

# Driving your International Growth ... in the UK

If you are looking to grow your international business, then the UK is the market for you.

Even with Brexit looming, there are excellent commercial opportunities in the UK and businesses are seeking active opportunities to trade with the EU. Even when Brexit (finally) takes place, the UK will still be a relevant entry point to the wider trading bloc.

By working with The Company Connector you will meet the people and businesses you need to meet to grow your business. We can help you:

- Develop new markets: find customers who want to do business with you
- Build your presence: effective PR and Comms to make sure your message is positioned in the right place at the right time with the right audience. We can also help with Trade Show and Event management and representation
- Locate: help you find the practical answers to your location and logistical questions
- Find the right people: recruit the right people to support your business as staff and/or agents
- Do the right thing: understand the regulatory regime and engage with stakeholders, politicians and policy makers
- Engage an effective supply chain: goods and services including (but not limited to) professional advice, marketing support, production, storage and distribution
- Be understood: we can work with you to make sure your business is understood

Having worked in business development for nearly 30 years, I have extensive experience in growing businesses. A good part of that work has been in business support and representation giving me outstanding access to the contacts you need to make

I look forward to working with you so please do not hesitate to get in touch:
