

testimonials

"Velvet Antler is truly becoming the health supplement of choice for slowing the aging process and speeding up old sex drive."

- Dr. Howard Peiper, TV-host of Partners in Healing and co-author of twelve books on nutrition.

"You have a wonderful product! I've been using your elk antler capsules and e-fusion for over a year with amazing results. I'm 51 years young with stiff hands from working with them all my life and psoriasis on both elbow and knees. Since I started using the elk antler and e-fusion lotion my hands are not stiff at all and my knees and elbows have completely cleared up. Also I feel younger and stronger. One other thing is that I believe your product has helped lower my high blood pressure."

- Jesse Burr Jr., NC

"I first started taking velvet antler after speaking with Diana Susen about my training for my first triathlon. Once she new of my task at hand, she suggested taking velvet antler to see how it would help my training. Within days of starting it, I noticed a nice increase in my metabolism. The aching I was starting to have in my knees stopped and they have not bothered me since. My training went well and I have since completed my triathlon-bringing home a third place finish! It's a great product and I will continue on it!"

- Diana Behrend, Triathlete, Slinger, WI

"My hands were so bad with arthritis that I couldn't even close them. But taking 4 capsules a day has really made a difference. I can close my hands again."

- Cecelia Stamm, Conroe, Texas

"At the beginning of ski season 2001, my meniscus damaged knee was making me aware that even with my leg brace, I may have difficulty participating in one of my favorite sports. In the fall, I decided to take velvet antler and within a week noticed that my "trick knee" had disappeared and the chronic pain was gone. I know it's the velvet antler that is making a difference because whenever I run out of the product, within a few days my knee feels weaker. As an ISSA-certified Specialist in Performance Nutrition, I advocate it to all my sports clients who have sustained some sort of joint or tissue injury."

- Nina Anderson, S.P.N.

velvet antler...

...ancient approach to promoting wellness and natural healing

Product of U.S.A.

Antler may be one of missing elements in the modern diet that has allowed such a tragic loss to our collective health. Velvet Antler is being used to address a wide range of disorders. Major constituents of Velvet Antler - Chondroitin Sulfate and Collagen Type II are recognized by the US Food and Drug Administration as effective against joint disorders. This is a rare achievement for a nutritional supplement with its roots deep in alternative practice.

Betty Kamen, PhD

Over 250 citations and research reports have been written about Velvet Antler.

■ **In China** it's known as "lu rong"

First documented evidence of use was found on a silk scroll recovered from a Han tomb in Hunan province, during the Hun Dynasty-206 BC-220 AD Velvet Antler is the most significant ingredient in chinese medicine next to Ginseng.

■ **In Korea,** it's called "nok yong"

Used as a herbal medicine to maintain good health, and strengthen a weakened body.

■ **In Russia,** it's called "pantui"

Used since the fifteenth century. Controlled studies on many olympic athletes in Soviet Union have shown significant endurance increases with use of "pantocrin", a velvet antler extract.

■ **In North America,** it's simply "velvet antler"

Taken for maintaining healthy joints, promoting immune functions, strength and endurance, energy, slowing the aging process.

The velvet antler is dried, pulverized and put into capsules.

Quality Starts at the Farm

On our farms, we raise high genetic bulls, who have a record of producing premium quality antlers. The elk are pastured on alfalfa fields and supplemented with a mixture of minerals with no artificial additives. The antlers are harvested annually, under strict guidelines outlined by the North American Elk Breeders Association, using no drugs, and causing no harm or stress to the elk. The complete antler is dried and processed in an antler drying facility, one designed after the traditional Korean methods of drying. The ground antler is then micro biological tested (bacterial analysis-standard plate count). Each capsule contains 250 mg. of 100% elk velvet antler, using no additives or fillers.
