NEXUS VENTEX

Equipment Leasing Solutions for
American Companies Operating in Venezuela

Oil & Gas • Pipeline • Utilities • Infrastructure

U.S.-Based | Compliance-Focused | Project-Ready

ABOUT NEXUS VENTEX

Nexus VenTex is a U.S.-based equipment leasing company purpose-built to support American firms executing projects in Venezuela. We bridge the gap between the demanding operational realities of the Venezuelan market and the standards, compliance requirements, and reliability expectations of U.S. companies.

U.S. Ownership

Fully American company. Contracts, insurance, and accountability under U.S. law and standards.

Venezuela Focus

Specialized knowledge of logistics, mobilization, and operating conditions unique to Venezuela.

Compliance First

Sanctions-aware processes, transparent documentation, and risk-mitigation built into every lease.

THE OPERATING CHALLENGE

U.S. companies working in Venezuela face a unique set of constraints that standard domestic or regional lessors are not equipped to solve.

01

Equipment Availability

Reliable, project-grade equipment is scarce and difficult to source locally under current conditions.

02

Mobilization Complexity

Moving assets into and out of Venezuela requires specialized logistics, permits, and coordination.

03

Compliance & Sanctions

U.S. firms must maintain strict adherence to OFAC and related regulations while staying operational.

04

Contract Risk

Local leasing arrangements often lack the contractual clarity, insurance, and enforceability U.S. companies require.

OUR SOLUTION

Nexus VenTex provides turnkey equipment leasing designed specifically for U.S. operators in Venezuela — combining American standards with on-the-ground practicality.

Curated Fleet

Heavy equipment, power generation, pipeline tools, safety systems, and support assets selected for Venezuelan conditions.

End-to-End Logistics

We coordinate mobilization, demobilization, customs, and inland transport so your team focuses on the work.

U.S. Contracts & Insurance

Clear lease agreements governed by U.S. law, with appropriate insurance coverage and transparent terms.

Ongoing Support

Responsive service coordination and local partner network to keep equipment productive throughout the project.

EQUIPMENT PORTFOLIO

A focused selection of project-critical assets, maintained to U.S. operational standards and ready for mobilization.

Heavy Construction

Excavators • Dozers • Loaders
Graders • Compactors • Cranes

Power & Generation

Diesel generators • Light towers
Temporary power packages

Pipeline & Utilities

Welding equipment • Trenchers
HDD support • Pressure testing

Support & Logistics

Vehicles • Site containers
Camps support • Material handling

Safety & Environmental

Gas detection • Spill response
PPE packages • Monitoring

Specialty Assets

Project-specific tooling
Custom configurations available

WHY NEXUS VENTEX

American Accountability

You contract with a U.S. company. Payment terms, insurance, dispute resolution, and performance standards remain under familiar legal frameworks.

Flexible Project Terms

Lease structures tailored to project duration — short-term, multi-phase, or extended campaigns — without the capital commitment of ownership.

Maintained to Standard

Equipment is inspected, serviced, and documented to meet the reliability expectations of U.S. operators and their HSE requirements.

Sanctions-Aware Operations

Our processes are designed with OFAC compliance and related restrictions in mind, reducing regulatory exposure for your projects.

Mobilization Expertise

We understand the documentation, routing, and coordination required to get equipment into position and back out when the job is done.

Single Point of Contact

One relationship covers sourcing, logistics coordination, contracting, and support — simplifying vendor management for your team.

INDUSTRIES WE SERVE

Oil & Gas

Upstream support, facilities maintenance, workover campaigns, and temporary infrastructure for operators and service companies.

Pipeline

Construction, integrity, and repair projects requiring specialized equipment and reliable power in remote corridors.

Utilities

Power, water, and telecommunications projects needing temporary generation, civil equipment, and site support assets.

Infrastructure

Roads, ports, industrial sites, and civil works where U.S. contractors require dependable leased fleets under tight schedules.

HOW WE WORK

1

Discovery

We review your project scope, location, timeline, and equipment requirements.

2

Proposal

You receive a clear lease package with rates, terms, mobilization plan, and compliance notes.

3

Contract

U.S.-governed agreement, insurance confirmation, and mobilization schedule locked in.

4

Deploy

Equipment is prepared, shipped, and staged according to the agreed logistics plan.

5

Support

Ongoing coordination for service needs, swaps, or extensions throughout the project.

6

Close-Out

Demobilization, inspection, and clean return process at project completion.

LET'S START THE CONVERSATION

Whether you are planning a new campaign, expanding an existing operation, or seeking a more reliable equipment partner in Venezuela, we are ready to discuss how Nexus VenTex can support your team.

Suggested Next Steps

1. Schedule a brief introductory call
2. Share your project timeline and equipment list
3. Receive a tailored capability overview and indicative terms
4. Review a sample lease structure and compliance framework
