

## DENTAL WASTE MANAGEMENT

Trusted for over 25 years, Greenflow Environmental Services, Inc. has provided waste management solutions to dental practices throughout Ontario. We provide our services without contracts, or monthly billing. We are safe, reliable and efficient. We are registered with the Ministry of Environment and Climate Change for transporting and receiving hazardous and non-hazardous wastes in Ontario.

### **Sharps Disposal**

5L containers, 23L pails, 1.5L containers and wall brackets (5L or 1.5L sizes), 23L pails for Pharmaceutical

**X-Ray Processor Waste:** Fixer / Developer (20 L containers)

**X-Ray Film:** Credit is issued for weights over 100lbs. To receive credits, please sort the x-rays from client envelopes and place in boxes or we can supply bins. We will pick up unsorted film, however there will be no credit issued.

### **Amalgam / Lead Foil**

Non-Contact Amalgam / Capsules, Bridges and crowns

Solids from vacuum particle traps & contact amalgam are placed in a 1.3L container

New SolmeteX Hg5 amalgam filter and Spent SolmeteX Hg5 filter disposal

Lead Foil 1.8 L container and Lead Aprons

Spent Particle Trap disposal, New Particle Traps (box of 8) and Reconditioned Particle Traps (box of 8)

### **Document Shredding**

100 liter sized drum, 200 liter sized drum and Banker Box

Containers are supplied by Greenflow. Call **1-800-287-5416** and a service technician will pick up each full container and leave an empty replacement (if required). To reduce your carbon footprint, have all waste and recycling picked up together. *Please note: a larger transportation fee may apply outside 100 km radius of Burlington.* Pricing is subject to change without notice.

### **FREE E-Waste / Batteries / Toner and Ink Jet Cartridges**

If you have old x-ray machines, computer towers, laptops, televisions, fax machines, monitors, printers, photocopiers etc., add them to a scheduled pick up

### **Light bulbs (fluorescent/CFL/sodium/incandescent/LED...)**

Unfortunately, most fluorescent light bulbs end up in a landfill or incinerated, releasing mercury when the bulbs are broken. Every part of a fluorescent light; from the glass tube to the mercury inside can be recycled and reused

**M.A.R.S Liberty Boss Amalgam Separator:** The "BOSS" is designed for precise performance, time-saving convenience, simplicity and environmental compliance, without the costs involved with messy filter or cartridge changes, added recycling and service costs. 1-3 chairs up to 36 months, 4-9 chairs up to 24 months, 10+ chairs – up to 12 months

**HWIN Management Program:** Hazardous or non-hazardous wastes generated from a single doctor's office or a single dentist's office is excluded from being manifested. If there is more than one dental practitioner in the office and each dentist is consolidating hazardous or non-hazardous waste for disposal; the office must register their location and their waste with The Ministry of Environment and Climate change at [www.hwin.ca](http://www.hwin.ca). The majority of dental offices may be exempt from manifesting waste, but never the safe handling and proper disposal of hazardous or non-hazardous wastes.
