

MyLife Connected Portal

Designed for monitoring individual health attributes

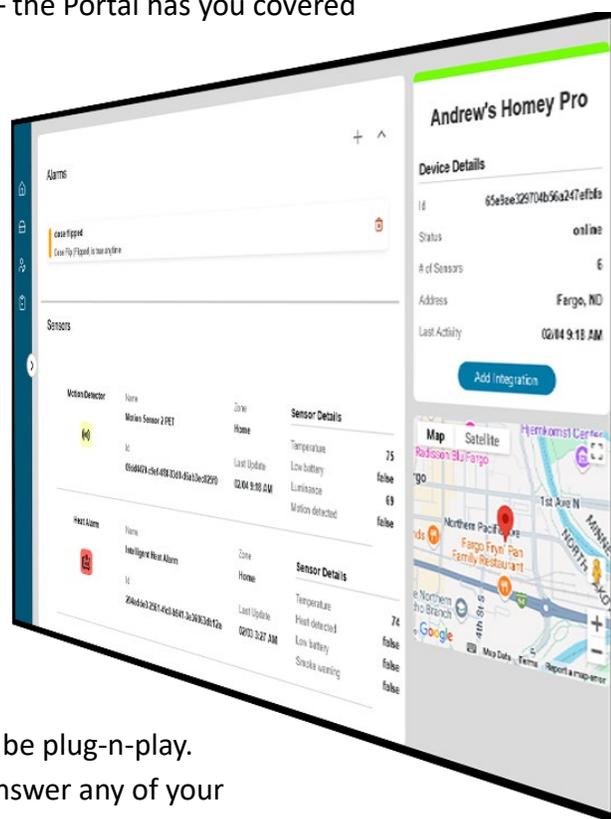

The Portal is designed to bring together data / information collected from various sensors and/or devices allowing for the remote – unattended monitoring of at-risk individuals and/or for monitoring those in need of a little extra care.

Along with our hardware partners we have brought together a wide variety of sensors/hardware that allow for our Portal services to cover a very broad spectrum of monitoring.

Whether you are an individual worried about loved ones that are managing alone or running a facility and want to enhance and personalize the care given – the Portal has you covered

Some of the Included Portal Features:

- **Various report selections**
- **Ability to set custom alarms**
- **Call-Tree notification system**
- **Multi-User / Multi-Tier access**
- **HIPA compliant**
- **Downloadable reporting**
- **Works in conjunction with the bio-watch's panic button**

All systems are pre-configured, tested and shipped ready to be plug-n-play. During setup are support staff are on-line to facilitate and answer any of your questions. **Contact us: Sales@WareHouse-13.biz**
