

WHY MAYLA DRY CAT FOODS ?

It improves and lengthen quality of your cat's life ...

- Its tested and proven to grasp the attention of even the pickiest eater with its intense taste and aroma. It supports the immune system with its natural antioxidants and high protein content. Rich in vitamins and minerals for the health of your cat's sensory functions
- Contains taurine to improve vision and preserve heart health, and maintains skin health.
- Kibbles naturally scrubs teeth clean like a toothbrush, reducing plaque & tartar buildup for healthy teeth & gums.
- An abundance of certain minerals such as phosphorus, magnesium and calcium found in catfoods can cause crystals to form in urine. It generates mostly urinary stones and bladder irritation bladders calls FLUTD (Feline Lower Urinary Tract Disease). Other factors effects FLUTD likely; Stress, Excess Weight, Lower water intake...etc. Kidneys filter waste and toxins from the blood, and maintain the normal balance of fluid and minerals within the body. As our pets get older, damage to kidneys may occur. Its irreversible process. Renal cats may also loss of appetite, caloric intake eventually decline and eventually ends with loss of muscle mass. In MAYLA cat foods, diets designed to support kidney function and help to sustain muscle mass.
- We control the phosphorus with low sodium. With high level of amino acids and omega3 fatty acids. Therapeutic level of L-Carnitine is also introduced with your cats natural ability to build lean muscle daily.
- By adding hydrolyzed proteins, it alleviates adverse reactions to foods.
- Omega 3 and 6 are very vital fatty acid for all animals. Inclusion of EPA, it nourishes the skin, fur luster and softer. Added antioxidants help to support skin barrier function.
