CARGO CONDITION: (Aluminium Hydroxide)

The detailed condition characteristics of the cargo visually observed were as follows:

- By visual inspection cargo observed white in color, dry, powder & free flowing.
- Some agglomerated cargo found in cargo which returned to free flowing by hand pressing.

Condition:

Based on visual checking of the cargo we found the condition of the goods are sound.

SAMPLING

1. Sampling: performed according to IFA systematically from vessel holds .
2. Sampling: Manual sampling performed by SGS inspector
3. Sample distribution: Sealed/Labeled sample (Three retained/ Two for analysis purposes)
4. Portions of all samples Retained for the required period of three months. each retained sample is in our possession for the specified time.

Samples Distributed of sample	Kind	Retained Samples for three months	Sample for Analysis purpose
Numbers of samples		3	1

Remarks:

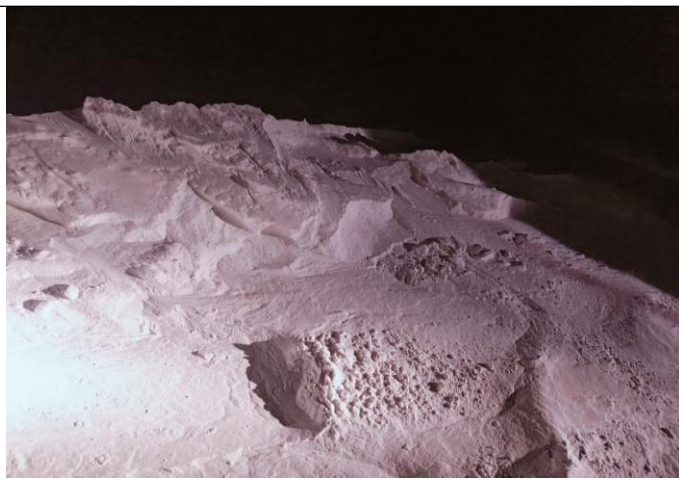

1. The cargo storing in 2 holds
2. The vessel master didn't open the vessel hold as he informed us that the generator is broken so can not open the hatch cover so we go down through the manhole of each hold to take samples.
3. There was No light inside holds while sampling so we used the flash light of mobiles to take photos of cargo and to make sampling.
