# from A to Airline

**EGNATIA**  
AVIATION

[www.egnatia-aviation.aero](http://www.egnatia-aviation.aero)

# Welcome to the world of Egnatia Aviation

Egnatia Aviation started training pilots in 2006 and has already been established in the commercial airline pilot training due to the quality of training, modern systems and methodology, customer focus plus the airport network, as well as the new modern aircraft and simulators it operates.

Egnatia Aviation uses a fleet of New Generation Diamond aircraft, state-of-the-art simulators, experienced instructors, modern European standards, and new, modern and very comfortable training facilities.

"It is a great honour to work with and provide pilots for major commercial airlines through very high standards and with new modern fleet within EASA. We are bringing together 'the best of the breed' in most areas for the benefit of our customers and staff"

# World Class Training

**Egnatia Aviation** was founded in 2006. We are an EASA approved Flight Training Organisation and have trained more than **1.650** pilots from more than **57** countries since 2006. **More than 65% of those students are international.**

Egnatia Aviation specialises in commercial pilot training based on airline standards, procedures and systems. Furthermore, paperless interactive training materials and records mirror those of the world class airlines.

Our pilots now work for companies such as **Qatar Airways, Aegean, Olympic, Iraqi Airways, Easyjet, Ryanair, Air Arabia, Royal Air Maroc, Wizzair, Kuwait Airways, Oman Air, Gulf Air, Air Algérie, Cobalt, TusAir, Astra Airlines, Ellinair** etc.

We are happy to say that **95%** of our students have found work within a year from graduation.

Initially a UK based school we moved to Greece for a variety of reasons with the most important being of course, the weather and the airspace congestion.

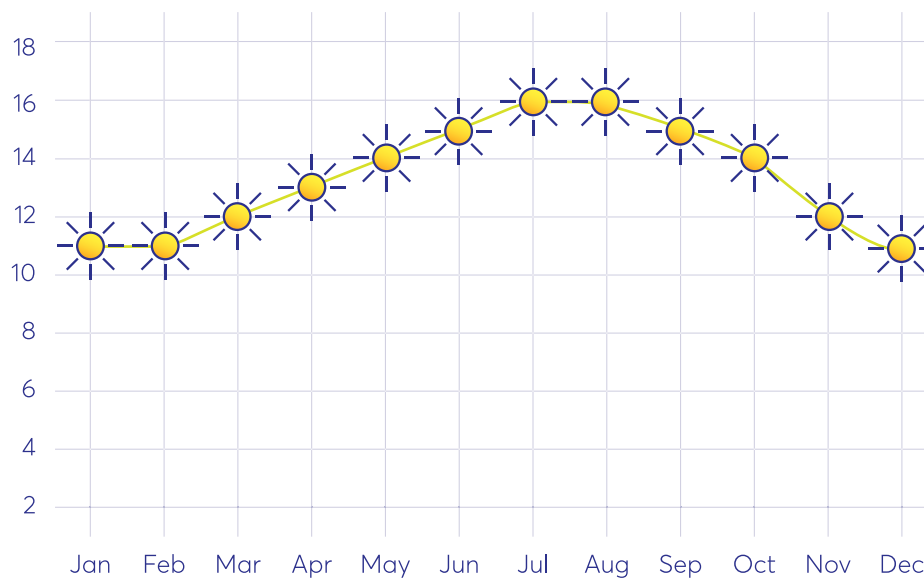

Other reasons have been the lesser overall costs, which gives us the ability to keep our prices very competitive without compromising the quality of our training and the ability to operate at international airports offering the complete training in Europe.

South Europe offers a climate ideal for pilot training and we are proud to say we are one of the biggest airline pilot training academies in Europe.

With more than **14.000** training hours every year Egnatia Aviation is one of the largest flight academies in Europe delivering consistent timely training.

Average number of flight training hours per day

# Flying from international airports

The main school is based at Kavala **International Airport "Megas Alexandros"**. Apart from the obvious benefits of training in an **international airport, "Megas Alexandros"** has a sunny Mediterranean and southern continental climate to offer. It is also one of the **best equipped international airports in the southern of Europe**.

The second base is the **national airport of Kozani** where domestic and international charter flights take place.

In both bases there are at least four suitable airports in close proximity which are all essential for commercial training.

# International recognition and partnerships

Egnatia Aviation has designed an Airline-tailored ATP(A) Integrated Course, which addresses all the Ab-Initio training challenges of today's future pilots.

Being **one of the few EASA Approved Training Academies in Europe** with experience in providing customised training products to some of the world leading airlines, such as **Qatar Airways, Air Arabia, Wizz Air, Aegean, Iraqi Airways**, a lot of expertise is gathered in order to establish what is believed to be one of the best training programs in Europe, with the needs of all modern air carriers in mind.

Furthermore Egnatia Aviation is approved and provides pilots for **Oman Air, Kuwait Airways, Ryanair, Olympic, Flydubai, Gulf Air, Astra Airlines, Ellinair** and it is to be mentioned that our graduates work in 61 different Airlines around 57 countries.

# Most Modern Fleet

We take great pride in our fleet. We have the privilege to operate one of the biggest fleet of NEW Diamond aircraft in Europe, consisting of 12 aircraft:

- 5 DV20 Katana
- 4 DA40 NG + 2 on order
- 2 DA42 NG + 1 on order
- 1 AERO AT-3
- 1 aerobatic approved aircraft on order

To fly higher in this field we are constantly increasing the fleet with new state-of-the-art aircraft and simulators in order to meet the increasing training demand.

We train under the best weather conditions to the highest training standards possible.

Our EASA approved Maintenance Organisation assures the highest safety standards and the best aircraft condition.

# State of the art facilities

Investing in smart designed modern facilities, we have created three training spots in northern Greece; two in Kavala and one in Kozani. Including ATPL classrooms with interactive whiteboards, Flight Operations department, multiple briefing rooms, two state-of-the-art simulators and student resting and study areas, the main offices located at Kavala International Airport "Megas Alexandros", the new Theory Training Centre in Kavala and the new training base of Kozani, increase the ability to accept more students and provide even higher training standards.

Serving this purpose, we have already scheduled the installation of 5 new flight simulators widening the range and increasing the speed of training.

## Experienced instructors

Our training director and his team, with vast experience in both military and civil aviation along with a group of carefully selected instructors, combine knowledge and experience to provide training which can live up to the Egnatia Aviation standards. Regular standardisation meetings ensure that all our instructors teach at the same high standards.

## Fully equipped accommodation available

Egnatia Aviation offers on request carefully selected self-catering apartments close to the training centers in an all-inclusive monthly cost. Transportation between the accommodation and the school is also available. Egnatia Aviation is doing its best to help you train uninterrupted and have a comfortable environment to study.

# All inclusive packages

Having more than 65% of international students from over than 57 countries, we understand that in order for the students to achieve top quality training, we need to assist with their accommodation and transportation needs, which makes it easier to concentrate on their training. For that reason, Egnatia Aviation is offering all inclusive packages, which include:

- **Aircraft rental and examiner fees for the skill test(s)**
- **Hellenic Civil Aviation license fees**
- **All airport and government taxes**
- **All airport costs** (e.g. approach, landing fees)
- **Uniform**
- **All necessary training materials** (including ipad, maps, charts, headset etc)
- **English Language Proficiency Test**

# Our own EASA approved maintenance facilities

Egnatia Aviation operates its own EASA approved maintenance center with experienced Engineers, who are there every day to ensure that our planes are maintained according to the manufacturer's and EASA strict standards. Our planes have the lowest down-time possible, hence more availability for training.

# How we do it

So you are in the process of choosing a flight school and you are wondering how does Egnatia Aviation ensure that you can get the best training possible and find a job. In Egnatia Aviation's philosophy the student is right in the centre of our attention. Once you enroll, a whole mechanism is set in motion to meet your needs. This is how we manage to provide the best training under the most favorable conditions to produce airline pilots, which any airline would be proud to have.

## Airline

We are in direct cooperation with airlines to be one step ahead, and adjust our training to what the industry needs in order to meet the current growth and pilot demand.

One of the many positives of our fleet is that the technologies used resemble that of an Airliner, making the integration to an airline aircraft as smooth as possible.

Egnatia Aviation adopted throughout the training the airline philosophy and mentality in all materials, procedures and policies with paperless training materials, guides and records, making the transition to airlines as smooth as possible.

For all non-training issues we have a Welfare Department which takes care of all your needs. From helping you to open a bank account, to organizing events our welfare department is there for you.

We have active participation in conferences and industry meetings in order to shape, understand and adapt the new industry standards

From the moment you enroll in Egnatia Aviation you will be assigned a personal mentor. The mentor is going to follow your training and make sure you achieve your goals

**A**

# What our students think of us?

"If 2 words can describe the experience, I would say "Marvelous experience" Marvelous and enriching."

*Juan Carballedo – Spain (Ryanair)*

"Incredible school! Egnatia Aviation is a class A, one of the top flight schools. The instructors are great and are always willing to help you throughout your training in any way they can. The planes are always in the best condition and I am fortunate to train on a Diamond DA40 NG with an excellent flight instructor. I can honestly say it is the best, most affordable flight school and I highly recommend Egnatia Aviation to anyone pursuing the dream of becoming a licensed Airline pilot."

*Noah Malak – Lebanon (MEA)*

"As soon as I joined Egnatia Aviation, I saw all the positive aspects of the Integrated course. I felt very lucky I could fly so often and day by day see my dream come into shape."

*Aggelos Kitsoulis – Greece (Aegean Airlines)*

"To all those considering a flight school, firstly, I would like to take this opportunity to express my sincere appreciation and gratitude to Egnatia Aviation for all the assistance they have provided me with while pursuing my dream of becoming a pilot."

I would also like to recommend the flight school to prospective students looking to be future aviators. Soaring the Greek sky was probably some of the best flying I ever had, beautiful views, many airports to touchdown at, state of the art aircraft and extremely kind and helpful Egnatia team are key ingredients for a memorable experience."

*Mohammed Al-Khafaji – Iraq (Iraqi Airways)*

# What you should ask yourself before you choose the right flight academy

1. Will I just get a license or will I get trained according to airline standards and procedures?
2. Will I finish my training uninterrupted by outside factors (e.g. weather)
3. Will my money go towards my training or for other costs?
4. Will the school care for me or will I be just a "number"?

If you answered **YES** to those questions then **Egnatia Aviation is the right academy for you.**

**Your dream begins here.**

we make  
your dreams  
come true
