Dear Donors Choose,

Thank you!

My classmates and I are both truly honored and grateful to have gotten this opportunity to participate in this ultimate art experience. Due to this many of my classmates, including me, have been able to develop a drawing habit. This habit has allowed us to not only develop a healthy habit, but a way to truly express ourselves through the use of art. We applied and learned to incorporate these new techniques, such as shape, form, space, and texture into our journal drawings. Utilizing these journals have ultimately helped us unravel a new side to ourselves.

In my opinion, this journal has presented me with lots of opportunities to learn and strive to perfection. I'd say that I not only have developed the habit of drawing, but the opportunity to incorporate my ideas and style into this journal. Many of my drawings have allowed me to express how I was truly feeling those certain days I decided to draw in my journal. Most importantly, it portrays a sense of individuality and creativity throughout the course of the drawings. Overall, I'd say that each drawing in my journal relates back to who I am as a person and my everyday inspiration. Once again, thank you!

Sincerely,

S.C.
