A Quanex Building Products Company

# Low maintenance, anti-slip PVCu decking from Liniar

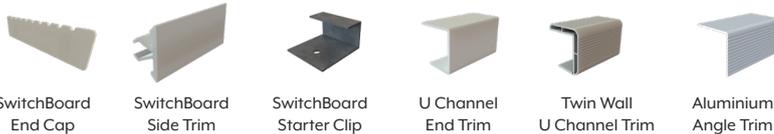

Enjoy maximum relaxation and less time looking after your garden, with SwitchBoard composite decking. Choose from 5 contemporary colours and two different surface options – or mix and match.

Quick to install and UV stable, SwitchBoard was developed using the latest technology by a British company manufacturing decking since 1999. It's made from a combination of PVCu polymers, making it strong, durable and recyclable – outperforming traditional timber decking and helping to reduce deforestation.

## SwitchBoard

The 'Quick Clip' fixing solution has been designed for a swift, easy installation with no visible screws.

Full range of matching end caps and trims available.

Available in 5 modern, nature-inspired colours

Available with Liniar's unique sub-frame system

Available as a kit for easy ordering and installation!

### Fully reversible

Choose from woodgrain or traditional grooved finish.

### Strong and durable

One of the thickest on the market at 37mm. Will not warp, bend or decay.

### Low maintenance

Will not rot, splinter, rust or stain. No painting, staining or sanding.

### Family safe

Anti-slip and splinter-free, SwitchBoard is barefoot friendly.

### Fully tested

Tested for fire, slip and wear resistance for safety and peace of mind.

### 10 year warranty

Colourfast and robust, with a 10 Year Warranty – see [liniar.co.uk/warranties](http://liniar.co.uk/warranties).

### Quick to install

Designed with 'Quick Clip' fixings using the latest 3D prototyping technology.

### Eco friendly

Made from composite PVCu, lead-free and fully recyclable.

### Made in Britain

Designed and manufactured in the heart of the UK at a facility with Environmental and Quality British Standards.

### Accreditations

Class 1Y  
Fire Rating

BS 7976  
Slip Resistance
