

INFODRIVER QUANTUM

Robo-advisory app for crypto newbies and pros.
TO INCREASE THE UNITED KINGDOM'S FINANCIAL FREEDOM AND PROSPERITY

60 second pitch

Infodriver Quantum is a Robo-advisory app for Web3 investments. Backed by AI analytics and industry experts consultations it helps new and experienced investors to create high-profit portfolio with low risk. The app includes Web3 startup portfolio with a scoring, a Non-Custodial wallet with utility token, and a Lending Marketplace with own proven strategies for secure investments.

We compete in the fast growing Robo-advisory market in UK which last year was US\$88.31 bn with a projection to reach US\$127.60bn in 2023.

We are similar to eToro, Crypto.com, Uphold, Margex, Huobi, Coinbase and Binance in UK but we generate high-profit (up to 36% APY) with low risk on AI analytics and proven investments strategies.

Currently we have proven automatic and manual investment strategies, 10 Web3 industry experts in the team, registered company with office in London, under UK innovate program.

We are looking for £300,000 for 15% shares on Pre-Seed Round on £1,654,000 pre-money valuation to build the app and integrate investment strategies, before next round of getting crypto, MSB license and marketing launch.
