

# Social Media Support

How we can Showcase your Business

Social media set-up

- Set-up from grassroots inception to assisting with completion of your Social Media accounts.
- This means that your social media is taken care of with minimum effort and you can focus elsewhere.

Template provision

- We can provide the basis/design for your posts.
- This allows you to build a consistent Brand across all Social Media channels so that your audience can start to recognise who you are.

Content posting

- We can post to Facebook, LinkedIn, Twitter and Instagram dependant on what is relevant to you.
- This provides your business a larger viewing platform, which can generate more sales.

Training

- As well as the above we can train staff on how to post, create posts and use the correct tags to strengthen your business presence.
- Knowledge is power. This enables staff to be able to learn and begin posting by themselves.
