

## EDUCATION

Harvard, Princeton. Yale, and MIT were not for me, not because of the expense, rather because there was no money anyway. From elementary school right through high school my grades likely never got above C because I had a greater interest in looking out the window, hunting for the 1<sup>st</sup> snow flake of the upcoming winter season.

While in high school there was also trade school where printing was the choice, where the interest lie. I was good with design and learned the type-making machines to make lead type and run printing machinery (presses) and got a part time job in a print shop a year before graduation from high school.

Then on to higher education at WUS that is “World University of the Soul”. Some of the professors there were,

J. Krishnamurt	Charley Powers
Errol Garner	Charles Dickens
Eckard Toole	Bob Eberly
Mel Tormae	Bob Dillon
JS Bach	Helen Miriam
April Barrows	David Attenborow
Sir Thomas Davis	Paramahasnua Yogananada
Atul Patel	P B S
BBC WORLD SERVICE	Mark Twain
NATURE	N O V A
BUDDHA	KEN BURNS
JANE GOODALL.
