Presented by Diana Neskovska from
AT10 Education, L.L.C.

Description:

The Assistive Technology Certificate Course is a virtual course that prepares participants to assess and support K-12 students with curriculum access needs. This course will provide personal attention and individual coaching for all participants in small group sizes. (*This does not cover AAC.*)

Audience:

AT Specialists/Assessors, OTs, SLPs, SAI/RSP Teachers, Mod/Severe and OI/LI Teachers, Program Specialists, and Special Education Administrators

Dates & Times: TBD PST via Zoom

Registration & Additional Information

- **Full Course Fee:** \$2100
 - Requirements: AT Assessors will attend class sessions, demonstrate practice with students to develop experience with AT tools, and write 1-2 defensible assessment reports. University units are available for an additional fee.
- **Refresher Course Fee:** \$1050
 - Description: Appropriate for existing AT Assessors or those that have taken the course before. There is no report requirement. Units are available for an additional fee.
- **Questions?** Contact Diana (323) 333-5674
- **Refund Policy:** No refunds are offered due to the limited number of participants. Participants may be substituted prior to the start of the course.

Register by visiting our website: www.AT10education.com

Student Learning Objectives

Participants will demonstrate skills and knowledge in the following areas: software for curriculum access and executive functioning needs, including word prediction, text-to-speech, internet access, accessibility, and organization; benefits of commercial and free/low-cost tools, use of assessment tools, comparing student needs with and without AT, special education law governing AT curriculum access accommodations and implementation, and utilization and location of resources and groups for support.

About Instructor:

Diana is an Assistive Technology Consultant who serves multiple school districts in California. She has 22+ years of experience as a Special Education Teacher, Teacher Specialist, and Assistive Technology Specialist. She has developed and implemented technology solutions for students with autism, learning disabilities, attention-deficit disorders, intellectual disabilities, orthopedic impairments, visual and hearing impairments, and more diverse needs ages 3-22. She has experience navigating complex IEPs and has served as a speaker on various education topics for parents and educators. Diana has an Education Specialist Credential in Mild/Moderate Disabilities and a Master's in Special Education. Diana graduated from California State University, Los Angeles, and UCLA. She is a co-founder/co-chair of the AT Network, a California-based organization dedicated to professional training and networking for AT Specialists and related fields.
