

Create a clear strategy for reducing your Oracle® costs and ensure success by decreasing execution risks with an in-depth analysis of your Oracle database and migration tactics.

Service Highlights

Fixed Cost

Fixed cost pricing by schema provides you a low-cost, high-impact service, eliminating any guesswork in budgeting.

Fixed Statement of Work:

- Oracle experienced engineer
- Infrastructure interview
- Diagnostic inventory
- Migration assessment report
- Report discussion
- Migration cost and time estimates

Fixed Timeframe

A migration project requires new expertise and experience that can take weeks or months to acquire. Our Oracle migration experts can help you plan and/or make a decision within days.

Accelerate Your Escape From Vendor Lock-in

Taking a measured and planned approach to adopting a secondary database or switching databases is a wise decision. Using a trusted and experienced partner to realize your cost savings quicker is an even wiser decision. Your staff can get the job done

faster and more efficiently with lower costs and fewer pitfalls when you rely on the database compatibility experts. Find out the best course to adding choice back into your database deployment decisions in days, not months.

Eliminate Guesswork and Ensure Success

An engineer experienced with Oracle will consult with your DBA and developer staff to understand your database architecture and configuration, and then perform a series of system diagnostics to inventory your Oracle database and application usage.

database compatibility categories into a comprehensive report that also includes a migration complexity index rating. Within each category, migration issues will be detailed with accompanying narratives specifying migration best practices within the EnterpriseDB migration methodology.

The diagnostics output will then be analyzed and summarized across five key

Object Counts	
Type	Count
Function	34
Index	239
LOB	5
Materialized View	5
Procedure	17
Sequence	64
Table	130

Constraint Co	
Type	
CHECK OR NOT NULL	
FOREIGN KEY	
PRIMARY KEY	
UNIQUE KEY	
OTHER	
Total Constraint Count	

Migration Issues		
Object Type	Type	Count
DATATYPE	Count	
TABLE	Count	
INDEX	Count	
VIEW	Count	
PART TABLE	Count	
PART TABLE	Hash Part	
PART TABLE	Sub Parts	
PART INDEX	Count	

Migration Assessment Report

Your customized report will detail five key migration dimensions:

- » Implementation
- » Object parameters
- » Features
- » Packages
- » Syntax

An experienced Oracle engineer scores each dimension, providing a Compatibility Index Score of migration difficulty, narrative covering migration tactics for your application, and a Composite Compatibility Map to visualize the overlap between your application and the capabilities of Postgres Plus Advanced Server.

Assistance from Assessment to Production

With seven years in business helping organizations reduce their Oracle costs, EnterpriseDB not only has the software and experience to assess your migration prospects, we can also implement your migration as well. For organizations that are time or resource constrained, our staff can

fill the gap using not only our experience, but automated migration tools, saving you even more time as well as effort. In addition, our experts will review all migration issues in a sandbox environment with your staff and educate them on the implementation of your migrated data and applications.

A Picture is Worth...

Thousands of dollars or more when it comes to your infrastructure. A migration assessment report brings clarity to a task that can be difficult to measure. Our experience and 8th generation compatibility software will accurately assess your possibilities for success, the risks involved, and the cost savings you'll realize.
