

Chakras, Color, and the Endocrine System at a Glance

The Endocrine system is the body's glandular system. Each of the seven glands in the body are transponders (senders/receivers) of all the energetic vibrations the body receives 24/7. Each gland of the body has a color relationship.

Chakra	Color	Related Endocrine Glands
1	Red	Ovaries/Testes 
2	Orange	Adrenals 
3	Yellow	Pancreas 
4	Green	Thymus 
5	Blue	Thyroid 
6	Indigo	Pituitary 
7	Violet	Pineal 

When colors are not balanced in the body, one or more glands will have a tendency to malfunction, causing the entire system to work at less than peak capacity.
