGS

Actuator will cover the setting and protect against tampering.

### APPROVALS

Shut-off leakage as per ANSI / FCI 70-2 206 / IEC 60534-4 - Class IV / 0.01% leakage of full open valve capacity. Tested as per BSRIA standards. UL & CE approved actuators.

### EASY SETTING & FIELD ADJUSTABLE

Flow setting is stepless and can easily be set to design regulated flow in the flow range available from 113.2 to 1219.6 gpm. Setting can be done before or after installation and flow may be changed on demand without removing the valve from the installation.

### COMPACT DESIGN

Compact one-unit PICV, including modulating control valve, dynamic flow limiter and differential pressure control valve in one body. High flows with minimal required differential pressure due to advanced design of the valve.

### SMART ACTUATORS

Standard or failsafe actuator; always includes feedback signal - an easy solution for designers, installers and end-users.

Electrical actuators with selectable control modes, Linear or Equal percentage settings.

Electronic fail-safe actuators also available for sizes with and without Pressure test ports.

### FLEXIBLE

Two-way, modulating to accept digital or analog input signals. The valves accept 0(2)-10V, 3-point floating or ON/OFF input signals.

## FEATURES AND BENEFITS

DN flange sizes from DN50-250, which are also compatible with ANSI/ASME Class 150/300 flange standards.

Energy saving due to optimal control, lower flow and pump pressure. Maximized  $\Delta T$  due to faster response and increased system stability.

Simple Maintenance - Internal parts can be accessed without removing the valve housing from the piping lines.

Close-off pressure range up to 800 kPa and Differential pressure operating range up to 800 kPaD.

Controls chilled or hot water in closed loop systems with up to 50% glycol.

# TECHNICAL SPECIFICATIONS

## VALVE SPECIFICATIONS

PARAMETER	SPECIFICATIONS
Valve Type	Pressure Independent Control Valve
Body Style	Globe / Linear
Size Range	DN50 - DN250 (1/2" - 10")
PN Pressure Rating	PN40
Static Pressure:	4000 kPa / 580 psi
Ambient Temperature:	-10°C to +50°C / +14°F to +122°F
Medium Temperature:	-20°C to +120°C / -4°F to +248°F
Maximum Close-Off Pressure:	800 kPa / 116 psi
Maximum operational ΔP:	800 kPaD / 116 psid
Flow Characteristic:	Linear, can be converted to equal percentage in the actuator
Shut-off leakage:	ANSI / FCI 70-2 206 / IEC 60534-4 - Class IV/ 0.01% leakage of full open valve capacity
Stroke:	DN50-100: 30 mm (2,160° rotation) DN125-150LF: 36 mm (2,160° rotation) DN150HF-250: 60 mm (3,600° rotation)
Control range:	1:1000 / IEC 60534
Rangeability:	>100:1
Turn down ratio:	228:1
Control range:	1:1000 / IEC 60534
Rangeability:	>100:1
Turn down ratio:	228:1

## MAXIMUM FLOW RATE SETTINGS:

VALVE	FLOW RANGE	VALVE	FLOW RANGE
DN50 and DN65:	9240 to 25700 l/hr	DN125LF:	23300 to 83800 l hr
DN80LF:	12800 to 35600 l hr	DN125HF:	25600 to 106000 l hr
DN80HF and DN100LF:	17000 to 51000 l hr	DN150LF:	25600 to 106000 l hr
DN100HF:	13300 to 72700 l hr	DN150HF - DN250:	33100 to 277000 l hr

# MRP75MAC ACTUATOR (FAIL-IN-PLACE)

It is critical to select and use the best possible actuators to achieve optimum indoor climate control with PICVs. Faster and more accurate actuators respond better to the control signal, for better results and higher comfort.

impressive MRP75 actuators, which have been designed for use with the flanged VPI PICV series. They enable a new dimension of benefits to HVAC control, offering designers, system integrators, and building owners.

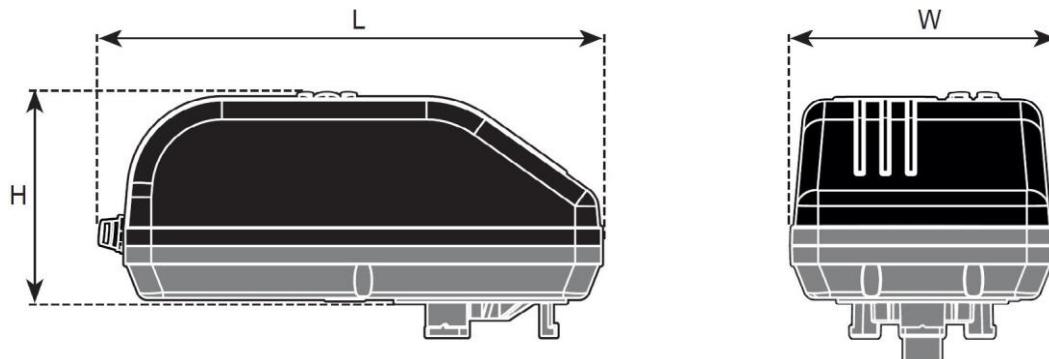

## TECHNICAL SPECIFICATIONS

PARAMETER	SPECIFICATIONS
Actuator Technology:	Electrical, Bi-directional synchronous motor
Operation:	Floating / Modulating (universal)
Supply Voltage:	22-26V AC, 50/60 Hz or 22-26V DC
Failsafe Function:	Not Available
Control Signal:	Analog 0(2)-10V DC or 0(4)-20mA and digital 3-point-floating or 2-position
Feedback:	Linear signal Auto (equal to analog control signal), 0-10V DC, 2-10V DC or 4-20mA
Operation Time:	190 seconds (from closed to fully open valve) / 317 sec (from closed to full open valve)
Power Consumption:	12VA
Ambient Temperature:	-10°C to +50°C / +14°F to +122°F
Wire Connection:	Fixed, 5 wires x 0.80 mm <sup>2</sup> , halogen free, 1 meter
CE Conformity:	EN 60730, class II
Protection Rating:	IP54 including upside-down mounting
Weight:	0.25 kg / 0.55 lb
Valve Size Compatibility:	DN50-DN250
Resolution:	1:1000 (0-10V analog) and 1:800 (2-10V analog)
Control mode:	Linear flow, Equal percentage, Linear rotation or Linear signal
Override:	Yes, Manual
Humidity rating:	5..95%RH, no condensation
Housing material:	UL94 VO-rated plastic
Programming:	Programming of all settings on interface with buttons and display
Calibration:	Automatic at startup
Valve-actuator coupling:	Easy snap coupling

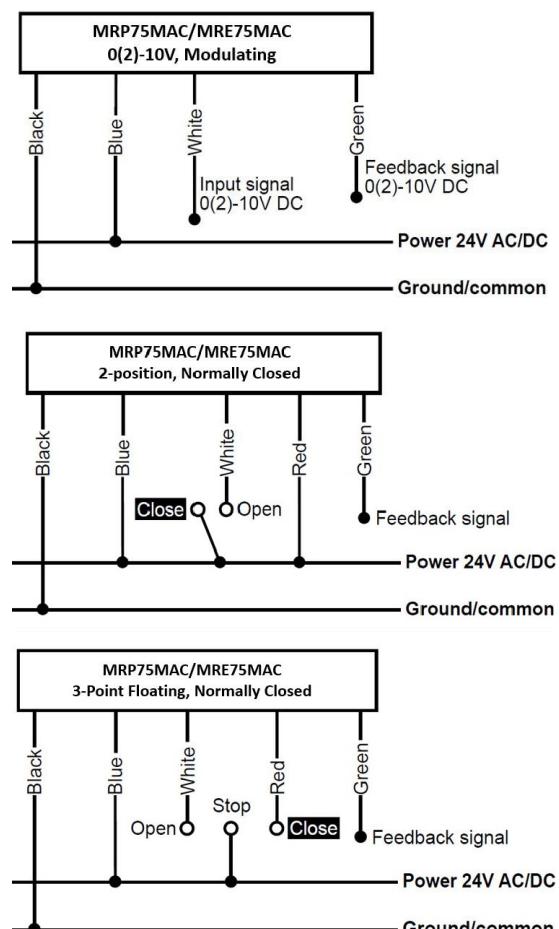

**Note:** MRE series actuators require 317 sec (from closed to full open valve).

**Accuracy:** Greatest of either  $\pm 5\%$  of controlled flow rate or  $\pm 2\%$  of maximum flow rate. recommends that VPI series PICV valves are selected to ensure that the set maximum flow rate is minimum 50% of the rated valve maximum capacity.

**Note 2:** Above indicates selectable maximum flow rates defining the flow through the valve at maximum control signal, normally 10V. Each valve includes up to 1000 positions between the selected maximum flow and closed valve with control signal selected to 0-10V. .

# PARAMETER SETTINGS THROUGH ACTUATOR

MRP75MAC and MRE75MAC actuators allows to select different parameters like:

NUMBER	SETTINGS	OPTIONS
1	Password Setting	
2	Valve model selection onto which actuator is installed'	
3	Unit Scale of Flow selection	l/sec (Default) or l/hr or GPM
4	Flush Mode activation on startup	
5	Type of Control Signal selection	0(2)-10VDC (default) or 4-20mA or digital
6	Minimum Control value selection	
7	Maximum Control value selection	
8	Feedback Signal Selection	0(2)-10VDC (default) or 4-20mA or digital
9	Max flow selection	
10	Actuator Mode Selection	Linear (Default) or equal percentage
11	Select direction of rotation when Fail-Safe	Normally Close (Default) or Normally Open

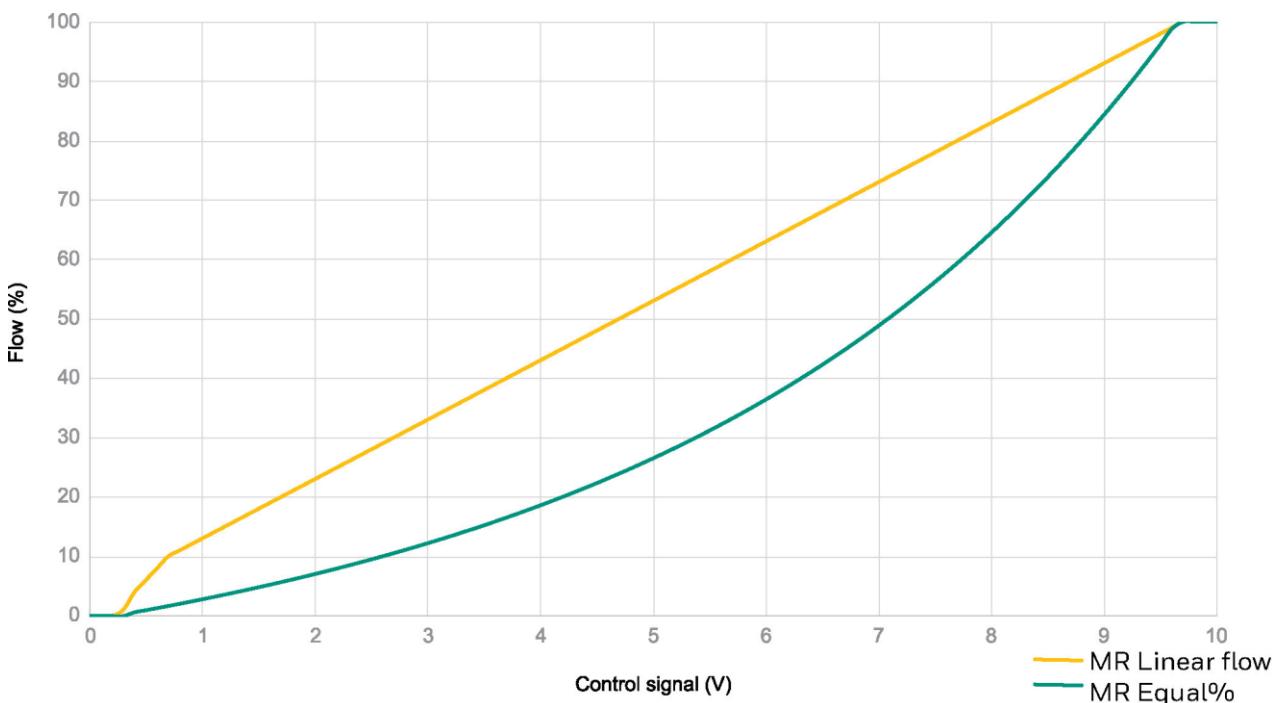

**Note 1:** For more details, see Installation Instructions (31-00383).

## FLOW SETTINGS.

SIZES	FLOW RANGE	WORKING DIFFERENTIAL PRESSURE
DN50	9240 LPH - 25700 LPH	30 kPaD - 800 kPaD
DN65	9240 LPH - 25700 LPH	30 kPaD - 800 kPaD
DN80LF	12800 LPH - 35600 LPH	35 kPaD - 800 kPaD
DN80HF	17000 LPH - 51000 LPH	35 kPaD - 800 kPaD
DN100LF	17000 LPH - 51000 LPH	35 kPaD - 800 kPaD
DN100HF	13300 LPH - 72700 LPH	50 kPaD - 800 kPaD
DN125LF	23300 LPH - 83800 LPH	30 kPaD - 800 kPaD
DN125HF	25600 LPH - 106000 LPH	35 kPaD - 800 kPaD
DN150LF	25600 LPH - 106000 LPH	35 kPaD - 800 kPaD
DN150HF	33100 LPH - 277000 LPH	35 kPaD - 800 kPaD
DN 200	33100 LPH - 277000 LPH	35 kPaD - 800 kPaD
DN 250	33100 LPH - 277000 LPH	35 kPaD - 800 kPaD

## CONTROL CURVE OF FLOW

# MODEL SELECTION (NOMENCLATURE)

## VPI SERIES VALVE BODIES.

VALVE TYPE	VALVE SIZE	CONNECTION TYPE	PRESSURE TEST PORTS	MAXIMUM FLOW RATE	PRESSURE CLASS
VPI - Valve Pressure Independent	050 - DN50 / 2 inch	F - Flanged DN Size	P - With Pressure Ports	L - Low Maximum Flow	4 - PN40
	065 - DN65 / 2.5 inch			H - High Maximum Flow	
	080 - DN80 / 3 inch				
	100 - DN100 / 4 inch				
	125 - DN125 / 5 inch				
	150 - DN150 / 6 inch				
	200 - DN200 / 8 inch				
	250 - DN250 / 10 inch				
<b>VPI</b>	<b>050</b>	<b>F</b>	<b>P</b>	<b>H</b>	<b>4</b>

**Example:** VPI050FPH4

- LF models available only for DN80-DN150
- DN150HF model requires flange adapter from DN200 to DN150 (available as an accessory).

## VPI SERIES ACTUATORS.

ACTUATOR TYPE	FAIL-SAFE	CONTROL AND POWER VOLTAGE	ACTUATOR TECHNOLOGY	FEEDBACK	VALVE SIZE
MR - Motor Rotary	P - Power Failure 'In place'	75 - Floating / Modulating (universal)	M - Electric Actuator	A - Analog feedback	C - DN50-DN250 (Flanged)
	E - Electronic Fail-Safe				
<b>MR</b>	<b>P</b>	<b>75</b>	<b>M</b>	<b>A</b>	<b>C</b>

**Example:** MRP75MAC

## VALVE AND ACTUATOR COMPATIBILITY

PARAMETERS		ACTUATOR PART NUMBER	
		MRP75MAC	MRE75MAC
Power Supply	Voltage	24 Vac/dc, +/-10%, 50/60Hz	24 Vac/dc, +/-10%, 50/60Hz
	Power Consumption (Peak)	12VA	12VA-25VA
Control	0-10 Vdc	•	•
	2-10 Vdc	•	•
	0-20mA / 4-20mA	•	•
	2-Position SPDT	•	•
Feedback		(0)2-10Vdc / 4-20mA	0)2-10Vdc / 4-20mA
Running Time	(seconds)	190sec/317sec	190sec/317sec
Power Fail Safe Action		Fail In Place	Electronic Fail-Safe
Electrical Connection	Cable length	1m	1m
VALVE SIZE	Q <sub>MAX</sub> (L/H)	VALVE MODEL NUMBER	COMPATIBILITY
DN50 F	25,700	VPI050FPH4	•
DN65	25,700	VPI065FPH4	•
DN80 LF	35,600	VPI080FPL4	•
DN80 HF	51,000	VPI080FPH4	•
DN100 LF	51,000	VPI100FPL4	•
DN100 HF	72,700	VPI100FPH4	•
DN125 LF	83,800	VPI125FPL4	•
DN125 HF	106,000	VPI125FPH4	•
DN150 LF	106,000	VPI150FPL4	•
DN150 HF	277,000	VPI150FPH4	•
DN200	277,000	VPI200FPH4	•
DN250	277,000	VPI250FPH4	•
