

## Handout 1: QPM 2021 Priority Setting Survey January 2021

15 responses

Proposed Activity	Avg. Rating (1=low, 5=high)
Plan <b>strategies</b> to Get to Zero, address disparities, strengthen workforce, integrate with related efforts, etc.	4.2
Revision of indicators – considering “ <b>synedemics</b> ” plan (STDs, Hepatitis)	4.2
QPM members pilot-test the <b>HIV Stigma Scale</b> as potential indicator (could share results at a QPM meeting)	4.1
Expand <b>PnR</b> (PrEP-to-Need Ratio) indicator to include goal for Black men and women (data may only be available for DPH-funded programs)	4.1
Communicate / share indicators and data with CHPC and stakeholders (e.g., <b>user-friendly version</b> of Indicators Handout)	4.0
<b>Progress Indicators</b> update	4.0
QPM members identify <b>consumers</b> to speak about their experiences as part of data presentations	3.8
Propose <b>quality improvement (QI) projects</b> for agencies to implement (based on data)	3.7
<b>Monitoring</b> plan implementation (beyond the indicators)	3.7
<b>Quality webinar</b>	3.6
<b>Housing / homelessness</b> data presentation (youth and adult)	3.5
<b>Hepatitis C</b> data presentation / develop a Hepatitis C indicator (e.g., percent “cured”)	3.5
Syringe Services Program ( <b>SSP</b> ) data presentation	3.3
Revise the <b>Partners Services</b> indicator (new data will be available in 2021)	3.2

### Other comments:

- Include Anal Pap screenings as an indicator. PLWH are at higher risk for anal cancer.
- Please know that many organizations are actively participating in robust CQM activities as federally required. This group should know what these are before it proposes new QI activities for them.
