C. Knowledge Build: Harm Reduction Data Related to Substance Use Disorders (SUDs).....9:35 a.m.

SUDs are an area of focus in Connecticut’s syndemic approach to ending the HIV epidemic. SUDs are problematic patterns of misusing alcohol or other substances. SUDs are closely associated with HIV and other sexually transmitted diseases. This segment will highlight information on trends and patterns from Connecticut’s harm reduction programs and will help set the stage for the panel discussion.

D. Panel Discussion: Perspectives from the Field on Substance Use Disorders9:45 a.m.

Substance misuse increases the risk of exposure to HIV and other sexually transmitted diseases. Injection drug use increases the risk for getting or transmitting HIV and hepatitis B and C. In people living with HIV, substance misuse can hasten disease progress, affect adherence to antiretroviral therapy, and worsen health outcomes. Subject matter experts from diverse settings and individuals with lived experience will share their perspectives and insights about changes in trends related to HIV and SUDs. Panelists will discuss: What is working? What needs improvement? Where do we go from here?
