

# Laboratory Inspection Nonconformity Corrective Action Report

## FORM 006

Written by:  
Chris Robinson

Date: December 31, 2025

Page 1 of 1

Name/Location of Laboratory:

Lab No.:

*Please use this form when preparing responses to nonconformities from on-site inspections. Describe in the areas provided the corrective action taken to resolve the nonconformity. Corrective action of nonconformities includes root cause analysis and a plan to monitor the effectiveness of the corrective action. Attach any supporting documentation.*

Nonconformity:

### IMMEDIATE ACTION

Describe the immediate action taken to prevent this nonconformity from affecting test results:

### ROOT CAUSE ANALYSIS

**What is the reason that allowed the nonconformity to happen?** (Answering this question is step one in a process to obtain the true root cause.)

**What improvements to the quality system can be implemented to prevent a similar finding?** (The improvements must address the true root cause identified above.)

### PLANNED MONITORING ACTIVITIES

Describe the plan to monitor the effective implementation of the improvement(s) identified above:
