Custom SOP's and SOG's

FBNY offers standard operating procedures or standard operating guidelines for fire departments. We can create generic, semigeneric, or full custom versions based on the needs of your fire company, department or district. Call or email us to discuss how we can save you a lot of time and work!

Fire photography and videos

Most of our social media platforms have fire photos and videos posted in real time. Any photo's or videos we create can be purchased in many different formats including on canvas or metal.

Company profiles

FBNY offers Company Profiles at no cost to interested fire departments. We will come out to your station(s) and take photos of your apparatus, firehouse and personnel and use them for a feature on our website and social media. The profile will include apparatus specs, general information, history and photos.

Historical research assistance

Is your company or department having a significant historical event coming up and are troubled by poor record keeping in the past? FBNY offers a thorough historical research service that has the knowledge to assist you.

FBNY can provide you with news clippings and photographs dating back to the very beginning of your agency. Call or email us to discuss how we can assist you with finding your lost history.

Latest news and information

Our Facebook page keeps you updated 24/7 with real time emergency incidents and updates, as well as local firefighting news, information, and training events. We pride ourselves on posting our photos and videos directly from the scene.

Our Threads account posts real time emergency incidents and our other social media platforms always have the latest photos and videos and our website has more in depth stories, articles, and news.

AMHERST, NY, JULY 20—Racks and racks of burning combustible products in the warehouse of a PPE manufacturing facility required at least 50 companies to battle a blaze that burned for many hours. The warehouse was shared by multiple business, including one that's involved in industrial chemicals. The state's foam supply cache was requested from Rochester, which is about 80 miles away from the scene.
