

# dream train fly

**Egnatia Aviation Training Academy** is the **largest Flight Training Organisation in Greece** and one of the largest in **Europe**, and provides pilots to many airlines around the world. It is approved by the European Agency EASA to provide airline pilot training at all levels. The excellent weather, along with, the low-cost environment of Greece, the unrestricted operation and the excellent location enables us to deliver consistent training all year round. We operate at **international airports** with modern navigation facilities rather than small General Aviation airports without the instruments required to provide airline training (e.g. Megara).

**Egnatia Aviation** provides training according to international aviation standards and meets Airline recruitment needs. We are working with the Airline Industry and the Authorities on the training and selection of new pilots and as a result not only our courses reflect this but they are also amended accordingly regularly. We mirror as much as possible the Airline procedures, methodology and environment (e.g. airline call-outs, iPads rather than paper etc.).

Our goal is that **every graduate finds work**. Currently, **95%** of our graduates find airline employment **within a year** in one of the leading domestic and global airlines, such as Aegean Airlines, Olympic Air, Wizz air, Ryanair, EasyJet, Qatar Airways, Emirates, Air Arabia, Kuwait Airways, Iraqi Airways, Oman Air and others. The total number of graduates already exceeds **2.500**, coming from a total of **57** different countries.
