HAYAO MIYAZAKI

Born in the town of Akebono-cho in Bunkyo, Tokyo, Miyazaki is a Japanese director, animator, producer, screenwriter, author, and manga artist best known for working on the popular Studio Ghibli films such as *Spirited Away*, *My Neighbor Totoro*, and *Princess Mononoke*.

Miyazaki's work is praised for its talented animation, storytelling and world building; filled with great amounts of child-like imagination and creativity. "Miyazaki's works are characterized by the recurrence of themes such as humanity's relationship with **nature** and technology, the wholesomeness of natural and traditional patterns of living, the importance of art and craftsmanship, and the difficulty of maintaining a **pacifist** ethic in a violent world."

FAKE ARTIST BIO

At the age of 31, Viola Chavez has become a famous animator, writer, and director across the country. Born in Atlanta, Chavez always dreamed of being an artist in her early years. After graduating from Walton High School, Viola moved to California and attended CalArts. Chavez was then gaining praise from her fluid and imaginative animations, and was eventually spotted by an animation studio to hire her. She quickly became part of the team and animated for Dreamworks. Chavez also got the opportunity to even direct few films and express the creativity and imagination animation can offer. Chavez became so successful with her work, she won awards and opened an exhibit for her artwork.

Her fondest memories in her lifetime were her adolescent years, full of imagination and fun. Viola chose to make these memories imprint onto her work, directing movies often with a child protagonist living through a fantastical world as Viola herself would imagine to exist in as a child. These ideas were heavily influenced by films from Studio Ghibli and Disney.

SOME ARTWORK BY THE ARTIST

Shown here are some promotional art done by Chavez to promote the launch of an upcoming series being developed

LAYOUT

"ZOE'S FLYING DELIVERY SERVICE"

This piece is a reimagined version of a famous scene from *Kiki's Delivery Service*, changing the main character to her own, a witch in training named Zoe, with a magical creature, Raya.

"NATURE'S BEST FRIEND"

This is a piece made from another one of Chavez' original characters to an upcoming story, Alex the nature wielder. She is able to control nature at will, also being able to sprout flowers, bushes and vines at any place just by touching the area she wants nature to bloom. Without hurting any of the nature she wields out, she is able to bend and twist the vines into weapons, fighting off evil with the power of nature. Alex herself is very kind and bubbly, always putting others in front of herself, including the nature and wild, becoming nature's protector and best friend

More of ZOE and ALEX

Being childhood friends cursed with power of flight and nature, alex and zoe became a strong duo to fight against evil to protect the ones they love.

STORY

Zoe and Alex live in a normal town, going through the hardships of high school, until suddenly they are mysteriously taken to be experimented on. A new chemical discovered, releasing superhuman powers to the ones given the chemical, those being a handful of teenagers; two being alex and zoe. After gaining the powers of flight and nature, our protagonists realize this was all part of a governmental plan to fight off the evil monsters living in the forest with these powers. Reluctantly accepting their fate, zoe, alex, and others train to fight against evil and try their best to protect their city and family.
