

## Smart Bio-Watch sensor

### Designed for remote monitoring individual health attributes

The Bio-Watch not only is a wearable sensor that monitors various body measurements, but also can act as a “panic / alert notification” device just by pressing a button.

Integrated into the Portal – you are able to set specific alarms/notifications on any/all of the bio-watches reported readings. These notifications as well as reporting can go out as email, text message or phone alert through a “call tree”.

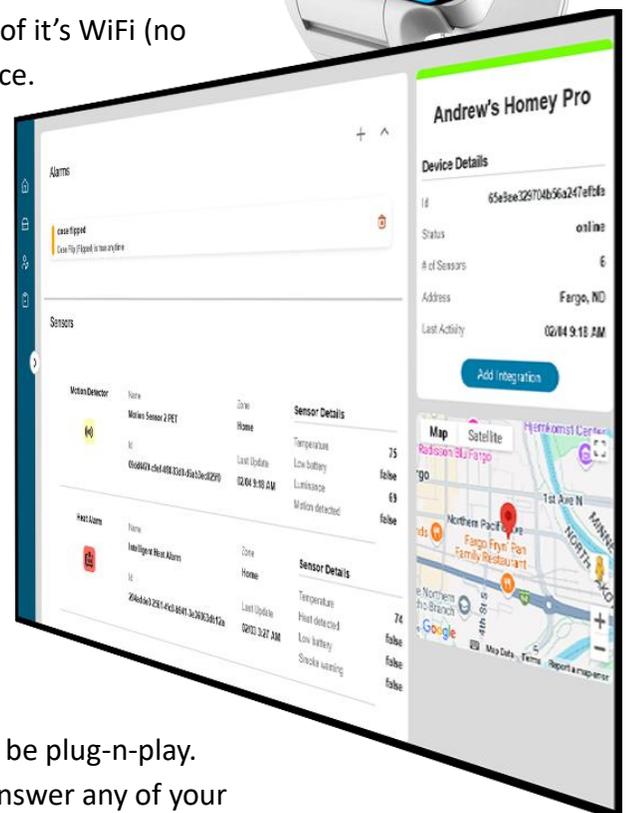

A special alarm can be triggered if the watch is out-of-range of it’s WiFi (no connectivity) signaling that the individual may need assistance.

### Health Features Monitored:(short list)

- **Heart Rate**
- **SP02**
- **Blood Pressure**
- **Skin Temperature**
- **Activity**
- **Panic / Emergency Notification Button**

Other features such as time interval for measurement, and notifications on battery power are built in!

All systems are pre-configured, tested and shipped ready to be plug-n-play. During setup are support staff are on-line to facilitate and answer any of your questions. **Contact us: [Sales@WareHouse-13.biz](mailto:Sales@WareHouse-13.biz)**
