

## **Weighted Walking Attachment System**

### **Terms and Conditions**

The Weighted Walking Attachment System has been developed and established as patent pending with the United States Patent and Trademark Office (USPTO).

*Inventors:* Nicole Fellows, MS, PT DPT., and Sarah Ali, MS, OTR, are referenced throughout this waiver.

*Company:* FALI Rehab Equipment, LLC

*The purchaser:* Company and/or individual purchasing the product for its intended use

The weighted walking attachment system allows for further adaptation to commonly used assistive devices (walker or cane). The attachments are easy to mount to existing walker legs and cross bars. In this regard, they are also easy to remove and replace: for example, to downgrade or upgrade the weight levels, as desired or deemed necessary. This allows for more patients to continue to use a rolling walker who would otherwise not be ambulatory or require physical assistance. This product also increases the consistency and ease of implementing proprioceptive and neural feedback interventions in both the therapy setting and home. The variety of weights (1-3 lbs.) and the ability to grade and individualize the intervention thereof is crucial in each patient's success.

The weighted walking attachment system has not yet been established as a product sold or as recognized durable medical equipment (DME).

The purchaser assumes and understands there is risk involved in using the Weighted Walking Attachment System.

The purchaser is willing to use the Weighted Walking Attachment System for either their benefit, or a desired patient's benefit, and are aware that success and/or protection from injury is not guaranteed. There is no warranty that the Weighted Walking Attachment System will be fit for a particular purpose or diagnosis. The purchaser acknowledges and assumes all risks associated with use of the Weighted Walking Attachment System.

The purchaser understands that FALI Rehab Equipment, LLC and the Inventors will not be held accountable or responsible for any and all claims, suits, actions, damages, expenses and liabilities allegedly caused by the equipment. I the purchaser, whether company or individual, hereby release, discharge and agree not to sue FALI Rehab Equipment, LLC and/or the Inventors or any of their volunteers and co-workers on any account of injury, loss or damage, including death and damage to property, caused or alleged to be caused by the Weighted Walking Attachment System, whether such an injury or loss was caused or alleged to be caused in whole or in part by the product.

The purchaser takes all responsibility regarding the further use and trial of the Weighted Walking Attachment System as it relates to their work. This applies to continued use of the product in their home and/or additional rehabilitation and therapy facilities and assumes any and all responsibility for any of the above-mentioned liabilities allegedly caused by the equipment.

I (purchaser) have read the statements above, this agreement and waiver and release, and further understand that I am purchasing the product knowingly and voluntarily.
