

**Cavi-Lipo is the most evolved system for the treatment of adipose areas and cellulite.**

**Cavi-Lipo** is one of the most advanced and efficient systems using Ultrasound Cavitation to breakdown fat cells. The released fat is then metabolized through the liver and natural means. Only a few treatments are needed for a brilliant performance. We help men and women with fat deposits on the belly, thighs, hips,

breasts, upper arms, bra-edge, double chin etc. No injections or other interventions are needed, no anesthesia, no antibiotic treatment, and you can immediately return to your normal activities. The Cavi-Lipo method is new and revolutionary, and is likely to increasingly replace liposuction methods of surgical elements.

#### **Treatment Information:**

The treatment lasts about 30 minutes, it is totally painless and with no known side effects. In most cases the result can be seen immediately and depending on individual clients, most will need between 3-6 treatments (patients can have up to 12) with interval of twice a week.

#### **Benefits:**

- - Removes fat from stomach, waist, thighs, hips, arms, etc
- - Reduces cellulite
- - Completely painless

#### **We Recommend:**

Immediately after the treatment you should take a brisk walk or similar exercise. To get the maximum effect of the treatment you should drink plenty of water for 24 hours before and after the treatment, at least 1.5 liters per day. Minimize the intake of carbohydrates and fat 24 hours before the treatment to burn and secrete fatty acids and glucose. The exercise carried out afterwards should be powerful. The alternative is a deep massage that can be booked in connection with the treatment.

## Operations:

### A. LIPO handpiece (Silicon Handpiece - No Noisy of Ultrasound)

[Figure A]

[Figure B]

[Figure C]

The range of energy is wide and is designed for rubbing, the dynamic energy is sent straight to deep skin compared to the high frequency, Cavi-Lipo's hand-piece has a bigger vibration and can feel as it transmits the energy more deeply.

### B. FOCUSING handpiece

[Figure A]

[Figure B]

[Figure C]

[Figure D]

LIPO hand piece generates a 28,000 micro vibration-each seconds which can easily be used for body care. It has been expressively thought and designed to perform reduction treatment of adipose areas and cellulites, which results that can be compared to liposuction in the surgery room. A wide variety of treated cases is available to see.

**Before & After:**

**NOTE:**

The treatment should not be seen as a substitute for other weight-reducing measures but as an additional aid to a good diet, exercise and detox. Reduced weight and a more attractive body improves the self-image, increases motivation and makes it easier to get started on a healthier lifestyle. Results may vary, please take in consideration our recommendations and understand that this is not a substitute for other weight-reducing measures.
