J & R Recycling

"Responsible, reliable recycling"

**Recycling and Junk
Removal
Columbia, SC
Forest Acres, SC
Jrrecycling.com**

Why Recycle?

Recycling is in high demand because landfills are filling at a faster rate than ever before, and new technologies combined with resource scarcity have caused recycling materials to become more cost-effective than producing new ones in many cases. This means when you recycle with us, you're helping industry and the environment simultaneously!

Why choose J&R?

THE J&R DIFFERENCE

J&R Recycling- Columbia is more than a junk removal service. We take pride in following the most responsible materials handling practices. What this means is that when you hire J&R, your waste is going to be put to use in whatever way possible in order to protect the economy and environment established in our community.

OUR PROCESS

Each item we take is put through a series of tests to determine where it will end up next. We follow the recommended logical order for the least environmental impact: Reduce, Reuse, then Recycle. We help businesses reduce the amount they are sending to landfills first, so that we may then reuse any items with utility and recycle the materials from those which don't.

R FOR RELIABLE

As a small local business founded in the Carolinas, we take pride in making Columbia's metro area cleaner every day. Our founder studied Environmental Science at the University of South Carolina and made it J&R's Mission to focus on our home area as a priority. You can count on us to care about your cleanup as much as you do.

E-Waste Specialist

FOR A CLEANER TOMORROW

Over the past 40 years, electronics have made up higher and higher percentages of landfill waste. Due to hazardous materials and precious metals present in electronics, it is important that they go to recycling and not deteriorate in landfills. This is the reason South Carolina has put laws in effect regarding disposal of electronics, and why J&R Recycling has stepped up to the plate to ensure proper disposal of electronics.
