FLAG POLE 2822
FLAG POLE SPECIFICATIONS

NRS 624.031(5) Applicability of chapter: Exemptions. The provisions of this chapter do not apply to:

An owner of property who is **building or improving a residential structure on the property for his own occupancy and not intended for sale or lease.** The sale or lease, or the offering for sale or lease, of the newly built structure within 1 year after its completion creates a rebuttable presumption for the purposes of this section that the building of the structure was performed with the intent to sell or lease that structure. An owner of property who requests an exemption pursuant to this subsection must apply to the board for the exemption. The board shall adopt regulations setting forth the requirements for granting the exemption.

If you are seeking an exemption from licensure pursuant to NRS 624.031(4) you must complete the following affidavit, obtain the required signatures, and submit the original to the building department with your application for a building permit.

OWNER BUILDER AFFIDAVIT OF EXEMPTION

I hereby certify that I am the owner of the property listed below, and that I am building or improving a residential structure on this property for my own occupancy and do not intend to sell or lease the property.

Parcel Number: 91-24-813-013 Description of Work: FLAG POLE INSTALL Type of Permit: GENERAL

Please initial acknowledging the following obligations and duties:

- ☒ I may not sell or lease this property. If I sell or lease, or offer to sell or lease this property within 1 year after completion, it may be presumed that I have violated the provisions of this exemption and Chapter 624 of NRS.
- ☒ I may not hire an unlicensed person to act as my contractor, agent, or construction manager.
- ☒ I must directly supervise the construction.
- ☒ Any subcontractor(s) working on this project must be properly licensed by the Nevada State Contractors Board.
- ☒ Any person working on my project who is not a licensed contractor must work under my direct supervision and must be employed by me. I must comply with all State and Federal laws as an employer in the State of Nevada, including payroll deductions (FICA and income tax withholding), provide industrial insurance coverage, and pay the required unemployment compensation for that employee.
- ☒ If my project requires the repair, restoration, improvement or construction of a pool or spa, I acknowledge my obligation and duty to comply with the provisions of NRS 624.900 through NRS 624.930 (inclusive).
- ☒ I acknowledge that I have received copies of NRS 624.900 through NRS 624.930 (inclusive) and NRS 278.573.
- ☒ I acknowledge that the failure to comply with any of the above may result in cancellation of the permit.

I have read the above owner builder affidavit of exemption and certify that the information provided is true and correct to the best of my knowledge.

Dated this 19 day of AUGUST, 2022.

Agreement and Survey

Section 4

APPLICATION FOR NEW UTILITY SERVICE

I, the undersigned, hereby make application to the City of Henderson for utility service. The following requirements and information are conditions of Utilities Services' approval of the building permit.

1. Will you be residing on the property during construction? ☐ Yes ☐ No
2. Water service (meter) must be applied for at time of issuance of Building Permit. (Phone 702-267-3670)
3. Do you want water lateral to be installed by city forces? ☐ Yes ☐ No
4. Do you want sewer lateral to be installed by city forces? ☐ Yes ☐ No
5. If service laterals are to be installed by city forces, a stake must be placed on the front or side property line showing where the service is to be installed. The stake will be labeled "water" and/or "sewer" as appropriate. Water service cannot be placed in the driveway approach and should be at least 20 feet from the property corner. A separate permit is required for use of a fire hydrant for construction water.
6. Participation in future street/utility improvement districts is required.
7. The City of Henderson disclaims any responsibility or commitment to guarantee utility extensions to the subject property by a certain date. Priority will be given to city emergencies and maintenance activities.
8. Are sewer and water mains existing at lot? Sewer - ☐ Yes ☐ No Water - ☐ Yes ☐ No
9. Domestic Meter Size: _____ Number of Domestic Meters requested: _____
10. Irrigation Meter Size: _____ Number of Irrigation Meters requested: _____

Section 5

HAZARDOUS MATERIALS & HIGH PILED COMBUSTIBLE STORAGE SURVEY

The following survey questions must be answered to facilitate an accurate and timely plan review by the Building and Fire Safety Divisions.

- Do you intend to store, use, handle or dispense hazardous materials within this building? ☐ Yes ☐ No

Hazardous materials are those chemicals or substances which are physical hazards or health hazards as defined in Article 80 of the Uniform Fire Code whether the materials are in usable or waste condition.

- Do you intend to store high-piled combustibles within this building? ☐ Yes ☐ No

High-piled combustible storage is storage of combustible materials in closely packed piles or combustible materials on pallets, in racks, or on shelves where the top of storage exceeds 12 feet in height. When required by the Fire Chief, high-piled combustible storage may also include certain high-hazard commodities where the top of storage exceeds 6 feet in height.

If the answer to either question is YES, specific information must be submitted. For hazardous materials, see International Building Code Chapter 4 and Uniform Fire Code Article 80. For high-piled combustible storage, see Uniform Fire Code Article 81.

Section 6

I certify that:

- I am the permit applicant or the permit applicant's authorized agent.
- I have read this application and state that all information is correct.
- I agree to comply with all City of Henderson Ordinances and state laws related to building construction and hereby authorize representatives of the city to enter upon the above mentioned property for inspection purposes.
- I also acknowledge the following:

All demolition and remodel permit applicants must contact the Clark County Department of Air Quality and Environmental Management for requirements prior to commencement of work. This contact regards inspection and/or abatement of asbestos, as well as dust control. This requirement is in effect regardless of the size or date of construction of the building. The Clark County Department of Air Quality and Environmental Management is located at 500 S. Grand Central Pkwy., 1st Floor, P.O. Box 555210, Las Vegas, NV 89155-0210, or can be reached at (702) 883-9994 or <http://www.aqoetoclarkcounty.com>

BOTH2022214536

2822 CULLODEN AVE HENDERSON, NV 89044

Applicant is responsible for complying with all applicable laws, regulations, and with all conditions specified by the City of Henderson.

The owner, owner's authorized agent, permittee and/or contractor is responsible to provide a material and debris enclosure consisting of a chain link compound constructed with temporary post and fence sections covered with fabric, or similar enclosure approved by the Building Official to prevent material and debris from littering the jobsite or surrounding neighborhood.

The owner, owner's authorized agent, permittee and/or contractor is responsible to provide means for inspections, (i.e. ladders, temporary stairs and guards, etc.), to cause the work to remain visible and able to be accessed for inspection purposes.

The contractor and/or permittee scheduling inspections shall notify the owner and/or occupant of the inspection date and necessity to secure pets.

When scheduling inspections, we are currently not able to make appointments.

This permit is a multipage document. All pages must remain in a single package at the site and be accessible to city staff at all times. Permit Contents may include these sections:

- List of Required Inspections
- Inspection Holds (Requirements prior to scheduling certain inspections.)
- Conditions of Approval
- Special Inspections

• **Inspection Scheduling Instructions.**

Inspections may be scheduled at <http://dcaonline.cityofhenderson.com>.

DISCLOSURES

NRS 278.573 Statement of restrictions: Duty of building official to deliver to owner who is issued permit for construction on his residence; owner to acknowledge receipt in writing; text.

1. A building official who issues a permit to the owner of a residence to construct, alter, repair, add to, subtract from, improve, move, wreck or demolish the residence shall, at the same time, deliver to him a statement. The owner of the residence shall acknowledge in writing receipt of the statement.

2. The statement delivered by the building official must include the following text:

State law requires construction to be done by licensed contractors. You have applied for a permit under an exemption to that law. The exemption allows you, as the owner of your property, to act as your own contractor with certain restrictions although you do not have a license.

You must directly supervise the construction, on the job, yourself. The building or residence must be for your own use or occupancy. It may not be built or substantially improved for sale or lease. If you sell or lease a building you have built or substantially improved yourself within 1 year after the construction is complete, it is presumed that you built or substantially improved it for sale or lease, which is a violation of this exemption and a violation of Chapter 624 of NRS.

You may not hire an unlicensed person to act as your contractor or to supervise people working on your building. It is your responsibility to make sure that people employed by you have the licenses required by state law and by county or municipal licensing ordinances. You may not delegate the responsibility for supervising work to a contractor unless he is licensed to perform the work being done. Any person working on your building who is not licensed must work under your direct supervision and must be employed by you, which means that you must deduct FICA and withholding tax and provide industrial insurance and pay the required contribution for unemployment compensation for that employee, and comply with other state and federal laws relating to employment. Your construction must comply with all applicable laws, ordinances, building codes and zoning regulations.

RESIDENTIAL SWIMMING POOLS AND SPAS

NRS 624.800 Definitions. As used in NRS 624.800 to 624.965, inclusive, unless the context otherwise requires, the words and terms defined in NRS 624.905, 624.910 and 624.915 have the meanings ascribed to them in those sections. (Supplied in revision)

NRS 624.905 "Contract" defined. "Contract" means any contract or agreement in which a contractor agrees to perform work concerning a residential pool or spa.

NRS 624.910 "Contractor" defined. "Contractor" means a person licensed pursuant to the provisions of this chapter who performs work concerning a residential pool or spa.

NRS 624.915 "Work concerning a residential pool or spa" defined.

1. "Work concerning a residential pool or spa" means any of the following acts, if performed for a fee:

(a) The design, construction, repair, maintenance, restoration, alteration or improvement of any residential swimming pool or spa, regardless of use, including the repair or replacement of existing equipment or the installation of new equipment, as necessary; or

(b) Any consultation or supervision concerning such work.

2. The scope of such work includes layout, excavation, operation of construction pumps for removal of water, steelwork, construction of floors, installation of gunite, fiberglass, tile and coping, installation of all perimeter and filter piping, installation of all filter equipment and chemical feeders of any type, plastering of the interior, construction of decks, installation of housing for pool equipment and installation of packaged pool heaters.

3. The scope of such work also includes the installation of plumbing, including, without limitation, connections to potable water, and the installation of gas lines if the contractor holds classifications for such work pursuant to NRS 624.925.

NEVADA STATE CONTRACTORS BOARD

5010 METZGER LANE, SUITE 100, RENO, NEVADA, 89511 (775) 685-1141 FAX (775) 685-1271, INVESTIGATIONS (775) 685-1150
2315 CORPORATE CIRCLE, SUITE 200, HENDERSON, NEVADA, 89014 (702) 485-1100 FAX (702) 485-1100, INVESTIGATIONS (702) 485-1100
www.nsbtcnv.gov

NRS 624.920 License or other authorization required to perform work concerning residential pool or spa. A person shall not, directly or indirectly, perform or offer to perform, for a fee, any work concerning a residential pool or spa or any consultation or supervision concerning such work or otherwise hold himself out as being able to perform such acts for a fee, unless the person holds:

1. A license as a contractor or subcontractor under state law which authorizes the person to perform such acts for a fee; or
2. Any other license, certificate, registration or permit under state law which authorizes the person to perform such acts for a fee.

NRS 624.925 Classifications of licensing.

1. The Board shall adopt regulations to provide for classifications of licensing that authorize a contractor who performs work concerning a residential pool or spa to perform, in connection with such work, the installation of:

- (a) Plumbing, including, without limitation, connections to potable water; and
- (b) Gas lines.

2. The regulations adopted by the Board must include, without limitation, regulations establishing the qualifications, training and examinations that are required for such classifications.

NRS 624.930 Contractor and subcontractor required to obtain permits and meet certain requirements; certain owner-builders required to submit information regarding bonds and insurance; supervision and control of work; license or other authorization required to perform certain acts for owner-builder.

1. Any contractor or subcontractor who performs work concerning a residential pool or spa shall, regardless of whether the work is performed under the direction of a builder who is also the owner of the property being improved:

- (a) Apply for and obtain all applicable permits for the project; and
- (b) Meet all applicable requirements imposed pursuant to this chapter and any regulations adopted by the Board with respect to contracts for work concerning a residential pool or spa.

2. If a contractor or subcontractor performs work concerning a residential pool or spa and the work is performed under the direction of a builder who is also the owner of the property being improved, the owner shall comply with all state and local laws and ordinances for the submission of names, licenses and information concerning any required bonds and insurance with respect to the contractors and subcontractors working on the project.

3. With respect to a contract for work concerning a residential pool or spa, the work performed pursuant to such a contract must be supervised and controlled directly by the qualified employee or qualified officer of the contractor.

4. If work concerning a residential pool or spa is performed under the direction of a builder who is exempt from having to obtain a license as a contractor because the builder is also the owner of the property being improved, a person shall not, directly or indirectly, perform or offer to perform, for a fee, any act as a consultant, adviser, assistant or aide to the builder for the purposes of the project, including, without limitation, any act associated with obtaining permits for the project, or otherwise hold himself out as being able to perform such acts for a fee, unless the person holds:

- (a) A license as a contractor or subcontractor under state law which authorizes the person to perform such acts for a fee; or
- (b) Any other license, certificate, registration or permit under state law which authorizes the person to perform such acts for a fee.

SOUTHERN NEVADA BUILDING OFFICIALS (SNBO)

REGIONAL FLAGPOLE STANDARD

The purpose of this standard is to identify building permit requirements for the installation of flagpoles. This standard does not address zoning requirements or property specific deed restrictions that may apply to flagpoles. Guidance regarding design loads for flagpoles can be found in the ANSI/NAAMM FP 1001-97 "Guide Specifications for Design of Metal Flagpoles."

Ground mounted flagpole installations:

- Height is defined for ground mounted flagpoles as the distance between the top of the highest attached projection on the pole to finished grade.
- Flagpoles less than 15' high do not require building permits and are not regulated by this standard. Note that this exemption shall not be construed as allowing any unsafe flagpole condition to exist irrespective of permitting requirements.
- All Flagpoles 15 feet high or higher shall require a building permit. Permit requirements are as specified below.

○ Flagpoles with a height of 15 feet or more but less than 25 feet high are subject to the following minimum requirements:

- ✓ → • A site plan shall be provided showing the location and height of the proposed flagpole.
- ✓ → • The flagpole shall be of a kit form and shall be installed in strict conformance to the manufacturer's published installation requirements.
- ~~Don't Need~~ → • Custom fabricated flagpoles may be utilized provided that they are built in accordance with the design of a Registered Design Professional.

○ Flagpoles with a height of 25 feet or more but less than 40 feet high are subject to the following minimum requirements:

- A site plan shall be provided showing the location and height of the proposed flagpole.
- The flagpole shall be designed by a Registered Design Professional. The design must include calculations for the foundation and strength of the pole (including any connections). Material specifications must be provided.

SOUTHERN NEVADA BUILDING OFFICIALS (SNBO)

REGIONAL FLAGPOLE STANDARD (cont.)

- Foundation design may assume presumptive values specified in Section 1803.1 of the Southern Nevada Amendments to the 2009 IBC. Other values for geotechnical parameters may be utilized in the design where an acceptable geotechnical report is provided that substantiates such values.
- Flagpoles with a height of 40 feet or more but less than 100 feet high are subject to the following minimum requirements:
 - A site plan shall be provided showing the location and height of the proposed flagpole.
 - The flagpole shall be designed by a Registered Design Professional. The design must include calculations for the foundation and strength of the pole (including any connections). Material specifications must be provided.
 - Foundation design may not use presumptive values; a site specific geotechnical report is required.
- Flagpoles with a height of 100 feet or taller are subject to the following minimum requirements:
 - A site plan shall be provided showing the location and height of the proposed flagpole.
 - The flagpole must be designed by a Nevada Registered Structural Engineer. The design must include calculations for the foundation and strength of the pole (including any connections). Material specifications must be provided.
 - Foundation design may not use presumptive values; a site specific geotechnical report is required.

Building or structure mounted flagpole installations:

- Flagpoles less than 10' long and having their base mounted to a building or structure no more than 10 feet above finish grade do not require building permits and are not regulated by this standard. Note that this exemption shall not be construed as allowing any unsafe flagpole condition to exist irrespective of permitting requirements.
- Flagpoles more than 10 feet long or having their base mounted to a building or structure more than 10 feet above finish grade shall require a building permit. Permit requirements are as specified below:
 - A site plan shall be provided showing the location, length and base mounting height of the proposed flagpole.
 - Plans and details shall be provided to show material specifications and specific attachment requirements to the existing structure.
 - Calculations shall be provided by a Nevada Registered Design Professional to include strength of the pole (including any connections), capacity of connections to the existing structure, and suitability of the existing structure and components to receive the new loads.
