The CHPC meets on the 3rd WEDNESDAY of the month. 2020 Meeting Dates:

January 15	February 19	March 18
April 15	May 20	June 17
July 15	August 19	Next meeting in 2021

Connecticut HIV Planning Consortium

Biography Dr. Oneyma Ogbuagu, MBBCh, FACP

I am an Associate Professor of Medicine, in the clinician-educator track and Director of Yale AIDS program Clinical Trials program of the Section of Infectious Diseases of the Yale School of Medicine. My clinical responsibilities include educating and training medical students, residents and infectious diseases fellows in various capacities in inpatient and outpatient settings; and through structured course work and other teaching sessions. As a faculty of the HIV training track of the Yale-Internal Medicine primary care program and for the past 6 years as a faculty of the Human Resources for Health program in Rwanda, I have contributed significantly to and have extensive experience with curriculum development, structuring of residency training programs, and mentoring residents and faculty. In Rwanda specifically, I have and continue to mentor medical residents and junior faculty in quality improvement and clinical research projects that are locally relevant and addressing important infectious diseases-related problems (particularly HIV/AIDS and antimicrobial resistance). Furthermore, I have facilitated meaningful educational and research collaborations between faculty and trainees across institutions. As the program director of World Bank and HRSA-funded efforts supporting the Liberia College of Physicians and surgeons (LCPS)–run Internal medicine residency training program, I have overseen the selection and deployment of faculty to Liberia, and am responsible for educational programs and activities aimed at strengthening the residency training program. Overall, my expertise and collective experiences to date have positioned me to design and run successful projects around capacity building in low-resource settings including developing and implementing innovative and robust medical training and research programs for faculty, fellows, residents and students.

As a member and now Director of the Yale AIDS Program HIV clinical trials program, I have been a principal and or co-investigator on numerous pharmacokinetic, phase 2 and 3 safety and efficacy trials of novel antiviral compounds (HIV). Most recently, given the alarming rate of new infections among men who have sex with men (MSM), I have added HIV prevention trials to my portfolio including being a co-principal investigator on a Yale CIRA funded project, which has supported the formation of a cohort of men who have sex with men, who are at high risk for HIV and are engaged in HIV PrEP services in order to study the impact of substance use on retention in care and adherence to PrEP.

Education & Training

MBBCh University of Calabar, Nigeria (2003)

Fellowship Yale School of Medicine

Residency Mount Sinai School of Medicine

Board Certification AB of Internal Medicine, Infectious Disease (2012)

Honors & Recognition
