

Dental practices with more than one practitioner that generate regulated or non-regulated hazardous waste must have an Ontario Waste Generator Number. The number is obtained by registering on the Ministry of Environment, Conservation and Parks website www.hwin.ca. Once a dental practice has registered and issued a generator number, the number must be renewed annually. MOECP deadline for renewals is February 15, 2020.

You will find the HWIN website is confusing and time consuming. How can Greenflow Environmental Services Inc. help? We act as an advisor regarding HWIN account registrations, annual renewals, regulation updates.

HWIN Management Program fee – \$150.00 + HST (per site, per year)

- Annual registration fee - included
- Manifest and tonnage fees from waste disposal services managed by Greenflow Environmental Services Inc. – included
- Land Disposal Restriction (LDR) – included
- Notification Form or Part 2b – included
- Waste class re-classifications (LDR) – included

If you would like to take advantage of this program, please carefully read and fill out page 2. Please fax it to (905) 333-1306 or e-mail it to disposal@greeflow.com

Note: The program includes all administrative requirements throughout the calendar year. This includes any aide in adding waste classes or removing ones that are no longer generated. *Please be sure to let us know at the time of renewal if there are any wastes you are no longer generating so we may update and clean up your account.*

HWIN is an automated system that sends quarterly updates via email to your company official on the account regarding accumulated fees. It is an accepted practice by the M.O.E. to allow these fees to accumulate throughout the year to be paid at the same time of the annual renewal. It simplifies the process for all. For this reason, our policy is to follow the program in this manner. You are required as a participant in this program to forward emails you receive from the HWIN Helpdesk so we are aware of the activity, and permitting us to make any adjustments required.

The company official is the individual within your organization who is responsible for managing hazardous waste. The company official will receive all HWIN e-mail notifications.

(Please print clearly)

Company Official: Name _____ E-mail _____

By signing below, as the company official for the above generator, I have read, understand and agree with the following:

The Hazardous Waste Information Network or HWIN is the sole responsibility of the Generator. I am the exclusive recipient of e-mail notifications from the Ministry of Environment, Conservation and Parks regarding annual renewals, manifest and tonnage fees, or non-conforming shipments for the Generator and I understand that it is my responsibility to forward these notifications to the Greenflow e-mail address: disposal@greenflow.com

Under the HWIN Management Program, Greenflow Environmental Services' responsibility is limited to 2020 HWIN registrations, manifest and tonnage charges, and land disposal restrictions, for "wastes that are serviced directly by Greenflow Environmental Services Inc." Manifest and tonnage fees that are incurred by a waste management service provider other than Greenflow Environmental Services Inc. are NOT included in the program and will be added to my fee. It remains the sole responsibility of the Generator to manage onsite waste streams and to notify Greenflow of any changes.
