

Industrial and Marine

## NYLON CABLE GLANDS

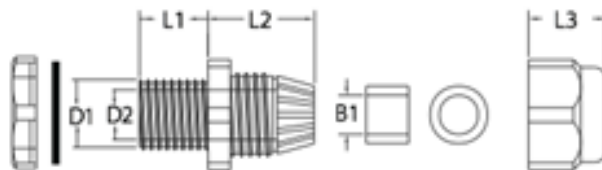

### DESCRIPTION

Carter Industrial and Marine nylon cable glands are devices that you can attach to the end of a cable, to secure it to equipment, as well as keep the wires organized. These devices can be used for telecommunications, control, instrumentation, data cables, and electrical power. These cable glands are water tight, provide excellent strain relief, easily assembled, and offer a wide cable range.

### FEATURES

- NYLON 66 (POLYAMIDE 66)
- NEOPRENE SEALING
- NPT
- FLAME RETARDANT
- IP 68 WET LOCATION RATED
- UV RESISTANT BLACK
